

# TARUN SAI CHOWDARY SUNKARA

Fairfax, Virginia | +1 (571) 762-2776 | [tarun.s@nextitjobs.com](mailto:tarun.s@nextitjobs.com) | [LinkedIn](#)

## SUMMARY

An Experienced Data Analyst with 4+ years of expertise in data integration, ETL pipelines, and advanced analytics. Proficient in Python, SQL, Snowflake, and Power BI for real-time insights and operational efficiency. Skilled in cloud platforms AWS, Azure and machine learning to drive business growth and ensure compliance. Proven ability to streamline workflows and deliver data-driven solutions aligned with organizational goals.

## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                               |

| <ul style="list-style-type: none"><li>Designed and implemented <b>ETL</b> workflows to centralize diverse data sources, automating data integration and reducing manual interventions by 30%, leveraging Snowflake for scalable data warehousing.</li><li>Optimized <b>SQL</b> queries and enhanced database performance, reducing query execution times by 20% for datasets exceeding 1.5 Tera Byte monthly, supporting data analytics initiatives in the cannabis industry.</li><li>Developed predictive analytics models using <b>Python</b> and <b>Scikit-learn</b>, achieving a 25% improvement in forecasting accuracy for customer behavior and market trends, with actionable insights for business growth.</li><li>Created interactive <b>Power BI</b> dashboards and <b>Microsoft Excel</b> reports, providing real-time analytics to over 10 cross-functional teams, reducing decision-making time by 20% and improving operational efficiency by 15%.</li><li>Migrated data pipelines to <b>AWS</b> cloud infrastructure and integrated <b>Snowflake</b>, supporting a 50% annual increase in data volume while maintaining 99.9% system uptime.</li><li>Applied strong <b>analytical and problem-solving</b> skills to address data quality issues, implementing validation processes that improved data accuracy by 35% and ensured compliance with <b>GDPR</b>.</li><li>Managed projects effectively by collaborating with cross-functional teams, meeting deadlines within a six-month timeline, and delivering tailored analytics solutions that supported a 40% increase in report usability.</li><li>Delivered stakeholder updates on project progress, insights, and data visualization tools, aligning <b>data analytics</b> strategies with operational goals in the eCommerce and cannabis sectors.</li><li>Conducted deep-dive analytics into sales and operational data, uncovering key trends that boosted revenue by 12% through improved targeting and marketing strategies.</li><li>Enhanced project management outcomes by streamlining workflows with <b>Agile methodologies</b>, achieving a 25% reduction in project delivery timelines and increasing team efficiency.</li></ul> |                                               |

## TECHNICAL SKILLS

|                                        |                                                                                                           |
|----------------------------------------|-----------------------------------------------------------------------------------------------------------|
| <b>Programming Languages</b>           | Python, R, SQL, SAS                                                                                       |
| <b>Methodologies</b>                   | Agile, Waterfall, SDLC                                                                                    |
| <b>Data Analysis &amp; Statistical</b> | Descriptive & Inferential Statistics, Regression Analysis, Hypothesis & A/B Testing, Statistical Modeling |
| <b>Data Visualization</b>              | Tableau, Power BI, Excel (Pivot Tables, VLOOKUP, Macros), Python (Matplotlib, Seaborn), ggplot2           |
| <b>Machine Learning &amp; Modeling</b> | Linear & Logistic Regression, Clustering, Decision Trees, Random Forests, Time Series Analysis            |
| <b>ETL &amp; Data Engineering</b>      | SQL, Snowflake, DBT, Alteryx, Informatica, Apache Airflow                                                 |
| <b>Databases</b>                       | MySQL, PostgreSQL, Oracle, MongoDB, Amazon RDS, Snowflake                                                 |
| <b>Big Data &amp; Cloud Platforms</b>  | AWS (EC2, S3, Redshift, Athena, Glue), Azure (Data Factory, Synapse), GCP (Big Query), Databricks         |
| <b>Data Wrangling &amp; Management</b> | Data Cleaning, Data Transformation, Data Integration, Data Warehousing                                    |
| <b>Version Control</b>                 | Git, GitHub, GitLab                                                                                       |
| <b>Soft Skills</b>                     | Problem-Solving, Communication, Collaboration, Time Management                                            |
