

Summary:

Results-driven Data/Business Analyst with 4+ years of experience driving data-driven transformation in healthcare and legal tech, now targeting capital markets, fintech, and consulting sectors. Specializes in process optimization, predictive modeling, and automation to enhance decision-making and operational efficiency. Proficient in **SQL, Python, Tableau, Excel, Power BI, Alteryx**, and automation tools to build **ETL pipelines** and improve outcomes. Skilled in **Agile project management**, drafting **BRDs/FRDs**, and utilizing tools like **Jira** and **Trello** for workflow optimization and stakeholder collaboration.

Professional Summary:

- Experience in Information Technology, serving as a **Business Analyst, System Analyst, and Data Analyst** across diverse domains.
- Strong expertise in **statistical and quantitative analysis, predictive modeling, forecasting, hypothesis testing, data mining, data cleaning, data quality assessment, integration, validation, and data modeling.**
- Proficient in **SQL (MySQL, SQL Server, PL/SQL), Python (NumPy, pandas, scikit-learn), R (ggplot2, random Forest, dplyr), and Core Java** with hands-on experience in **web scraping, A/B testing, Google Analytics, and marketing analytics.**
- Advanced knowledge in **data visualization and BI tools** including **Tableau, Power BI, Excel/Google Sheets (pivot tables, pivot charts, macros, VLOOKUP)**, with ability to design interactive dashboards and executive reports.
- Expertise in **ETL/ELT workflows** using **SSIS, Azure Data Factory, and Alteryx**, integrating multi-source data (HL7/FHIR) and implementing **star/snowflake schemas** in **AWS (S3, Redshift)** and **Azure SQL** while ensuring **HIPAA/HITECH and CMS/HEDIS** compliance.
- Skilled in **enterprise data warehousing, dimensional data modeling (conceptual, logical, physical), FACT & dimension tables, ER diagrams, and tools like ER/Studio, Erwin, and Sybase Power Designer.**
- Delivered end-to-end **data analytics projects**, including requirement gathering, scope analysis, data modeling, algorithm design, reporting solutions, deployment, and production support.
- Strong background in **Agile and Waterfall SDLC methodologies**, with hands-on experience using **Jira, Confluence, GitHub, and Bugzilla** for project tracking, version control, and collaboration.
- Authored **BRDs, FRDs, SRS, user stories, and use cases**, and developed **UML/Visio process flows, system diagrams, and business workflows**; partnered with stakeholders to translate business questions into actionable analytics requirements.
- Developed and maintained **automated SQL/Python pipelines and semantic models** on SQL Server, PostgreSQL, and MySQL; implemented **DAX, row-level security, data-quality checks, documentation, and scheduled refreshes** for self-serve BI reporting.
- Recognized for being **detail-oriented with strong communication, problem-solving, and critical thinking skills**, and ability to work effectively with cross-functional teams in fast-paced environments.

Technical skills:

Programming Languages: SQL, Python, R, C, JavaScript, jQuery

Databases & Data Management: Oracle, SQL Server, MySQL, Teradata, PostgreSQL, MS Excel, RTM, Data Modelling

Data Analysis & Visualization: Power BI, Tableau, Matplotlib, Google Analytics, BI Tools, KPI Tracking, Data Analysis

Development Methodologies: SDLC, Agile, Scrum, Waterfall, Kanban, DevOps

Operating Systems: Windows, Linux (Ubuntu, CentOS)

Design & Documentation: UML, Visio, FRD, BRD, SRS, User Stories, Use Cases, Process Mapping, Prototyping

Project & Tracking Tools: JIRA, Rational ClearQuest, MS Project, MS SharePoint, Asana, Trello, Rally, SaaS

Cloud & Infrastructure: AWS, Azure, Linux System Admin, Puppet, Apache Tomcat, WebSphere

Messaging & Streaming: Apache Kafka, Apache Pulsar

Web & Integration: XML, HTML, JSON, Web Services

IDEs & Environments: Anaconda, Eclipse, NetBeans

ERP & CRM Platforms: SAP, MS Dynamics Nav, Salesforce, HubSpot

Testing & QA: UAT, Test Plans, QA Knowledge, Requirement Gathering, Software Development & Testing

Business Analysis & Strategy: Cost/Benefit, Impact, GAP, Risk, SWOT, UX, Product Mgmt, Acceptance Criteria, Business Objectives, Looker, MySQL, PostgreSQL, Radius, Slack, data analytics, key performance indicators, fraud detection

Soft Skills: Time Management, Leadership, Problem-Solving, Negotiation, Decision-Making, Communication, Sprint Planning, Stakeholder Management

Education:

- **Master of Science in Information Technology**, University of North Carolina at Charlotte, USA.

Professional experience:

Client: Cardinal Health, Dublin, Ohio

Aug 2024 - Present

Role: Data Analyst

Responsibilities:

- Mapped comprehensive patient journeys and clinical workflows using Kanban methodologies and MS Visio, identifying care pathway inefficiencies and engagement barriers to drive continuous improvement in value-based care models.
- Developed and automated ETL pipelines in Python, integrating HL7/FHIR-compliant healthcare data from multiple sources to support real-time analytics for patient interactions, care coordination, and clinical decision support systems (CDSS).
- Leveraged SQL, MS Excel, and MS XS to query, transform, and validate large-scale EHR, claims, and patient datasets, ensuring data accuracy, interoperability, and compliance with HIPAA and HITECH standards.
- Built interactive Power BI dashboards to track KPIs such as patient satisfaction, provider efficiency, CMS quality metrics, and HEDIS compliance, enabling healthcare leaders to make data-driven operational and clinical decisions.
- Authored SRS, BRDs, and FRDs to translate stakeholder requirements into technical deliverables; collaborated with cross-functional teams using Jira, Rally, and MS Project to prioritize sprint backlogs and support EHR enhancements and system integrations.
- Implemented HIPAA-compliant AWS data solutions using S3 and Redshift, and utilized Alteryx for predictive modeling, claims adjudication analytics, and operational reporting; also supported Salesforce Health Cloud integration to enhance PRM and omnichannel patient engagement.

Client: Docuswift, India

May 2022 - July 2023

Role: Business Analyst

Responsibilities:

- Conducted stakeholder analysis and legal workflow mapping using MS Visio to identify inefficiencies and bottlenecks, applying Agile methodologies to drive continuous improvement and iterative delivery of AI-driven legal solutions.
- Designed and implemented automated ETL pipelines in Python, integrating large-scale legal document datasets to support real-time analysis of user engagement, system performance, and predictive legal analytics.
- Leveraged SQL and Alteryx to query, transform, and analyze complex legal datasets, ensuring high data accuracy for AI model training and operational reporting; automated repetitive data tasks using Python and SQL, reducing manual effort by 25%.
- Developed interactive dashboards in Power BI, visualizing KPIs such as user engagement, system efficiency, and document processing accuracy to support data-driven decision-making across legal operations.
- Used UML methodology in creating UML Diagrams such as Use Cases, Sequence Diagrams, State Diagrams, activity Diagrams and business process, and workflows.
- Implemented AWS cloud infrastructure (S3, Redshift) to support scalable, secure, and compliant data warehousing solutions, ensuring high-performance access to both structured and unstructured legal data for analytics and reporting.
- Authored BRDs and FRDs, collaborated with cross-functional teams via Jira and Confluence, and supported integration of AI-powered tools (e.g., for document review and Performed gap analysis and root cause investigations using SQL and Alteryx, translating findings into actionable process improvement recommendations that reduced legal document processing time.

Client: Oval Softech, India

June 2021 - April 2022

Role: Data Analyst

Responsibilities:

- Created reusable ETL components, reducing data analysis time by one week, resulting in a 63% revenue increase and real-time visibility into 17 critical performance categories.
- Utilized Azure Data Factory pipeline to pull data from semi-structured data sources, including CSV and JSON files, both on-premises and in the cloud.
- Implemented Python and libraries such as NumPy, Pandas, and Matplotlib for efficient data analysis and visualization to inform data-driven decision-making.
- Visualized the model in Tableau to derive dependent variables and gain further insights on customer engagement, resulting in a 30 % increase in the digital platform traffic.
- Conducted in-depth requirements analysis for NextGen Health provider, utilizing tools like JIRA and Confluence and implemented data-driven solutions, leveraging SQL for database querying and reporting.
- Created, troubleshooted, managed, and deployed SSRS reports and created subscriptions for customers as required.
- Designed and developed complex SSIS packages to migrate data from multiple sources and Power BI to Azure Data Factory and Azure SQL databases.
