

TAMAN VASUDEV GEDDAM

Data Engineer

Cincinnati, OH | +1 470-239-0001 | taman.g@it-jobmail.com

SUMMARY

- Around 3 years of professional Data Engineer experience in Big Data, **Hadoop** Ecosystem, Cloud Engineering, and Data Warehousing.
- Proficiency in different project management methodologies such as traditional **waterfall** and **agile**.
- I am well versed in Python to manipulate data for data loading and extraction and worked with Python libraries like **Matplotlib**, **ggplot2**, **NumPy**, **Scipy**, and **pandas** for data analysis.
- Strong expertise in building and optimizing data pipelines and **ETL** processes for managing financial datasets.
- Experience with cloud platforms (**AWS**, **Azure**), big data technologies (**Apache Spark**, **Hadoop**), and data warehousing solutions (e.g., **AWS Redshift**, **Google BigQuery**).
- Used **Power BI** for **10+** dashboards, cutting marketing expenses by 20% with trend analysis and pricing lists
- Optimized data integration workflows, enhancing quality and consistency with a **40%** reduction in load times.
- Implemented Hadoop ecosystem components (**HDFS**, **YARN**, **MapReduce**) for distributed data processing.
- Built and managed large-scale cloud data pipelines (**AWS**, **Azure**), reducing operational costs by **30%**.
- Excellent problem-solving skills and the ability to work in a fast-paced, collaborative environment.

SKILLS

Programming Languages: Python, SQL, Scala

Database Systems: SQL (MySQL, PostgreSQL), NoSQL (MongoDB, Cassandra)

ETL Tools: Apache Kafka, Talend, Informatica, SSAS, SSIS

Frameworks: Kafka, Airflow, Snowflake, Django, FastAPI, Flask

Data Warehousing: Amazon Redshift, Snowflake, Google BigQuery, Azure SQL Data Warehouse

Packages: NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, Seaborn, TensorFlow, PySpark

Big Data Technologies: Hadoop, Apache Spark, Apache HBase, Apache Hive

Cloud Platforms: AWS, GCP, Azure (Databricks, Microsoft Fabric, HDInsight, SQL DB), Google Cloud, Platform (Google Colab, Google Vertex AI), Azure Data Factory, Azure Synapse Analytics

Machine Learning: TensorFlow, scikit-learn, MLlib (Spark)

Version Control & Collab. Tools: Git, SVN, Jira, Confluence, Trello

Other Skills: Effective Communication, Documentation, Team Collaboration, Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving, Critical Thinking, Troubleshooting

EDUCATION

Master of Science in Information Technology

University of Cincinnati, Cincinnati, USA | May 2023

Bachelor of Technology in Electronics and communication Engineering

Rochester Institute of Lovely Professional University, Punjab, India | May 2021

PROFESSIONAL EXPERIENCE

PTC, MA | Data Engineer

Jan 2023 - Present

- I worked in **Agile** methodology environments and was involved in daily standup meetings to maintain project efficiency.
- Processed the Raw data from CSV files into organized form by applying **Data Cleaning** techniques using **pandas** and **NumPy** on **Python**.
- Created and maintained complex spreadsheets in Excel, utilizing advanced formulas, functions, and macros to automate data analysis and reporting processes.
- Involved in designing networking and cloud services **APIs** and leveraging **Spark (PySpark)** to manipulate unstructured data and apply text mining on user's table utilization data.
- Used **Spark API** over **Hadoop YARN** as an execution engine for data analytics using **Hive**.
- Integrated **Azure** Logic Apps and Azure Functions with **Azure** Monitor for real-time data pipeline monitoring and alerting, resulting in a **30%** improvement in issue resolution time.
- Scheduled workflows in **Apache Airflow**, ensuring seamless transformation and resolving **100%** issues checking **Airflow** tools, logs, and corrective actions
- Integrated **Tableau** with **Hadoop** data source for building a dashboard to provide various insights on the organization's sales.

- Implemented advanced procedures like text analytics and processing using in-memory computing capabilities like **Apache Spark** written in **Scala**.
- Integrated LLMs (e.g., GPT-3, BERT) into data workflows to enhance natural language processing (NLP) capabilities and automate data analysis tasks.
- Enhanced drug development with Snowflake stored procedure/views, optimize database performance by 25%.
- Implemented Python-based predictive analytics for a 30% improvement in clinical trial prediction accuracy and 15% optimization in vaccine supply chain planning.
- Developed predictive consumer demand models using machine-learning techniques, resulting in a 10% reduction in stock-outs and a 5% increase in inventory turnover.

SIGMA, Info Solution, India | Data Engineer

NOV 2019 - NOV 2021

- Implemented **waterfall** methodology for building an internal application and **SDLC** and defect lifecycle management.
- Performed **Data Analysis, Data Validation, Data Cleansing, Data Verification**, identifying data mismatches, Data Import, and Data Export using **Microsoft SQL Server Integration Services (SSIS)**.
- Performed analysis and interpretation of extensive and intricate datasets sourced from **Excel**, FLAT files, **JSON**, and **SQL Server**, leveraging **Python** programming.
- Collaborated closely with the product development team to execute **A/B testing** for new features. Conducted an in-depth analysis of customer feedback data to identify areas for enhancing the user experience.
- Involved in **Data Analysis**, Profiling, and Assessment to evaluate data for accuracy and quality using **NumPy**, and **Pandas** libraries.
- Engaged closely with clients to comprehend their specific data requirements.
- Developed tailored data models and dashboards utilizing **Power BI** and Excel tools to monitor and track key performance metrics.
- Well-versed in other visualization and analysis tools like **Matplotlib**, **Jupyter Notebooks**, **VLOOKUP**, and Standard Operating Procedures.
- Spearheaded the migration of legacy **ETL** processes to a server less architecture on **AWS Lambda**, resulting in a **40%** reduction in operational costs and a **50%** increase in scalability for data processing.
- Created Tableau dashboards for real-time patient demographics, boosting personalized medicine development and operational efficiency by 15%.
- Improved preparation for patient data analysis by 20% with Tableau Data Prep for efficient data modeling.
- Enhanced Tableau visuals through team collaboration for improved communication on patient analysis trends.
- Automated Tableau reports, reducing manual efforts by 40% for regulatory compliance & timely submissions.
- Spearheaded Excel market analysis, driving 15% market share growth through successful product launch.

CERTIFICATIONS

AWS Certified Developer - Associate.

Microsoft Certified: Azure Administrator Associate
