PROFESSIONAL SUMMARY

Dynamic Software Engineer with 7 months of hands-on experience building responsive, token-secured web applications using React and Node.js. Strong foundation in Python, algorithms, data structures, and SQL from an elite Ultra-Code program, enabling fast adoption of Django/Django REST and modern backend patterns. Proven ability to implement clean, stable UI/UX and integrate RESTful APIs for data-intensive workflows. Eager to contribute to a fast-paced fintech/wealth-tech environment by collaborating closely with product and founders to ship secure, investor-facing features.

TECHNICAL SKILLS

Web Development: React, HTML, CSS, Node.js, Angular; client-side state management.

Programming Languages: Python, Java, C#, SQL, JavaScript, Assembly.

Tools & Platforms: Git, GitHub, RESTful APIs, SQL-Server 2019, MongoDB.

CS & Math Foundations: Algorithms and graphs, discrete math, linear algebra, calculus, statistics and probability.

Systems: Operating systems, communication and networks, digital systems.

PROFESSIONAL EXPERIENCE

Software Engineer

Hitel Technology Ltd | 2024 - 2025

- Developed a secure online signature application using React and Node.js, ensuring high functional accuracy through robust token validation logic.
 - Delivered high-quality frontend components that successfully passed rigorous automated testing suites and cross-browser compatibility evaluations.
 - Improved application stability and significantly reduced client-side defects by resolving complex rendering issues identified during testing cycles.
 - Integrated RESTful APIs to facilitate reliable data communication, implementing efficient error-handling to manage various system states.
 - Collaborated on full-stack document workflows, maintaining version control best practices via Git and GitHub to ensure stable deployments.
-

RELEVANT PROJECTS

- React E-commerce Website: Developed a responsive client-side site with authentication, dynamic shopping cart, and admin management.
 - Java Hotel Management System: Built a 3-tier application focused on clean code principles and intuitive UI/UX design.
 - Airport Database (SQL): Created a comprehensive database including table creation and data entry using Java-integrated procedures.
 - Completed over 10 academic and personal projects as part of the software engineering program.
-

EDUCATION

Beit Bina Seminar | Software Engineer Program | 2022 - 2025

- GPA: 4.0
 - Ultra-Code Program: An elite program centered on algorithms, data structures, and mathematics.
 - Achieved examination success with honors.
 - Completed a rigorous curriculum equivalent to over 3 years of intensive computer science and mathematics training, including advanced topics in discrete math and statistics.
-

LANGUAGES

- English: Native.
- Hebrew: Native.
