Education

Lindsey Wilson College

Masters in Computer/Information Technology Administration and Management

Aug. 2023 – May 2025

Columbia, Kentucky

Relevant Coursework

- Data Structures
- Applied Statistics
- Artificial Intelligence
- Database Management
- Python
- Java
- Project management
- Cyber Security

Experience

Team Tech Solutions

June 2020 – June 2023

Data Analyst

Hyderabad, Telangana

- Extracted employee performance data from internal HR systems using SQL to create structured datasets for analysis and reporting, enhancing data accessibility for performance reviews.
- Cleaned and transformed raw data using Python scripts to ensure data was ready for detailed analysis and reporting.
- Developed interactive Power BI dashboards, visualizing key performance indicators (KPIs) and employee performance metrics, enabling HR managers and leadership teams to make data-driven decisions.
- Automated SQL-based reports to track employee performance metrics, reducing manual reporting work by 30% and improving the timeliness of insights shared across teams and provided actionable insights that improved employee performance reviews and strategic decisions.

Projects

Building Spotify Data Pipeline | *Airflow, Apache Spark, Amazon S3, Snowflake, Power BI*

January 2024

- To build a scalable pipeline to extract data from Spotify API, transform using AWS services, and load into Snowflake for analytics and Power BI for reporting.
- Created an Airflow DAG to manage data extraction from Spotify API and log metrics into AWS CloudWatch.
- Transformed data with AWS Lambda and Apache Spark (PySpark), improving processing speed by 40% and transformed data into Snowflake via Snowpipe, optimized SQL queries, and built Power BI dashboards for visualization.
- Reduced ETL processing time by 45 percent and enhanced reporting efficiency by 55 percent.

E-commerce Data Pipeline using Databricks | *Azure Data Lake, Apache Spark, Power BI, Pyspark*

May 2024

- To develop an end-to-end data pipeline to ingest raw data into Azure Data Lake Storage, transform it using Apache Spark on Databricks, and create interactive dashboards in Power BI to efficiently process and analyze the data.
- Set up an automated mechanism to Upload raw data files into Azure Data Lake Storage, ensuring data is available for processing and used Apache Spark on Databricks to clean, join, and structure the raw data for analysis.
- Achieved 30% faster data processing by utilizing Apache Spark, Databricks, enabling better insights into e-commerce trends.

Employee Performance Analysis | *SQL, Power BI, Python,HTML*

October 2022

- Develop a streamlined system to extract, clean, analyze, and visualize employee performance data to help HR and management make data-driven decisions.
- Extracted performance data from internal HR system using SQL and Cleaned and transformed the data using Python scripts to ensure it was ready for analysis.
- Created interactive Power BI dashboards to visualize employee KPIs and performance metrics and reduced manual reporting time by 30% and improved the speed and accuracy of performance evaluations.

Skills

Programming Skills: Python, (NumPy, Pandas, Matplotlib, seaborn, Scikit-learn, Tensorflow), Pyspark, R, PostgreSQL, Excel

Databases/Technologies: Apache Spark, Microsoft Power BI, Tableau, HDFS, Hive, Kafka, Github, MongoDB, Airflow, Hadoop

Cloud: Snowflakes, Redshift, Azure Data Factory, Databricks, Azure Data Lake Storage Gen 2, Synapse, AWS s3, EMR, EC2, RDS

Certifications: SnowPro Core Certification, Databricks Certified Data Engineer Associate, Academy Accreditation - Databricks Lakehouse Fundamentals, Microsoft Certified: Azure Data Engineer Associate
