SUMMARY

- **Full Stack Java Developer** with **3+ years** of experience in **software development life cycle (SDLC)**, including requirements analysis, design, development, testing, deployment, and support.
- Expertise in **Java/J2EE technologies**, **Object-Oriented Programming (OOP)**, and **Microservices Architecture**.
- Proficient in **frontend development** using **Angular, React, HTML5, CSS3, Bootstrap, TypeScript, and JavaScript**, ensuring responsive and interactive user interfaces.
- Skilled in **backend development** with **Spring Boot, Spring MVC, Spring Security (OAuth 2.0), Hibernate, and RESTful APIs**, optimizing security and performance.
- Strong knowledge of **Core Java**, including **exception handling, multithreading, concurrency, File (I/O), data structures, collections, and garbage collections**.
- Experience working with **SQL and NoSQL databases (Oracle, MySQL, PostgreSQL, MongoDB, Cassandra, DynamoDB)**, optimizing data retrieval and performance.
- Hands-on experience with **AWS (EC2, S3, Lambda), DevOps (CI/CD pipelines, Jenkins, GitLab), containerization (Docker, Kubernetes) and message brokers (Apache Kafka, RabbitMQ)**.
- Well-versed in **Agile (Scrum), TDD (Test-Driven Development), and API Testing (Postman, JUnit, Mockito)**.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, C, C++

Backend Technologies: Spring Boot, Spring MVC, Spring Security (OAuth 2.0), Spring Data JPA, Spring IOC, Spring AOP, Hibernate, GraphQL, JDBC, JSP, RESTful APIs, SOAP Web Services

Frontend Technologies: HTML5, CSS3(Sass), Bootstrap, ReactJS, AngularJS, XML, JSON, AJAX, jQuery, Vue.js, Node.js, Express.js

Databases: MySQL, PostgreSQL, Oracle, MongoDB, Cassandra, DynamoDB, ElasticSearch

Cloud & DevOps: AWS (EC2, S3, Lambda, Terraform), GCP (Google Cloud Platform), Azure, Docker, Kubernetes, Jenkins, Maven, Gradle

Web Servers: Apache Tomcat, WebLogic

Testing: JUnit, Mockito, Postman

Version Control: Git, GitHub, GitLab, Bitbucket

Messaging & Event Streaming: Apache Kafka, Rabbit MQ

IDEs: IntelliJ, Eclipse, Visual Studio Code

Operating Systems: Linux, Unix, Windows

Other: Agile (Scrum), Jira, Test-Driven Development (TDD)

PROFESSIONAL EXPERIENCE

Blue Cross Blue Shield

January 2024 - Present

Full Stack Java Developer

Michigan

- Designed interactive UIs using **React.js**, leveraging **React Hooks** and **Redux**, improving page load times by 30%.
- Built and secured **RESTful APIs and GraphQL APIs** using **Spring Boot** and **Spring Security (OAuth 2.0)**, enhancing authentication by 40% and aligning with microservices architecture principles.
- Utilized **JDBC** for database connectivity and performed **CRUD** operations on **Oracle** and **Cassandra** databases, improving data retrieval efficiency by 20%.
- Containerized applications with **Docker** and orchestrated deployment with **Kubernetes on AWS (EC2, S3)**, increasing scalability by 50%.
- Deployed **SOAP-based web services** on **Apache Tomcat** and implemented **RabbitMQ** for asynchronous messaging, enhancing system responsiveness by 25%.
- Managed version control with **Bitbucket**, automated builds with **Gradle**, reducing build time by 15%.
- Conducted unit and integration testing using **JUnit** and **Mockito**, and performed **API testing** with **Postman** to ensure robust functionality, increasing test coverage by 30%.
- Collaborated in **Agile (Scrum) teams** using **JIRA** for task management, improving project delivery timelines by 20%.

RealPage, Inc.

March 2021 - May 2023

Java Developer

Hyderabad, India

- Developed responsive web applications using **Angular, HTML5, CSS3, Bootstrap, TypeScript**, increasing performance by 20%.

- Integrated **backend services** with **frontend applications** via **RESTful Web Services**, handling data formats like **XML** and **JSON**, improved data handling efficiency by 20%.
- Developed server-side logic using **JSP and Hibernate**, reducing development time by 15%.
- Optimized **database performance** with **MySQL, MongoDB**, and **Spring Data JPA**, improving query execution by 25%.
- Deployed applications on **AWS**, leveraging cloud scalability to enhance performance and cost efficiency.
- Implemented **Apache Kafka** for real-time data streaming, decreasing latency by 15% and reinforcing experience with messaging systems.
- Managed **CI/CD pipelines** using **Jenkins** and **Maven**, reducing deployment errors by 30%.
- Hosted applications on **WebLogic servers**, improving system uptime by 20%.
- Utilized **Git** for version control and **GitHub** for repository hosting, streamlining branching strategies, code merging, and pull request workflows to improve collaboration and code review efficiency by 35%.
- Followed **Agile methodologies** and **Test-Driven Development (TDD)**, performing unit testing with **JUnit** to ensure high-quality software delivery.

ACADEMIC PROJECTS

Online Library Management System

August 2024 - December 2024

(PHP, MySQL, HTML5, CSS3, JavaScript, AJAX, jQuery, Visual Studio Code, XAMPP)

- Designed a full-stack **Online Library Management System**, automating book borrowing, returns, and user management, reducing manual workload by 70%.
- Optimized **frontend performance** by 60%, enhancing **UI/UX** with **AJAX and jQuery**.

Age and Gender Prediction Using Machine Learning

June 2021 - December 2021

(Python, TensorFlow, Keras, OpenCV, Jupyter Notebook, PyCharm)

- Built a **CNN-based gender prediction and age estimation model**, refining accuracy to 85% via data preprocessing and hyperparameter tuning.
- **Integrated machine learning components**, into a functional prototype, demonstrate high performance in real-world scenarios.
- Published research paper “**Advancements in Gender Prediction and Age Estimation using Deep Learning Techniques**,” in Springer. https://link.springer.com/chapter/10.1007/978-981-19-8563-8_31

EDUCATION

Auburn University at Montgomery, AL

June 2023 - December 2024

Master of Computer Science

Coursework: Object-oriented programming, Python, Operating Systems, Data Structures and Algorithms, Database Management Systems, Machine Learning, Frontend and Backend Development.

Sreyas Institute of Engineering and Technology - Hyderabad, India

June 2018 - July 2022

Bachelor of Technology in Computer Science

Coursework: Computer Architecture, Java, Software Engineering, Computer Networks, Web Technologies, Artificial Intelligence, Software Testing, Cloud Computing, Data Mining, Cryptography and Network Security.

CERTIFICATIONS

- **Full Stack Web Developer** – LinkedIn Learning
- **AWS Cloud Development** – Sreyas Institute of Engineering
- **Java and Python Programming** – Unique Computers
- **Git and GitHub** – Geekster Academy
- **C Programming** – Integrated Institute of Advanced Studies
- **Machine Learning with Python** – Sreyas Institute of Engineering
