

Tejasree Kalakata

Healthcare Data Analyst

* * *

Healthcare Data Analyst with 6+ years of expertise in medical coding and data quality analysis, proficient in SQL, Python and data visualization tools such as Qlik Sense, Power BI and Tableau. Demonstrated ability to enhance coding accuracy and data integration, contributing to improved healthcare outcomes and decision-making processes. Skilled in training and leading teams, ensuring high standards of data accuracy and operational efficiency in healthcare settings.

EMPLOYMENT HISTORY

Data Quality Analyst

Prime Healthcare — Sep 2024 – Present

- ◆ Partnered with the executive team to build a Dashboard in Qlik and helped the company identify loss, recovering nine-figured revenue by designing a stable data schema across 10 tables using SQL.
- ◆ Conducted in-depth statistical analysis on more than 15 variables to determine essential metrics affecting diagnosis coding quality, using storytelling techniques to present the results via Qlik dashboards to executives, supporting pivotal research efforts.
- ◆ Developed a MS SQL -based ETL pipeline to streamline data extraction from SharePoint and the integration of over 200 Excel datasets into a Microsoft SQL database, optimizing processing time by 90% and enhancing data management.
- ◆ Implemented automated Python scripts for data cleaning and ad-hoc reports, reducing manual effort by 70% and bolstering operational efficiency.
- ◆ Collaborated with cross-functional teams to define business requirements, leading to the creation of Power BI dashboard using Power Query and DAX, improving payment metrics and KPI monitoring by 20%.
- ◆ Developed and implemented data relationship models using MS SQL Server, enhancing data integration and reducing data redundancy by 25%.
- ◆ Informed data team strategy by collaborating with product leaders and managers, actively participating in the execution and planning of organizational data team strategy, resulting in a 25% improvement in team productivity.
- ◆ Successfully transitioned a major operational dashboard from Excel to Qlik by establishing a direct SQL connection, which improved operational efficiency by 60% and decreased manual workload by 90%.

Data Quality Analyst Intern

Prime Healthcare — Feb 2024 - May 2024

- ◆ Conducted data quality assessments on healthcare datasets (OSHPD), ensuring accuracy and completeness.
- ◆ Designed SQL queries for ETL processes, improving data integration and reliability.
- ◆ Developed Qlik Sense dashboards for real-time tracking of healthcare metrics, enhancing decision-making. Investigated DRG reimbursement data, supporting cost-efficient resource utilization.
- ◆ Trained new team members on data visualization tools, boosting team capabilities.

Graduate Professional Assistant

George Mason University — Jun 2023 - Aug 2023

- ♦ Organized and executed graduate student events, enhancing the orientation experience for new students. Addressed application issues for prospective students, improving application process efficiency.
- ♦ Analyzed survey data with Qualtrics, updating admissions content in Excel for better accuracy.
- ♦ Collaborated with Marketing and Academic Affairs to promote BAM programs, creating engaging content. Streamlined graduate admissions by enhancing event coordination and data analysis.

Graduate Teaching Assistant

George Mason University — Jan 2024 - May 2024

- ♦ GTA for HAP 670/308 Introduction to Health Informatics/Public Health Informatics - Tableau, Project management, HIM.

Senior Medical Coder (Denials)

R1 RCM Global Private Limited, Hyderabad, India — Sep 2019 - May 2022

- ♦ Assigned medical codes (CPT, HCPCS, ICD-9, ICD-10) & complex cardiac catheterizations and interventional radiology (CVIR/IVR) ensuring compliance with CMS guidelines. Resolved coding and billing conflicts to enhance accuracy and efficiency and worked on encoder systems (eCAC,3M, EPIC).
- ♦ Utilized HCPCS, Medicare Ambulatory Payment Classification (APC) codes, Revenue codes, Bill Type codes, Remark codes, NCCI/CCI edits, MUE edits, LCD, NCD, Medical Necessity, Modifier Edits. Managed complex coding projects with strong organizational skills for outpatient surgery, observation, CVIR, emergency, and ancillary services while adhering to the official coding guidelines and established client coding guidelines.
- ♦ Maintained patient confidentiality while ensuring data completeness and compliance.
- ♦ Streamlined denial resolution processes, enhancing coding accuracy and compliance.
- ♦ Guided junior coders, boosting team efficiency and accuracy in complex medical coding.
- ♦ Conducted detailed analysis of billing systems to ensure zero coding errors in submissions.
- ♦ Implemented new coding protocols that streamlined claims processing.
- ♦ Enhanced data integrity in patient records, ensuring 100% compliance.
- ♦ Reduced claim denials by 30% through strategic coding improvements.

Prospective Claims Accuracy - Testing Analyst

Cotiviti India Pvt. Ltd., Hyderabad, India — Mar 2017 - Jul 2019

- ♦ Specialized in handling HCFA (CMS-1500) and institutional (CMS-1450) denial claims, enhancing resolution rates.
- ♦ Led UAT testing for claims adjudication rules using Lotus Notes, JIRA, and BRAT, improving accuracy.
- ♦ Resolved payer reason code issues, ensuring precision in RVA pre-post files.
- ♦ Refined UAT testing protocols, enhancing claims adjudication accuracy.
- ♦ Coordinated with cross-functional teams to optimize claims testing workflows.
- ♦ Analyzed claims data trends, reducing error rates by strategizing effective solutions.
- ♦ Expedited claims processing efficiency by 20% through streamlined testing protocols.
- ♦ Streamlined claims resolution by analyzing and addressing specific denial patterns.
- ♦ Increased claims processing speed by implementing targeted testing strategies.

EDUCATION

Master of Science in Health Informatics

George Mason University, Virginia — 2022 - May 2024

Scholarship:

- ♦ Awarded the High Grant Award scholarship in the final semester of my Master's in Health Informatics for exceptional academic achievement.

Bachelor of Pharmacy

Gurunanak Institution of Technical Campus - School of Pharmacy, Hyderabad, India — Aug 2016

COURSES

Clinical Information Systems, Computational tools & databases in health informatics, Health Informatics Vocabulary Standards and Terminology, Advance Statistics in Health Services Research I, Data Mining, Comparative Effectiveness Analysis using Observational, Health data integration, Capstone & Pre-Capstone Professional Development Seminar-Health Informatics, Radiology Informatics. ICD and CPT, HCPCS codes.

George Mason University — 2022 - May 2024

SKILLS

Data analysis	Visualization
Modeling	Project management
SQL	Python
3M	Microsoft Teams
Excel, DAX	Word
PowerPoint	QLIK Sense
Tableau, Microsoft Power BI	Learn Scape
Microsoft Visio	STATA
WEKA	XML
UMLS	SNOMED CT
RELMALOINC	MATLAB
Cerner	Encoder
Encoder Pro	Epic
Meditech	Athena Health

PROJECTS

CAPSTONE Project

VISUALIZING HEALTH EQUITY: OSHPD'S ANALYSIS OF INPATIENT SERVICES WITH PRIME HEALTHCARE AND ACROSS CALIFORNIA HOSPITALS.

- ♦ Spearheaded the establishment of a robust OSHPD analytics methodology, from stakeholder needs assessment to meticulous Datamart architecture design, to empower California hospitals with insightful data analysis for informed healthcare decision-making.
- ♦ Lead efforts to ensure data quality and reliability by acquiring, preparing, and structuring five years of OSHPD data in a standardized format, coupled with rigorous testing and user feedback mechanisms, to enhance trust in the analytics platform and improve healthcare outcomes in California.
- ♦ The OSHPD dashboards facilitate comprehensive outcomes analysis by providing insights into inpatient demographics and payor mix, length of stay metrics, and case complexity across different healthcare systems, along with severity level comparisons, all of which support more informed decision-making in resource allocation, operational effectiveness, and quality of patient care.

Data Mining Project

Predictive Analysis on Diseases Symptoms Using Machine Learning Methods.

- Objective: Used Python and WEKA for predictive disease analysis.
- Process: Involved data cleaning, preprocessing, and model building.
- Outcome: Presented results with discussions and limitations.

Advance Statistics in Health Services Research I

Preventive Services for Children (2011-2012)

- Objective: Examine factors (race, poverty, gender, insurance, chronic conditions, life experiences) influencing preventive services for children aged 3-5.
- Methods: Utilized STATA for descriptive, t-test, and Multiple Regression Analysis.
- Outcome: Analyzed a subset of 15,910 children, providing insights with discussions and limitations.

Advance Statistics in Health Services Research I

Analyzing the Relationship Between Chronic Health Conditions, Age, Gender, Medicaid Status, and Falls.

- ♦ Data was gathered by the National Center for Health Statistics through the NSRCF survey in 2010, STATA, Descriptive Analysis, Chi-Square Test, Logistic Regression, Discussions & Limitations, and Conclusion.

Radiology Informatics

Enhancement of Breast Ultrasound to Detect Cancer Lesion through Advanced Image Preprocessing Techniques

Volunteer Work / Interests

- ♦ Received Performance Special Recognition at R1 RCM: Acknowledged as a "Great Job Coder" and "Above and Beyond Coder" for maintaining high productivity and achieving organizational quality standards.
- ♦ Admissions handling, student query addressing, national symposium participation. Leadership as Placement Cell Student Coordinator.
- ♦ Successful planning and execution of diverse events. Participated in coding department meetings and educational events like local chapter webinars.
- ♦ Strong organizational and administrative skills in admissions review and content development.
- ♦ Effective student concern resolution, team collaboration, and initiative development.
