Java Full-stack Developer

SUMMARY

Experienced Software Development Engineer with around 5 years of expertise in designing and developing full-stack and cloud-native applications. Skilled in Java, J2EE, Spring Boot, Angular, Node.js, and AWS cloud platforms. Proven track record of delivering scalable, high-performance Java-based web services using REST architecture, alongside proficiency in front-end technologies such as JavaScript, TypeScript, HTML5, and CSS. Strong expertise in cloud platforms (AWS), open-source tools (Docker, Hibernate), and managing complex software projects. Focused on optimizing performance, enhancing security, and achieving key business outcomes.

WORK EXPERIENCE

Full stack Developer, First Republic Bank, SFO, CA.

March 2024 - Present

- Participated in design discussions, review meetings, and provided accurate design and development estimates based on service complexity.
- Actively involved in the analysis, detail design, development, bug fixing and enhancement in **agile methodology**. Participating in **scrum** meetings as part of iteration development process.
- Delivering the new & complex high-quality solutions to clients in response to varying business requirements
- Developed enterprise & web applications using **SOAP/REST WebServices, Spring & Microservices** architecture
- Converted monolithic applications to **microservices** using **Spring Boot** with **Spring Cloud** components (API Gateway, Circuit Breakers, Feign, etc.) and developed dynamic web applications using **Angular, HTML5, and Node.js** for full-stack development.
- Implementing **Java EE** components using **Spring MVC, IOC, Spring Transactions & Spring Security Modules**
- Designed and implemented **RESTful** web services to enable seamless communication between systems.
- Implemented the **Microservices** to base on **RESTful API** utilizing **Spring Boot** with **Spring MVC**.
- Developed front-end components using **HTML5, CSS3, JavaScript, and AngularJS** for a dynamic user interface.
- Created and normalized Use Cases to meet business requirements effectively.
- Authored unit tests using **JUnit** to ensure the reliability and maintainability of Java classes.
- Utilized **Maven** for building, running, and generating **JAR/WAR** files.
- Developed an **Enterprise Service Bus (ESB)** to serve as a gateway between services and **UI frameworks**.
- Leveraged **GIT** for version control.
- Strong understanding and hands-on experience with **Agile** methodologies, including sprint planning, retrospectives, and user stories.
- Implemented logging with **Log4J**, ensuring robust monitoring and debugging across various levels.
- Deployed web, presentation, and business components on **Apache Tomcat Application Server**.

Full-stack Developer, Zomato, Bengaluru, India

June 2022 – August 2023

- Actively participated in the full **Software Development Life Cycle (SDLC)**, including requirements gathering, modeling, analysis, design, development, and testing.
- Utilizing the in-depth knowledge of functional and technical experience in **Java/J2EE** and other leading-edge products & technology in conjunction with industry and business skills to deliver solutions to the customer
- Designing the application modules, base classes and utility classes using core **Java**.
- Designed and implemented robust applications using **Spring Boot**, leveraging **Spring MVC** for managing presentation and business logic through Dependency Injection.
- Applied **Core Java** concepts, including **exception handling, collections, multithreading**, and object-oriented programming (OOP) principles, to enhance application functionality and performance.

- Led the development and transformation of front-end applications for advisors, collaborating closely with the marketing team and stakeholders to design and maintain visually appealing and responsive web interfaces using **HTML, CSS, TypeScript, Bootstrap**, and the **Spring Framework**.
- Developed server-side components using **Servlets and JSP**, facilitating effective communication between web browsers and servers.
- Documented **APIs** with **Swagger** to enhance development workflows, boosting efficiency by 20%, and monitored application health using **Actuator**.
- Collaborated with **cross-functional Agile** teams to design and deliver **scalable Java applications**, increasing **sprint output** by 20% while fostering better team synergy.

Program Analyst, Cognizant Technology Solutions, Hyderabad, India

February 2022-June 2022

- Involved in designing, and developing Code, unit test cases, automation test-driven development at different environments, and deployment in different environments.
- Having technical Discussions with the business team and other client teams on Requirements
- After Discussions create the Data Contracts and get the approval from the respective teams.
- Based on finalized Data Contracts, Mock-ups are developed and given to businesses to create roadmaps.
- Creating the Application based on **Micro Services Spring boot**, implementing client-side application to invoke **SOAP** and **Restful Web Services** from Enterprise Service Layer application.
- Developed **JUnit** test cases for all the developed modules.
- Completed extensive Training in **Python**-based web development, gaining proficiency in building dynamic and interactive **web applications**.
- Expertise in creating **BDD-driven test** frameworks.
- Extensively worked on **APIs**, batches, and streams using the **Spring boot framework**.
- Developing new services to create the collections in **PostgresDB** and saving the Reports.
- Installed the application on **AWS EC2** instances and configured the storage on the **S3 bucket**.
- Used **JPA Entity Manager** and **Hibernate** for data persistence.
- Created required data structure, triggers, and sequences in **Postgres Database**
- Designed and developed the framework to consume the web services hosted in **Amazon EC2** Instances
- Managing the **Splunk** onboard Applications to validate and **debug** the logs.
- Working on **Automation Test Driven Development** using **Cucumber** framework and **gherkin** for feature files
- Worked on **AWS** Services like **EC2, S3, CloudWatch** and **CloudTrail**
- Experienced with event-driven and scheduled **AWS Lambda** functions to trigger various **AWS** resources
- Maintaining a minimum level of 80% code coverage using the **Mockito Unit** testing Framework.
- Raising the tickets using **JIRA/ServiceNow** to engage the teams for technical issues resolution.
- Acquired expertise in **SQL** and **AngularJS**, enabling the development of responsive, user-friendly interfaces with efficient database management and manipulation.

Java Developer, Policy Bazar, Gurgaon, Ind

June 2020 - Jan 2022

- Used **Struts** frameworks and **MVC** design patterns to complete several projects on complex areas of development including user interface design, batch processing, stored procedure development, **XML**, data exchange and integration.
- Utilized **RESTful APIs** to retrieve and update data, ensuring smooth data flow between the front-end and backend systems.
- Implemented multi-threaded synchronization processes, with **JMS** queues for consumption of Asynchronous requests.
- Building/Maintaining **Docker** container clusters managed by **Kubernetes Linux, Bash, GIT, Docker**, on **GCP** (Google Cloud Platform). Used **Jenkins** as Continuous Integration. Utilized **Kubernetes** and **Docker** for the runtime environment of the **CI/CD** system to build, test deploy
- Used **GIT** for Source Code Management. Used **Quality Center** to keep track of the Defects and Issues.

- Creating REST **API** implementation using **Spring Boot** framework and writing test cases for those **API**'s.
- Implement **API** Service using **Apache Camel**. Developed **REST APIs** using **Java 8**, **Play** framework and **Akka**.
- Developed **UI** application initially using **Angular** 6.0 and made use of customized components.
- Involved in designing, capacity planning and implementing multi-rack **Cassandra cluster**.
- Developed **GUI** using **JSP**, **JSTL**, **AJAX**, **HTML**, **CSS** and **JavaScript**.
- Manage and fix bugs with **JIRA** bug tracking application.
- Developed automation of Validation service to provide the **JASPER** report based on bean validations, **spring** validations on test cases.
- Implemented **J2EE** components using **Spring MVC**, **Spring IOC**, **Spring Transactions** and **Spring Security** modules.

TECHNICAL SKILLS

- **Programming Languages:** Java, J2EE, Python, SQL, C/C++, C#
- **Backend Technologies & Frameworks:** Node.js, NestJS, Express, Spring Boot, Spring MVC, Spring Security, Hibernate, RESTful APIs, Microservices, Apache Camel, Struts
- **Frontend Technologies:** Angular, ReactJS, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, AJAX, jQuery
- **Reactive Programming:** RxJS, Redux
- **Messaging & Streaming:** Apache Kafka, RabbitMQ, JMS
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, SQS, CloudWatch), Docker, Kubernetes, Jenkins, CI/CD Pipelines
- **Database Management:** MySQL, PostgreSQL, MongoDB, Cassandra, JPA, Spring Data JPA
- **Testing & Debugging:** JUnit, Mockito, Spock, Selenium, Log4J, New Relic, Kibana, Splunk
- **Version Control & Collaboration:** Git, GitHub, Jira, Confluence, Agile (Scrum/Kanban), Waterfall
- **Mobile Development:** Android Studio, Agora, Chime

EDUCATION

Master of Science (Information Technology), University of Cincinnati, OH, USA

Bachelor of Technology (Information Technology), Vardhaman College of Engineering, Hyderabad, India

CERTIFICATIONS

- The project, Mini-Mountain Sprayer, was published and selected for patenting by India Patent.
- Full-Stack Java Development by Coursera.
- Training in Machine Learning by the Internship Studio.
- Image Processing and Computer Vision by Udemy.
