EDUCATION

The University of Massachusetts Lowell <i>Master of Science, Computer Science</i>	May 2025 GPA 3.7/4
Acharya Nagarjuna University, Andhra Pradesh, India <i>Bachelor of Science, Computer Science</i>	June 2022 GPA 3.6/4

SKILLS

Programming Languages: C, C++, Python, Java, JavaScript, TypeScript
Frameworks & Tools: React, Node.js, Angular, Flask, TensorFlow, PyTorch, Bootstrap
Databases: SQL, MySQL, MongoDB
Libraries: OpenCV, Scikit-learn, Pandas, Numpy, Matplotlib
Cloud Platforms: Microsoft Azure, Amazon Web Services(AWS)
Operating Systems: macOS, Linux, Windows

ORGANIZATION EXPERIENCE

Code The Dream, Durham, North Carolina, USA <i>Full Stack Mentor</i>	07/2025 - 10/2025
- Guided over 4 students through full-stack development projects, improving their technical proficiency in React, Node.js, and MongoDB. - Provided detailed feedback on 100+ code reviews and assignments, increasing student’s understanding of key programming concepts by 30%. - Organized 3 community showcase events, promoting student engagement and collaboration while highlighting their completed projects. - Mentored students on professional growth topics including communication, teamwork, and goal setting, resulting in improved project presentation skills and confidence.	

ACADEMIC PROJECT EXPERIENCE

Home Security System using Radar & Machine Learning, Internet of Things	09/2023-12/2023
- Build a motion-detection security system using radar sensors and a TensorFlow-based model to identify human presence. - Developed a logging and data processing pipeline that captured and analyzed over 100 motions events for accuracy testing. - Achieved a 92% model accuracy in classifying instructions through feature extraction and model optimization.	
Automotive Service Web Application, Amazon Web Services(AWS)	09/2024-12/2024
- Designed and implemented a customer-facing portal featuring real-time booking, service tracking, and an admin dashboard. - Optimized backend performance and implemented lazy loading to achieve 80% fast load times. - Integrated email notification and responsive UI design to enhance cross-device user experience.	
Urban Platter – Community Urban Gardening Platform, Human Computer Interaction (HCI)	04/2023 - 07/2023
Developed a full-stack web platform for urban residents to book garden plots, join workshops, and access virtual gardening support; integrated role-based access control and secure forms to ensure data privacy, collaborating with stakeholders to streamline data flow and boost user retention by 20%.
