

Teja Gandham

CONSTRUCTION ENGINEER

tejaveeraanjibabugandham@gmail.com | +1 (937)516-2496 | linkedin.com/in/anji14 | Dayton

SUMMARY

- Experienced in executing high-rise residential and infrastructure projects using **Primavera P6, AutoCAD,** and Microsoft Project, ensuring timely and cost-effective delivery.
- Proficient in structural analysis and foundation design with **STAAD.Pro, ETABS, Revit, and GIS,** solving complex site challenges with real-time data.
- Led cross-functional coordination across structural, geotechnical, and **MEP teams,** reducing rework and enhancing design-to-execution efficiency.
- Committed to safety and quality control, implementing rigorous **QA/QC protocols** and achieving 95%+ material compliance with zero safety incidents.

WORK EXPERIENCE

Jr Project Manager Intern

Jan 2023 – May 2023

Ayas Architecturals – Hyderabad, IND

- Led the end-to-end execution of a 750k Dollars five-story apartment project in Hyderabad, India, ensuring
- on-time delivery within a 12-month schedule using **Primavera P6** for project tracking and Microsoft Project for task allocation.
- Coordinated multidisciplinary teams of 25+ engineers, contractors, and vendors, leveraging **AutoCAD, Revit, and Civil 3D** to streamline design revisions, reducing rework time by 30%.
- Managed project budgeting and cost control, successfully limiting overruns to under 3% of total budget by utilizing **Bluebeam Revu** for quantity takeoffs and accurate material procurement.
- Oversaw structural analysis and design reviews using **STAAD Pro, ETABS, and SAP2000,** ensuring full compliance with IS Codes and reducing structural errors during execution by 40%.
- Utilized **GIS and MATLAB** to analyze site topography and soil behavior, enhancing foundation design accuracy and reducing potential settlement issues by 25%.
- Implemented rigorous **QA/QC and HSE protocols,** resulting in zero reportable incidents throughout the project lifecycle and passing all third-party inspections on the first attempt.
- Drove client and stakeholder engagement through weekly reporting and site walk-throughs, improving satisfaction scores by 20% and securing a repeat contract for a similar development.

Site Engineer Intern

Mar 2022 – Dec 2022

Omkar Infra – Hyderabad, IND

- Supervised the construction of a 4 km rural road under **PMGSY** scheme in Andhra Pradesh, India, ensuring 100% compliance with IRC standards and completing the project 15 days ahead of the planned 180-day timeline using **Primavera** and **Microsoft Project** for daily progress tracking.
- Prepared and maintained over 120 technical drawings and site reports using **AutoCAD** and **Revit,** enabling smooth coordination across design, execution, and quality control teams.
- Executed quality control testing and inspections on 15+ concrete and bitumen samples, ensuring **M30-grade** concrete consistency and achieving 98% material compliance during third-party audits.
- Resolved 30+ on-site design and utility conflicts by collaborating with electrical and civil teams, improving turnaround time for issue resolution by 40% using **Navisworks** and cross-disciplinary coordination.
- Led the layout and earthwork operations across 5 work zones, optimizing labor productivity by 25% through accurate use of **STAAD Pro** and **ETABS** for drainage and culvert structure analysis.
- Coordinated with local authorities and utility providers to manage electricity line relocations and underground service adjustments across the 4 km stretch, minimizing service disruption and avoiding project delays by proactively resolving 12+ potential conflict zones.

PROJECTS

Drilled Shaft Foundation Analysis

2024

- Led the geotechnical design and modeling of a 70 ft deep, 7 ft diameter single drilled shaft, achieving a bearing capacity of 1300 tons with 0.9 in settlement, using Ensoft **SHAFT 2023** software.
- Executed stratigraphic analysis of 6 soil layers, incorporating parameters like unit weights (**110–138 pcf**), cohesion (**up to 2500 psf**), and internal friction angles (28–35°) for accurate design modeling.
- Simulated axial load behavior under various soil conditions and validated **LRFD** capacity of up to 428.88 tons, optimizing shaft resistance using **beta and alpha** methods.
- Engineered a dual drilled shaft system (50 ft depth, 5 ft diameter) supporting 650 tons ultimate load with only 1 in of settlement, achieving stability and economy.
- Interpreted p-y curve data and axial displacement metrics using **LPile 2022** to confirm maximum pile head deflection of 0.003 in, ensuring structural integrity under lateral loading.

Concrete Beam Strengthening Using GFRP Sheets

2022

- Conducted an experimental investigation on 15+ concrete beams subjected to elevated temperatures (up to 600°C), evaluating flexural strength with and without **GFRP** reinforcement.
- Improved beam flexural strength by up to 78% using double-layer GFRP wrapping, demonstrating significant performance gains under thermal stress.
- Designed and executed beam preparation involving batching, casting, curing, and FRP wrapping, following **ASTM C78** and IS codes for structural testing.
- Analyzed failure modes and crack propagation patterns using test data and comparative graphs, contributing to a better understanding of fire-damaged beam recovery.
- Validated that GFRP can restore and even exceed original structural performance, achieving 4.32 MPa flexural strength at 600°C with double wrapping vs. 0 MPa unwrapped.

EDUCATION

Master of Science in Construction Engineering

Aug 2023 – May 2025

University of Dayton, Dayton, OH

Bachelor of Technology in Civil Engineering

Aug 2019 – May 2023

SRKR Engineering College, Bhimavaram, IND

TECHNICAL SKILLS

- **Design Software:** AutoCAD, BIM, Civil 3D, Microsoft Project, Revit
- **Business Operations/Management:** Project Management, Risk Management, Contract Negotiation.
- **Quality Control/Data Analysis:** Non-Destructive Testing (NDT), Six Sigma and Lean Construction, Control Charts.
- **Programming Languages:** C++, Python, SQL.

CERTIFICATIONS

- **Project Manager (Procore)**
- **Bringing BIM to the Field (Procore)**
- **Construction Manager (Procore)**
- **OSHA (30 Hours Construction Training)**
