| <https://www.linkedin.com/in/grishma-tallapareddy-363882271/>

CAREER SUMMARY

Dedicated and curious **Information Science and Systems** graduated student from the University of North Texas. Detail-oriented and skilled in Python, SQL, and Microsoft Excel. Knowledgeable in data management, system analysis, and information system design. Hardworking, motivated learner with strong adaptability, problem-solving abilities, and effective teamwork skills. Passionate about leveraging technology to enhance business processes and support data-driven decision-making.

EDUCATION

University of North Texas | Denton, TX, Master of Science – Information Science and Systems – GPA 3.7–December 2024

Relevant Coursework: Data Analytics, Data Visualization, Data Modeling /Management, Information Security

Sree Vahini Institute of Engineering and Technology | Vijayawada, India, Bachelor of Technology – Computer Science and Engineering – GPA 3.20 May 2022

TECHNICAL SKILLS

Programming Languages: Python, R, SQL

Software: Tableau, Power BI, Replit, Google Cloud Platform

Database Management: MySQL, Microsoft SQL, Microsoft Access

Microsoft Office Suite: Excel, Outlook, PowerPoint, Project, Word

Machine Learning: Beautiful Soup, scikit-learn, Decision Tree

Data Analytics Algorithms: Linear Regression, K-Mean, KNN, Random Forest

CERTIFICATIONS

Python for Health Sciences and Healthcare November 2023

LINKEDIN SQL ESSENTIAL TRAINING December 2024

Tableau 2024.1: Essential Training January 2025

Python Essential Training February 2025

PROFESSIONAL EXPERIENCE

Junior Data Engineer, Infoneering Technologies | Hyderabad, India May 2021 – May 2022

- designed, implemented, and optimized data pipelines for processing and transforming large datasets using Python and SQL.
- Collaborated with cross-functional teams to understand data requirements and create scalable ETL workflows to meet business needs.
- Ensured data quality and integrity by developing automated data validation scripts and error-handling mechanisms.
- Contributed to data architecture decisions and integrated data from multiple sources into a unified repository.
- Participated in all stages of the data pipeline lifecycle, including coding, testing, deployment, and performance tuning.

PROJECT EXPERIENCE

Online Retail Store Database Design July 2023

- Independently Designed and developed a relational database system using MySQL Workbench to manage customers, orders, and products.
- Created SQL queries for efficient data retrieval, including order tracking, inventory management, and custom reports.
- Documented the entire project, including database design, business rules, and SQL scripts for seamless system integration.

Web Development Project: Information Security Website

November 2024

- Designed and implemented a PHP-based website featuring a CV page, contact forms, and a course reflection page.
- Created secure and user-friendly forms for "Contact Us" and "Mailing List Registration," ensuring proper validation and functionality.
- Utilized Repl.it for deployment, testing, and debugging, showcasing proficiency in handling real-time web development challenges.

Customer Churn Analysis and Prediction

December 2024

- Conducted **exploratory data analysis (EDA)** and built **machine learning models** (Gradient Boosting) to predict customer churn using the Bank Churners dataset.
- Created a **Tableau dashboard** to visualize key insights on churn trends by gender, income, education, and card type, aiding retention strategies.
- Improved predictive accuracy by optimizing data preprocessing, achieving high **precision and recall** reducing churn-related costs.
