

TEJA BASI | Full Stack Developer

MS | +1 (312)-678-3242 | reddyteja212@gmail.com | [LinkedIn](#)

SUMMARY

Full Stack Developer with 3+ years of experience designing, developing, and deploying scalable, secure, and cloud-native web applications across enterprise, IoT, and asset recovery domains. Proficient in Java (Spring Boot, Hibernate) and JavaScript frameworks (React.js, Vue.js, Node.js) with deep understanding of microservices, RESTful APIs, and CI/CD automation. Experienced in cloud deployment (AWS, Azure, Docker, Terraform) and security (OAuth 2.0, JWT, Spring Security). Adept at collaborating in Agile environments, optimizing system performance, and delivering production-ready, testable code aligned with business goals and user needs.

EXPERIENCE

CISCO SYSTEMS | MS, USA

Feb 2025 – Present

Full Stack Developer

- Designed and implemented a microservices-based orchestration platform for Cisco IoT edge devices using Node.js (Express.js) and React.js, improving modular scalability and system uptime to 99.9%.
- Engineered and secured RESTful APIs with MongoDB Atlas, enabling 30% faster provisioning of 5,000+ edge routers and switches.
- Developed real-time dashboards using React.js, Redux Toolkit, and Tailwind CSS, improving visibility of device performance across distributed networks.
- Integrated OAuth 2.0 and Azure Active Directory, reducing unauthorized access by 45%.
- Deployed containerized services to AWS ECS using GitHub Actions and Terraform, ensuring zero-downtime deployments.
- Implemented RabbitMQ and Socket.IO for asynchronous telemetry, enhancing anomaly detection by 40%.
- Enhanced observability using ELK Stack and Prometheus–Grafana, reducing incident response time by 25%.
- Authored Swagger/OpenAPI documentation and onboarding guides, reducing new engineer ramp-up time by 50%.

Full Stack Developer Intern (Feb 2025 – May 2025)

- Built an internal network configuration drift dashboard using Vue.js and Flask, adopted by QA and DevOps teams to identify configuration mismatches during integration testing.
- Developed Flask REST APIs integrated with PostgreSQL, reducing root-cause analysis time by 20%.
- Automated configuration-log ingestion with Python Cron Jobs, SCP, and SSH, reducing manual tracking efforts by 60%.
- Implemented JWT-based RBAC for secure access control, ensuring compliance with internal testing standards.
- Delivered live demos and technical documentation that led to full-time adoption by internal NetOps teams.

GENIUS SOFTTECH | INDIA

Jun 2020 – Jul 2023

Full Stack Developer

- Developed a multi-tiered asset tracking system using Java 17, Spring Boot, and Thymeleaf, improving operational visibility across multiple warehouses.
- Built Spring Boot REST APIs and Hibernate ORM integrations for CRUD operations on assets and repair logs, delivering 40% faster performance.
- Designed responsive UIs using HTML5, Thymeleaf, and Alpine.js, optimized for warehouse kiosks.
- Configured Quartz Scheduler to automate ticket escalations and status checks, reducing manual interventions by 65%.
- Integrated Spring Security + JWT for role-based access aligned with GDPR compliance.
- Developed reusable UI components and interactive dashboards using Angular 14 and TypeScript, improving front-end performance and maintainability by 25%.
- Created MySQL 8 stored procedures and JPQL queries for complex reporting, improving query speed by 25%.
- Automated PDF report generation using Apache PDFBox, enabling vendors to download digital receipts instantly.
- Deployed solutions on both Azure App Services (Dockerized) and Apache Tomcat (on-prem), providing flexible deployment models for clients.

TECHNICAL SKILLS

Languages & Frameworks: Java 17, Kotlin, C++, C#, Spring Boot, Hibernate, Node.js, Express.js, ASP.NET, Flask, Python, JavaScript, TypeScript, Angular (8–19), React.js, Vue.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Thymeleaf, Alpine.js

Databases & APIs: MongoDB Atlas, MySQL 8, PostgreSQL, Oracle 12c/19c, Snowflake, SQL Server Management Studio (SSMS), JPQL, Stored Procedures, PL/SQL, REST APIs, Swagger/OpenAPI, RabbitMQ, Kafka, Socket.IO

Security & Authentication: Spring Security, OAuth 2.0, JWT, Azure Active Directory, Role-Based Access Control (RBAC)

Cloud & DevOps: AWS (ECS, Lambda, S3), Azure (App Services, AD), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, Apache Tomcat, Quartz Scheduler, Cron Jobs, Git, Bitbucket

Monitoring & Testing: ELK Stack (Elasticsearch, Logstash, Kibana), Prometheus, Grafana, Apache PDFBox, Postman, JUnit, Jest, Mocha, Selenium

Development Tools & IDEs: Visual Studio, Visual Studio Code (VS Code), IntelliJ IDEA, Eclipse, GitHub Desktop, Jira, Confluence

Development Practices: Microservices Architecture, MVC Pattern, Agile/Scrum, Sprint Planning, Code Reviews, CI/CD Pipelines, Issue Tracking (Jira), Cross-Functional Collaboration

EDUCATION

Master of Science in Information Technology Belhaven University, MS	Apr 2025
Bachelor of Technology in Engineering Gouthami Institute of Technology and Management for women, India	Jun 2022
