

Tarun Sai M
JAVA Developer

tarunsai1802@gmail.com | +1(202)-930-1188

PROFESSIONAL SUMMARY

- Around 5 years of Experience in Analysis, Design, Development, Implementation, and Maintenance of applications using Java/J2EE Technologies.
- Experience working with client-server applications using Java, Servlets, JSP, JDBC, Spring, and Hibernate.
- Expertise in Distributed and Web environments, focused on JAVA Technologies -Java collections, Threads, J2SE, JDBC, Struts, Spring, and Hibernate Framework.
- Experience in J2EE including JSP, Servlets, Hibernate, Spring IOC, MVC, and Spring Boot Framework for building client-server applications and used servers like Apache Tomcat and WebSphere.
- Extensive knowledge of XML-based standards and protocols (such as WSDL and SOAP), Service Oriented Architecture (SOA), development of XSD schemas, and implementation of both SOAP and REST web services.
- Experience in using DOM4J, JAXB, JAXP parsing, and XML Bean to process, validate, parse, and extract data from XML files.
- Experience with Adobe Experience Manager (AEM) for managing web content and digital assets.
- Developed and maintained server-side components for Workfront integrations and applications.
- Hands-on experience in integrating Hibernate with various Java frameworks such as Spring and Struts.
- Proficient in writing complex SQL queries and stored procedures to manipulate and analyze large datasets for various applications.
- Extensive experience in building and managing Java applications using Gradle and/or Maven.
- In-depth knowledge of Spring Framework and its components like IOC, AOP, and JDBC templates.
- Have a good understanding of microservices architecture applications using Spring Boot.
- Strong hands-on experience with Spring IO, and Spring Boot.
- Good knowledge of frontend JavaScript Libraries like React.js
- Knowledge of service-oriented architecture (SOA), workflows, and web services using XML Test Driven Development (TDD) Environment, SOAP, and RESTful web services.
- Expertise in unit testing the applications using Junit Framework, and Mockito and developed logging and standard mechanism based on Log4J, and SLF4j.
- Experience identifying the root cause, investigating, and providing a solution for escalated and critical production tickets.
- Build prototypes/proof of concepts during the design and development phases of the project to decide on potential solutions.
- Coordinating with onshore and offshore teams to ensure the smooth progress of project work
- Effective team player and self-motivated with high adaptability to new technologies.

TECHNICAL SKILLS

Java/J2EE	JDK, Core java, JDBC, Java API, Servlets, JSP, JDBC.
J2EE Frameworks	Struts, JSF, and Spring, Spring MVC, JPA/Hibernate, AJAX
Presentation/Web Technologies	React,JavaScript, HTML5, CSS3, JSON, XML, SOAP, RESTful, SOA
Application servers	IBM Web Sphere, JBoss, and Apache Tomcat 8,AEM Workfront
Design Patterns	DAO, MVC, Singleton, Session Façade, Service Locator
Languages	Java, PL/SQL
Databases	DB2, Oracle, MySQL, SQL Server, PL/SQL
Architectural Design	Design Patterns, Object Oriented Analysis, and Design Use Cases
Version Control	Bitbucket, GitHub
Build Tools	Maven, Jenkins
Testing Tools	JUnit, Mockito, Karate, Cucumber

PROFESSIONAL EXPERIENCE

Client: Pfizer HealthCare, Groton CT
Software Development Engineer

Jan 2023 - Present

Responsibilities:

- Involved in analysis, design, and developing microservices using Servlets, Java Beans, Hibernate, and Spring and doing enhancements and issues resolution.
- Extensively using Core Spring Framework for Dependency Injections of components and Spring JDBC for managing all the database communication and exception handling.
- Using Spring Boot for building cloud Microservices quickly and developing spring-based applications with very less configuration.
- Designed and developed REST APIs using Spring Boot and Java to interface with Workfront, ensuring seamless integration with other enterprise applications.
- Used Hibernate to create and manage database tables, indexes, and relationships.
- Implementing Multithread /Executor Thread to concurrent for distributed REST Services.
- Involving in writing Spring Configuration XML, a file that contains declarations and business classes are wired up to the frontend managed beans using Spring IOC pattern.
- Extensively working with collections classes like Array List, Hash Map, Iterator, concurrent, etc.
- Extensive experience in designing, implementing, and maintaining SQL databases using one or more of the popular relational database management systems (RDBMS) like Oracle, MySQL, PostgreSQL, or SQL Server.
- Using JIRA as a Change Management/ Work Management/ SCRUM Agile Tool.
- Writing automation test cases for rest APIs using karate framework and cucumber.
- Responsible for writing J2EE-compliant Java code for application development effort which involved working with JSP, JDBC, XML, Hibernate, Spring, etc.
- Using GitHub for Version Control.
- Designed and developed database objects like Stored Procedures, Functions, Triggers, PL/SQL packages, and Cursors for MySQL.
- Involved in writing Spring Configuration XML file that contains declarations and another dependent object declaration.
- User Service Now to track, update and do RCA for production issues.
- Developed and maintained AEM components and templates to manage web content and digital assets effectively.
- Worked on server-side components to integrate with Workfront APIs for task management, project tracking, and resource allocation.
- Ensured proper versioning and deployment of AEM packages using Maven and Jenkins.

Environment: Java 1.8, J2EE, Spring v3.x, Spring MVC, WebSphere, Hibernate v3.0, Oracle DB, Bootstrap, JavaScript, RAD, Tomcat, Maven, JIRA, SOAP/Restful Web Services, Postman, SOAP UI Pro, Jenkins, Service Now, Spring Based MicroServices, Agile, Karate Framework, Cucumber, Github,AEM,Workfront API

Client: Assurant , Miami FL
Software Developer Engineer

Jan 2022 – Dec 2022

Responsibilities:

- Involved in the complete Software Development Life Cycle including Requirement Analysis, Design, Implementation, Testing, and Maintenance of the project which was modeled using the waterfall model.
- Implemented SOAP messages for information exchange for Web services.
- Implemented the application using Struts Framework which is based on the Model View Controller design pattern.
- Worked on Core Java and its libraries in creating the Java/J2EE web application's business Logic.
- Used the various Complex data structures in collections Framework in Java/J2EE for building the Business Logic.
- Implemented JAVA/J2EE design patterns such as Factory, Template, MVC, and Singleton.

- Developed presentation layer using JSP, HTML, DHTML, CSS, AJAX, JavaScript, and JSTL Taglibs.
- Implemented Java and J2EE Design Patterns such as Command, State, Template, Composite, Strategy, and Observer.
- Responsible for implementing the business requirements using Spring Core, Spring MVC, Spring Boot, Spring Data, and Spring Security.
- Implemented business processes, database retrievals, and access to information using Java and Spring Core, Spring MVC, Spring DAO, and Spring Security framework.
- Extensive experience in developing RESTful web services using SpringBoot with various data formats like JSON and XML.
- Implemented the application using Spring MVC Framework and handled the authentication, authorization, and access-control features by using Spring Security.
- Worked on consuming and producing SOAP and REST web services.
- Implemented role-based authentication and authorization using Spring security.
- Expertise in using source code control systems such as GIT, JIRA, and Jenkins for maintaining versions across various releases.
- Maintain the code base by frequent updates to revision using the GIT version control system.
- Implemented custom reporting solutions using Workfront's reporting API to provide insights into project metrics and performance.
- Developed and maintained Workfront components and templates to manage web content and digital assets effectively.

Environment: Core Java, J2EE Spring, Springboot, Microservices, Hibernate, Struts, Oracle, Web Sphere, Servlet, JSP, Eclipse, GIT, SOAP, REST, Workfront

Client: Cap GoldIndia , Hyderabad India

July 2019 – July 2021

Java Developer

Responsibilities:

- Designed and implemented the User Interface using JavaScript, HTML, XHTML, XML, CSS, JSP, and AJAX.
- Used Spring JDBC to execute database queries. Created row mappers and query classes for DB operations.
- Used Spring framework for Dependency Injection and JDBC connectivity.
- Developed RESTful Web services client to consume JSON messages using Spring JMS configuration. Developed the message listener code.
- Integrated SpringBoot applications with various third-party services.
- Design HTML prototypes, visual interfaces, and interaction of Web-based design.
- Involved in the development of custom Servlet handling HTTP request and response objects.
- Create JSP pages for the Customer module of the application. Coded a JS util file for commonly used JS validation.
- integrated Gradle and/or Maven with Continuous Integration (CI) tools such as Jenkins, Travis CI, or GitLab CI/CD.
- Responsible for coding, testing, and documenting various packages, procedures, and functions for libraries, also used JUnit for unit testing and Mockito for mock-based testing.
- Designed and implemented a solution for modular JavaScript for the application using vanilla JavaScript and namespacing.
- Used SQL tuning techniques to optimize queries and improve database performance.
- Designed and implemented database schema, tables, indexes, views, and triggers to optimize performance and maintain data integrity.
- Involved in debugging and troubleshooting code issues during the testing phase.
- Actively involved in code review, performance tuning, and bug-fixing phases.
- Good team player with the ability to solve complex issues. Initiated team discussions to improve the efficiency of the system.
- Used Maven as the build tool and Tortoise SVN as the Source version controller.
- Involved in the deployment of the application in the Integration and Implementation environment.
- Used Subversion (SVN) as the configuration management tool to manage the code repository.

Environment: Core Java, UNIX, J2EE, XML Schemas, XML, JavaScript, JSON, CSS3, HTML5, Angular JS, Hibernate, Design Patterns, Struts, EJB, Servlets, Vanilla JavaScript, JUnit, JMS, MySQL, REST, Maven, Web Services, Apache Tomcat
