Summary

Software developer with 2 years of experience designing and implementing front-end applications using JavaScript, React, and Angular. Skilled in developing cross-browser, high-performance interfaces integrated with Java and Spring Boot services. Proven expertise in translating UI/UX designs into responsive solutions and collaborating across teams to ensure quality and scalability. Experienced in Agile environments, performance tuning, and software testing. Passionate about delivering secure, efficient, and user-centered applications that align with business goals.

Work Experience

Infosys

May 2022 - Aug 2022

System Engineer (Full Stack Java Training)

Hyderabad, India

- Completed immersive training in full-stack software development, gaining hands-on expertise in Java, Spring Boot, AngularJS, SQL Server, PostgreSQL, and REST API design within an Agile SDLC.
- Designed and implemented simulated enterprise applications by integrating AngularJS front-end components with Spring Boot back-end services, ensuring cross-browser compatibility and performance tuning.
- Conducted debugging, unit testing, and code reviews, ensuring compliance with coding best practices and reducing production-level errors by 20%.
- Deployed applications to AWS Cloud environments using Docker containers and Git for version control, streamlining CI/CD pipelines for faster releases.
- Collaborated with business teams for requirement gathering and user acceptance testing, ensuring successful software release certification.
- Optimized UI rendering and API response times using JavaScript and asynchronous data handling, improving application responsiveness by 25%.

JSpiders

Sep 2022 - May 2023

Full Stack Developer Trainee

Hyderabad, India

- Designed and developed multiple full-stack projects, including an e-commerce web platform using React.js, AngularJS, and TypeScript with PostgreSQL and NoSQL databases, ensuring responsive design for over 1,000 simulated users.
- Built and integrated RESTful APIs with front-end components, enhancing user experience and ensuring cross-browser compatibility for seamless data interaction.
- Applied object-oriented programming and microservices architecture principles to improve modularity, scalability, and maintainability of applications.
- Collaborated in Agile sprints with cross-functional teams, conducted peer code reviews, and produced detailed technical documentation to support design enhancements and post-release certification.
- Utilized Git, Jenkins, and Docker in development projects, optimizing the development cycle efficiency by 30%.
- Worked closely with performance and browser testing teams to fine-tune UI rendering and reduce page load times by 20%.
- Developed reusable components adhering to style guides and best practices, improving maintainability and design consistency across modules.

Indus Technology

Mar 2025 - Jun 2025

SAP ABAP Developer Intern

Remote

- Developed and enhanced SAP ABAP RICEF objects including reports, SmartForms, ALV, BAPIs, and custom ECC enhancements for SAP MM and SD modules, aligning solutions with business processes.
- Created Core Data Services (CDS) Views for real-time analytics and exposed them via OData to SAP Fiori applications, empowering end-users with live procurement dashboards.
- Automated vendor master data uploads and purchase order creation using BDC and EDI, reducing procurement cycle time by 25%.
- Collaborated with SAP functional consultants and business users to gather requirements, prepare technical specifications, and deliver business-focused ABAP solutions.
- Conducted unit testing, troubleshooting, and performance tuning of ABAP programs, reducing system errors and improving report performance by 15%.

Education

Indiana Institute of Technology, Fort Wayne, IN (USA)

Jan 2024 - May 2025

M.S., Information Systems

- GPA:** 3.70/4.00
- Coursework:** Database Management Systems, Enterprise Resource Planning (ERP), Information Security, Data Communication & Visualization, IT Governance, Systems Analysis & Design, Digital Enterprise Systems, Project & Risk Management, Data Structures, Algorithms, System Design

- **GPA:** 8.0/10.0
- **Coursework:** Data Structures, DBMS, Networks & Communication, IT Governance, Web Technologies, Cybersecurity Basics

Projects

Insurance Claims Management Portal

- Designed and developed secure RESTful APIs with JWT authentication and role-based access control, ensuring compliance with security standards.
- Integrated the back-end APIs with a responsive React.js front-end, which reduced manual review time for claims processing by 40%.
- Implemented a microservices-based architecture and deployed the solution to AWS using Docker containers, ensuring scalability and high availability.

SAP S/4HANA Procurement Automation

- Automated procurement workflows by creating ABAP enhancements, BDC programs, and SmartForms to streamline PR/PO creation and vendor master uploads.
- Integrated web services and EDI processes with SAP MM, reducing procurement cycle times by 25% and improving supplier onboarding efficiency.
- Created CDS Views for real-time analytics and exposed them to Fiori applications, enabling business stakeholders to access live procurement insights.

Smart Finance Management System

- Built a financial management platform that allowed users to set budgets, manage savings, and track expenses with secure authentication.
- Applied a machine learning forecasting model for spend prediction, improving financial planning accuracy by 30%.
- Developed modular APIs and integrated with a React-based front-end, providing a seamless user experience.

The Aroma Web App

- Built a responsive food-ordering and menu management application with Supabase as the backend for authentication and data storage.
- Applied modern state management and ESLint code checks, which improved maintainability and reduced bugs in production.

Greenfoot OOP Game

- Designed a 2D arcade-style game by applying OOP principles including inheritance, polymorphism, and encapsulation.
- Implemented scoring systems, collision detection, and iterative improvements that enhanced gameplay and performance.

IoT-based Accident Prevention System (Academic)

- Developed an IoT prototype for accident prevention using drowsiness detection and collision sensors integrated into a microcontroller.
- Built real-time cloud monitoring dashboards for tracking alerts, which improved driver response efficiency by 30%.

Technical Skills

- **Languages:** Java, Python, C++, JavaScript, TypeScript, SQL
- **Frontend:** React.js, Angular, HTML5, CSS3, Responsive Web Design, Tailwind, SAP Fiori/UI5
- **Backend:** Spring Boot, Node.js, Express, Java MVC, REST APIs, Microservices
- **Databases:** PostgreSQL, MySQL, SQL Server, MongoDB, NOSQL
- **SAP:** ABAP Reports, SmartForms, ALV, BAPI, BDC, CDS Views, ECC/MM/SD
- **Cloud/DevOps:** AWS, Azure, Docker, Jenkins, Git, GitHub, Azure DevOps
- **Analytics:** Power BI, Tableau, Excel (Advanced)

Certifications

- **SAP S/4HANA ABAP Development:**2025
- **Java Full Stack Development:**2023
- **AWS Educate Cloud Foundations:**2025
- **Deloitte Data Analytics Job Simulation:**2025
- **SAP Technical Consulting Job Simulation:**2025
- **SAP Certified Associate- Back-End Developer- ABAP Cloud (C ABAPD):**2025
