PROFESSIONAL SUMMARY

Recent graduate and multi-faceted software developer with strong focus on JAVA and android development. An entry level developer with a positive, constructive, can-do attitude and 8 months experience in software development.

SUMMARY OF SKILLS

Programming Languages	:	Java 8, C++, Python, PHP, Node.js
Database	:	MySQL, MongoDB, XML, JSON, RDBMS, Firebase
Web Technologies	:	HTML5, CSS3, Java Script, AngularJS, React, jQuery, Bootstrap, Spring MVC, WordPress
Mobile	:	Android Application Development
Web Services	:	Amazon Web Services
Tools	:	github, Jenkins, JIRA, Apache/Tomcat
Automation Processes	:	Unit Testing, Continuous Integration

EDUCATION

Master of Science in Computer Science | California State Polytechnic University, Pomona | GPA: 3.88 **Sep 2016 – June 2018**

Relevant Courses: Advanced Software Engineering, Human Computer Interaction, Advanced Algorithm Design & Analysis

Bachelor of Engineering in computer science | RGPV, Institute of Professional Studies, Indore, India | GPA: 3.8 **Sep 2012 – June 2016**

Relevant Courses: Operating Systems, Object Oriented Technology, Analysis and Design of Algorithms, Data Structures

PROFESSIONAL EXPERIENCE

Outreach Department, California State Polytechnic University Pomona | Database Supporter | Pomona, California **Jan 2018 – June 2018**

- Maintained existing web pages and UI components organizing tours, event and counselling for students.
- Used WordPress as CMS and PHP for backend and ensured continuous improvements by debugging previous faults.
- Redesigned web pages to optimize number of clicks from 3 to 1 for users to carry out their operations.

Khana | <https://play.google.com/store/apps/details?id=get.homemade.khana.khana> | Android Developer **March 2018 – June 2018**

- Designed and developed an android application for online marketplace for homemade food.
- Participated proactively in complete software development lifecycle from requirement gathering to publishing.
- Implemented Google Maps API to locate the food nearby in real-time to current user within 30 miles of radius

Kiranaa | <https://github.com/CS575DatabaseProject/Kiranaa> | Android Developer **Jan 2018 – March 2018**

- Developed a real-time android application with noSQL database technology firebase prototype for e-groceries.
- Worked in agile environment leading a highly effective team of 4 developers to achieve the final product.

ArtBase gallery | <https://github.com/Database565/phpMysql> | SQL Developer **Jan 2018 – March 2018**

- Educational project to develop an SQL schema captures all the information that galleries need to maintain.
- Implemented the schema in MySQL instance performing different CRUD operations.

Rapidly Inc. | Full Stack Developer | Summer Internship | San Francisco **June 2017 – Aug 2017**

- Designed, developed and deployed responsive loan servicing software in MEAN stack technology.
- Reported directly to Chief Executive Officer of the company to carry out daily operations.
- Recommended programmable solutions adhere to company standards to solve business challenges which resulted in growth of customer base by 5%.
- Worked under general supervision and ensured on-time delivery of assignment.
- Participated in full software configuration release cycle from design through development to deployment.
- Established compatibility with 3rd party API provided by plaid to authorize bank account and payments.

Movie+ | <https://play.google.com/store/apps/details?id=com.hstmvtdj.hardeepsingh.recommender> | Android Developer **March 2017 – June 2017**

- Designed and developed an android application in agile environment for movie recommendation for users.
- Integrated the Moviedb and IMDB APIs to get the movie information and ratings.
- Suggested and successfully implemented new idea to provide ratings and information for new released movies.

Quick Rent | <https://github.com/Brogramerrr/QuickRent> | Software Engineer **Jan 2017 – March 2017**

- Developed and deployed a responsive RESTful E-portal web application for renting using MEAN stack technology and MVC design pattern.
- Published the application to AWS using EC2 instance by continuous integration using TravisCI.
- Worked with an agile team of 3 to develop the complete software.

Sunrays Technology | Industrial Training | JAVA Trainee | Institute of professional studies | India **June 2015 – July 2015**

- Completed training on Core JAVA Advance and OOP implementing concepts and achieved an A+ certificate.

CERTIFICATIONS & SCHOLARSHIPS

- Achieved Microsoft Technology Associate (MTA) badge for database fundamentals certification in SQL.
- Awarded with Vice Chancellor Scholarship for outstanding academic GPA of 8.9 of 10.
