Location: TX | Phone: 347-574-9225 | Email: tahirrshaik37@gmail.com | [LinkedIn](#)

SUMMARY

- **Data Analyst** with over **3 years of experience** in **Python development**, **data analysis**, and **visualization**, with a focus on **healthcare** and **risk management**.
- Proficient in **Python**, **SQL**, and **SAS**, leveraging libraries like **Pandas**, **NumPy**, and **Matplotlib** for efficient **data manipulation**, **predictive modeling**, and **statistical analysis**.
- Proficient in creating complex dashboards in **Tableau**, providing actionable insights into claims trends and operational efficiency.
- Strong background in managing **EMR/EHR data** integration, ensuring compliance with **HIPAA regulations** and improving data accuracy for **healthcare reporting**.
- Created and optimized **MySQL** data models, improving query performance by **35%** for healthcare datasets, ensuring more efficient data extraction and reporting.
- Developed Python-based **ETL** workflows using **AWS Glue** and **Lambda**, streamlining data processes and reducing processing times by **40%**.
- Skilled in working with **CMS data**, applying advanced risk management techniques and optimizing data workflows using **AWS** and **SAS**.
- Built interactive and dynamic data visualizations in **Power BI** and **Tableau**, enhancing stakeholder understanding of complex healthcare metrics and improving decision-making capabilities.
- Utilized Python to automate **data cleansing** and preparation processes, ensuring high-quality datasets for analysis and reporting.
- Collaborated in **Agile** environments, delivering Python-driven solutions for **healthcare** risk analysis and **predictive modeling**.
- Integrated **Python-based** data insights into business strategies, facilitating effective decision-making and operational efficiency.
- Strong **communication skills**, effectively translating technical data findings into actionable insights for diverse business stakeholders, driving impactful solutions.

TECHNICAL SKILLS

Programming Languages:	Python, SQL, R, SAS.
Cloud Technologies:	AWS (IAM, RDS, RedShift, DynamoDB, S3), Azure (Databricks, Data Factory)
Visualization Tools:	Tableau, Power BI, Advance Excel.
Databases:	My SQL, MongoDB, PostgreSQL, Oracle, Epic, snowflake
Libraries:	NumPy, Pandas, Matplotlib, Scikit-Learn.
Methodologies:	SDLC, Agile, Waterfall.
Version Control Tools:	Git, GitHub.
Analytical Skills:	Data Cleaning, Data Wrangling, Data Warehousing, Data Governance, Data mining, A/B Testing, Critical Thinking, Communication Skills, Presentation Skills, ProblemSolving.
Operating System:	Windows, Linux.
Agile Techniques:	Scrum, Kanban, Jira

PROFESSIONAL EXPERIENCE

- BCBS, TX
- Data Analyst

Sep 2023 - Current
- Developed **R-based** interactive visualizations and reports, enhancing stakeholder understanding of **CMS** (Centers for Medicare & Medicaid Services) data by **30%**.
 - Developed healthcare campaign performance dashboards in **Google Analytics**, improving ROI on digital marketing efforts by **18%**

- Ensure compliance with **HIPAA regulations** and maintain data security protocols while handling sensitive healthcare information.
- Designed complex **DAX** measures to track medical claims data, improving claim resolution accuracy by 20% and reducing processing delays by 15%.
- Designed and developed complex **Tableau dashboards** to analyze medical, membership, and pharmacy claims data, improving decision-making capabilities by 30%
- Extracted and validated claims data using **SQL**, streamlining reporting processes and improving data reliability.
- Designed **ETL** workflows with **AWS Glue, Lambda, and SAS**, streamlining data workflows, improving risk mitigation processes, and reducing processing times by **40%**.
- Optimized **MySQL** data models and schemas, applying normalization techniques to enhance query performance by **35%** for risk-based **CMS** datasets.
- Created detailed predictive analytics reports using **Pandas, NumPy, and SAS**, improving forecasting accuracy by **20%** for **healthcare** risk factors in CMS data.
- Developed custom visualizations in **Power BI** for CMS risk management reports, improving data representation and accessibility for key business decisions.
- Integrated **AWS EC2 and S3** with **SAS** to manage and optimize cloud-based data storage for **CMS** risk management workflows.
- Integrate **Python-based solutions** into existing healthcare systems to enhance data interoperability and accessibility for clinical teams and decision-makers.
- Utilized advanced **SQL** queries and **SAS** to extract key **CMS** data, boosting database efficiency by **25%** and reducing execution times in risk mitigation analysis.

Trigent Software, India

Data Analyst

Aug 2019 – Dec 2021

- Utilized **SQL** for querying and validating data, ensuring compliance with reporting standards..
- Implemented **SAS** for **data cleansing** and preparation, ensuring high data quality and integrity for complex datasets.
- Leveraged cloud technologies, including **Azure Data Factory** and **Databricks**, to orchestrate data workflows and manage large volumes of data effectively.
- Employed **SAS** in combination with **Python** and **SQL** to improve data accuracy by **25%** through rigorous validation processes.
- Created dynamic visualizations using **Tableau** and **Power BI**, effectively communicating complex findings derived from **SAS** analytics.
- Optimized data workflows using **SAS** and **SQL**, streamlining data processing and improving project efficiency by **20%**.

PROJECTS

US Digital Transformation.

- Conducted extensive research on digital transformation across 10+ US states, collecting diverse datasets.
- Leveraged **machine learning** for sentiment analysis, unveiling public perception of initiatives. Synthesized regression and sentiment findings to steer strategic decisions. **Weather Analysis.**
- Utilized a comprehensive dataset to scrutinize weather variables like humidity, wind speed, precipitation, and temperature. Leveraging **Power BI** for detailed insights.
- Harnessed Power BI's capabilities to predict weather conditions, extracting trends and future patterns from historical data. Implemented an **Entity-Relationship Diagram** (ERD) to unveil relationships and patterns influencing accurate weather forecasting.

Diabetes Predictive Model.

- Engineered sophisticated **logistic regression** and decision tree models to predict the probability of type 2 diabetes based on a designated dataset and Conducted an exhaustive analysis of independent factors within the dataset, identifying the most influential variables for predictive accuracy.
- Enhanced models by systematically evaluating variable weights and interaction effects, bolstering their predictive power.
- Employed advanced **data visualization** techniques to clarify intricate model findings, illustrating relationships between significant factors and the likelihood of diabetes. And translated complex model outcomes into accessible visuals, presenting a clear depiction of key factors contributing to the likelihood of type 2 diabetes, facilitating more informed decision-making.

EDUCATION

Texas A&M University, Commerce, TX

Jan 2022 - May 2023

Master's in Computer and Information Sciences

Jawaharlal Nehru Technological University, Hyderabad

Jun 2016 - May 2020

Bachelor of Electronics and Communication Engineering
