

Name: Teja Pandugula

Ph.no: +1 203 627 8709

Email id: tejapandugula1@gmail.com

LinkedIn: <https://www.linkedin.com/in/teja-pandugula>

PROFESSIONAL SUMMARY:

- Results-driven **Business Intelligence Developer** with **6+ years of experience** in designing, developing, and deploying interactive dashboards and reports using **Power BI, Tableau, SQL, and Python**.
- Skilled in designing, developing, and deploying interactive dashboards and reports using Power BI and Tableau with strong data modeling (DAX, M, LOD **expressions**) capabilities.
- Proficient in **SQL (T-SQL, PL/SQL, PostgreSQL, MySQL)** for complex query development, data extraction, performance tuning, and building ETL/ELT pipelines.
- Hands-on experience with **Python (Pandas, NumPy, Seaborn, Plotly)** for data wrangling, visualization, and integrating machine learning models into BI solutions.
- Experienced in Power Query, data transformations, and building **star/snowflake schemas** for enterprise-level reporting and analytics.
- Adept at optimizing BI dashboards for performance (query folding, incremental refresh, aggregation tables) and managing security with **row-level security (RLS)**.
- Strong knowledge of **cloud data platforms** including **Azure Synapse, Azure Data Factory, Google Big Query, AWS Redshift, and Snowflake** for scalable BI solutions.
- Familiar with **Power Platform integration** (Power Automate, Power Apps) to automate workflows and enable self-service analytics.
- Skilled in **real-time analytics** with streaming datasets and API integrations for live dashboards.
- Proven track record in **data storytelling, KPI design, and executive reporting** to drive strategic and operational decision-making.
- Collaborative team player with experience working in **Agile/Scrum environments**, using **Git/GitHub, JIRA, and CI/CD pipelines** for BI development.

TECHNICAL SKILLS:

- **BI Tools:** Power BI (Desktop, Service, Report Builder, Paginated Reports), Tableau (Desktop, Prep, Server)
- **Programming & Analytics:** SQL (T-SQL, PL/SQL, PostgreSQL, MySQL), Python (Pandas, NumPy, Matplotlib, Seaborn, Plotly)
- **Data Modeling & ETL:** Power Query (M), DAX, Tableau Prep, SSIS, ETL/ELT pipelines
- **Cloud Platforms:** Azure Synapse, Azure Data Factory, Snowflake, AWS Redshift, Google BigQuery
- **Other Tools:** Excel (Power Pivot, Power Query), Git, JIRA, Confluence, Agile/Scrum
- **Specialized Skills:** Data visualization, KPI dashboarding, data storytelling, statistical analysis, predictive analytics, RLS, performance tuning

PROFESSIONAL EXPERIENCE:

Client: UBS, New York, NY

Nov 2023 - Till Date

Role: Power BI (Tableau, SQL, Python)

Responsibilities:

- Developed complex **DAX** measures, Power Query transformations, and **star-schema data models** to support enterprise reporting.
- Integrated **Python scripts** into Power BI for predictive analytics and anomaly detection, enhancing decision-making for management.
- Skilled in **Python (Pandas, NumPy, Plotly, Seaborn)** for advanced analytics, automation, and integration with BI platforms.
- Hands-on experience with **cloud data platforms** (Azure Synapse, Snowflake, AWS Redshift, Google Big Query) and **data lake architectures**.
- Strong knowledge of **SQL (T-SQL, PL/SQL, PostgreSQL, MySQL)** for data extraction, transformations, and query performance tuning.
- Strong ability to translate complex data into **business insights, KPI-driven dashboards, and executive-level reporting**.
- Implemented **Row-Level Security (RLS)** and workspace governance, ensuring secure data access across global teams.
- Migrated legacy reports from **Excel & SSRS** into **Power BI paginated reports**, streamlining reporting infrastructure.
- Developing **visual reports, dashboards and KPI scorecards** using **Power BI desktop**.
- Skilled in **Tableau Desktop, Tableau Prep, and Tableau Server/Online** for end-to-end BI solution design and deployment.
- Collaborative in **Agile/Scrum teams**, using **Git, JIRA, and CI/CD pipelines** for BI development and version control.

Environment: DAX, Pandas, NumPy, Plotly, Seaborn, Azure Synapse, Snowflake, AWS Redshift, Google Big Query, RLS.

Client: Scaler, INDIA

Jan 2022 - July 2023

Role: BI Developer (SQL, Tableau, Power BI)

Responsibilities:

- Skilled in integrating Python with BI platforms (Power BI, Tableau) to enable advanced analytics, machine learning models, and statistical forecasting.
- Strong knowledge of data modeling (DAX, Power Query, LOD expressions) and ETL pipelines for transforming raw data into structured, analytics-ready datasets.
- Hands-on experience with ETL processes and data pipelines using Python and cloud services (Azure Data Factory, AWS Glue, Airflow).
- Adept at building predictive and prescriptive analytics models with Python (scikit-learn, Stats Models) and embedding results into BI dashboards.
- Strong knowledge of **data warehousing concepts** (star/snowflake schema, OLAP/OLTP, fact/dimension modeling).
- Experienced in reporting and BI tools such as Power BI, Tableau, and SSRS for creating dashboards and visualizations.
- Worked with Azure Synapse and Snowflake to integrate cloud-based datasets into Power BI for large-scale analytics.

Environment: Power BI, Tableau, DAX, Power Query, Azure Data Factory, AWS Glue, Airflow), *star/snowflake schema*, Azure Synapse and Snowflake.

Client: BYJU'S, INDIA

Jun 2019 - Dec 2021

ROLE: Business Analyst

Responsibilities:

- Assisted in developing and maintaining **T-SQL** scripts including **stored procedures, functions, views, and joins** under guidance from senior developers.
- Supported the creation and modification of **stored procedures** and **triggers** to ensure **data integrity**.
- Wrote basic and intermediate-level **SQL queries, joins, and subqueries** for **reporting** and **data analysis** tasks.
- Participated in the development and troubleshooting of **SSIS packages** for **data transfer** and **transformation** tasks.
- Assisted in **migrating data** from **Oracle** and **IBM DB2** to **SQL Server** using **SSIS** under supervision.
- Supported the development of **ETL processes** to load and transform data from **flat files, Excel, and XML** sources.
- Helped in setting up basic **logging** within **SSIS packages** to track **data load performance** and **errors**.
- Contributed to **report development** using **SSRS** by creating **basic reports** and assisting with **parameterized** and **drill-down reports**.
- Participated in **unit testing** and **data validation** to ensure accuracy in **QA** and **production environments**.
- Provided support in **deploying** and **scheduling SSIS packages** and **subscription-based SSRS reports**.
- Worked closely with **business analysts** to understand **reporting needs** and assist in **gathering requirements** for report development.
- Maintained **version control** and participated in **database deployment** activities using **TFS** under guidance.

Environment: SQL Server 2008/2012, T-SQL, SSIS, SSRS, Oracle, IBM DB2, Excel, XML, Flat Files, TFS, SQL Profiler, Windows Server.

EDUCATION:

University of New Haven – West Haven, CT

Master of Science in Business Analytics, Concentration in Global Supply Chain

Osmania University for Women – Hyderabad, India

Bachelor of Commerce (B.Com) in Computers
