

Tasneem Bhagat

tbbhagat@wpi.edu | +1-781-518-3160 | [LinkedIn](#) | Boston, MA

EDUCATION

Worcester Polytechnic Institute, Worcester, USA

January 2023 – December 2024

MS in Business Analytics (GPA 3.8)

University of Mumbai, Mumbai, India

June 2009 – March 2011

MSc. Bioanalytical Science

TECHNICAL SKILLS

- **BI tools:** Tableau, Power BI, Microsoft Azure ML.
- **Programming and Database:** Python (data scraping, data analysis, feature engineering), SQL (complex queries, data extraction), Excel (pivot tables, reporting)
- **Statistical Analysis:** A/B testing, Pandas, Seaborn, Logistic Regression, coefficient of correlation, Standard deviation
- **Data Management and Project tools:** ETL processes, cloud-based ERP systems, JIRA, Confluence

RELEVANT PROFESSIONAL EXPERIENCE

Business Analyst Intern | Moylings, MA

September 2024 – December 2024

- Conducted competitor analysis and market research to identify pricing trends, driving strategic adjustments for optimal profitability at the Snowport Market stall
- Analyzed inventory and sales trends data to resolve overstocking and storage challenges, optimizing material placement and ensuring cost-effective operations.
- Curated Instagram content by analyzing consumer sentiment, refining strategies and keyword targeting, and increasing engagement and follower count by 8%.
- Refined the website layout and navigation using user feedback surveys and Google Analytics to enhance user experience.

Graduate Research Assistant | Worcester Polytechnic Institute, MA

March 2023 – August 2024

- Conducted statistical analysis on ED arrival data for three hospitals, revealing 88.34% of University patients had a LOS under 1 day, indicating efficient patient flow.
- Leveraged SQL to analyze patient metrics, identifying average wait times and inefficiencies across hospitals.
- Developed Tableau dashboards to visualize ED wait times by patient risk levels, giving insights to improve care processes.

Data Analyst | K12 Techno Services – Mumbai, India

June 2022 – December 2022

- Streamlined student enrollment and performance pipelines by extracting and cleaning data with SQL, enabling faster data retrieval for academic planning.
- Generated Power BI reports, identifying revenue enhancement opportunities for 14 area managers.
- Enhanced the enrollment predictive model by performing feature engineering with Python, creating heatmaps to identify correlations, and applying logistic regression analysis to eliminate insignificant data, achieving 80.6% accuracy.

Business Analyst | Sarsan Oilfields Supply Centre – Dubai, UAE

January 2017 – January 2022

- Leveraged the cloud-based ERP 'Focus', to oversee ETL processes from databases streamlining operations and supply chain workflows, resulting in a 10% reduction in annual costs.
- Designed roadmaps and applied the built-in reporting tools of the ERP to present KPI's to stakeholders.
- Led a \$1M carbon steel pipe delivery project, mitigating risks through scenario analysis and checklists.
- Ran A/B tests on pricing strategies, optimizing supplier negotiations through historical performance data, resulting in a 10% reduction in material costs while maintaining accurate data for over 100 suppliers.
- Partnered with sales and finance to align cost effective offerings with customer needs which reduced churn rate by 5%.

PROJECTS

- 1) **Fraud Detection Modeling:** (Machine Learning Project: August 2023- December 2023)
Analyzed a 6 million record dataset for fraud transactions with Python, used SMOTE for data balancing, deployed it for machine learning with Azure ML and DataRobot achieving 53% accuracy.
- 2) **CDC Health Dashboard** (Business Intelligence Project: August 2023- December 2024)
Prepared a snowflake for CDC's large-scale data collection and processing and developed an interactive BI dashboard to monitor health trends and aggregate data by geographic variations.
