PROFESSIONAL SUMMARY

A data analyst experienced in working with large and complex datasets using statistical analysis, data mining and data visualization to deliver actionable solutions that drive business growth. Passionate for creating data-driven stories and translating complex data into actionable insights.

TECHNICAL SKILLS

- Programming and Query Languages: C++, Python, Standard and Transact-SQL, DAX
- Python Packages: Numpy, Pandas, Scikit-learn, Keras, TensorFlow, NLTK, Matplotlib, Seaborn, Folium, statsmodels etc
- Stats and Experimentation: Descriptive and Inferential Statistics, Hypothesis Testing, Time-series Analysis and Forecasting (ARIMA, SARIMAX, Prophet), Data Mining
- Tools and Software(s): Microsoft Excel, Google Sheets, PostgreSQL, Google BigQuery, Google Colab, Tableau, PowerBI, Snowflake
- Machine / Deep Learning: Regression, k-means clustering, SVM, Decision Trees, Naive Bayes, LSTM, GRU, CNN
- Processes: Data Modeling, Database Normalization (1NF, 2NF and 3NF), ETL

WORK EXPERIENCE

Associate Data Analyst

Algorizin

10/2023 – present
New York, NY

- Utilized SQL & Power BI to gather, clean, and analyze datasets; formulated a content strategy resulting in an 18% increase in content engagement for social media platforms.
- Developed 5 dashboards and 2 data stories using Tableau and Power BI to interpret data, identify trends, and generate insights, contributing to an 8% improvement in customer retention rate.
- Conducted root cause analysis and formulated actionable recommendations, resulting in a 6% enhancement in customer satisfaction.
- Supported C-level executives by creating dashboards to replace ad-hoc analyses in reporting, reducing reporting time by 40%.

SELECTED PROJECTS

India's Crop Production Statistics Analysis

03/2023 – 04/2023

Analysis and forecasting of India's annual crop production data using data mining techniques.

- Analyzed over 300,000 rows; used Python packages (NumPy, Pandas, Matplotlib, Seaborn, Statsmodels, Scikit-learn, SciPy, folium, etc.) to clean, join, merge and analyze data, visualize insights, and answer project questions.
- Developed and tested project hypotheses (Regression).
- Applied Exploratory Data Analysis, Linear Regression, K-means Clustering, Time-Series Analysis, and Forecasting (ARIMA, SARIMAX, Prophet) to glean insights from project data and forecast values. [Tableau dashboard link](#)

Rockbuster Stealth Sales Data Analysis

12/2022 – 01/2023

Global sales and customer analysis for movie rentals using SQL queries.

- Used SQL queries (Complex Joins, Subqueries, Common Table Expressions, Aggregate Functions etc.) to answer business questions from 15 relational data tables and used Tableau to create an interactive dashboard.
- Analyzed and visualized Business KPIs; developed strategies to expand Rockbuster's global market and optimize ROI using data-driven decision-making. [Tableau dashboard link](#)

Preparing For Influenza Season

08/2022 – 11/2022

Identifying staffing needs across United States for upcoming Influenza season.

- Applied descriptive and inferential statistics (Z test, T test) on project variables; developed and tested project hypotheses.
- Transformed and integrated data from 5 different sources; cleaned and analyzed datasets and visualized insights using Microsoft Excel and Tableau to make an effective staffing distribution plan. [Tableau dashboard link](#)

EDUCATION

Data Analytics Bootcamp

07/2022 – 04/2023
Berlin, Germany

CareerFoundry GmbH

- Completed 5 projects involving ad-hoc and hypotheses-driven analysis; explored multiple datasets and case studies using Microsoft Excel, Statistical Analysis, Hypothesis Testing, SQL queries, Tableau, Python scripts and Data Mining to answer key business questions.

Bachelor's of Science in Computer Science and Engineering

01/2016 – 09/2021
Rajshahi, Bangladesh

Rajshahi University of Engineering & Technology

- Relevant Coursework: Numerical Methods, Vector Analysis and Linear Algebra, Database Systems, Data Mining, Artificial Intelligence, Neural Networks and Fuzzy Systems, Applied Statistics and Queuing Theory.
