Summary

Business Analyst with over 4 years of experience in Business analysis, business process optimization, and project management within healthcare and IT sectors. Expertise in SQL, Python, and advanced statistical tools such as R and SAS for comprehensive data-driven decision-making. Adept at collaborating across teams using Agile methodologies, facilitating cross-functional communication, and driving process improvement. Proficient in creating interactive dashboards with Power BI and Tableau, delivering actionable insights for stakeholders. Skilled in working with cloud platforms (AWS, Azure, GCP) and a wide range of database management systems (MySQL, PostgreSQL, Oracle). Proven ability to streamline operations, enhance system efficiency, and contribute to business strategy in fast-paced environments.

Work Experience

Elevance Health, USA

Sep 2024 - Current

Business Analyst

- Utilized SQL for robust data extraction and analysis, contributing to detailed business requirements documentation for CRM system enhancement, which improved system efficiency and user satisfaction.
- Facilitated stakeholder collaboration through Microsoft Teams and Slack, which ensured seamless communication channels and improved project delivery timelines.
- Participated in Agile methodologies, including Scrum and Kanban, using Jira for sprint planning and backlog management, which enhanced team productivity and project alignment.
- Implemented Git and GitHub for version control, ensuring collaborative development practices and maintaining a dependable codebase, which reduced errors and improved code quality.
- Interacted with various Database Management Systems such as MySQL, PostgreSQL, and Microsoft SQL Server, ensuring comprehensive data analysis that supported informed decision-making.
- Utilized Microsoft Excel for data manipulation and analysis, supporting the development of executive-level reports.
- Conducted statistical analysis using Python, complementing traditional tools like R and SAS, to discern trends and patterns in customer behavior.
- Developed and maintained Power BI dashboards and reports, ensuring data accuracy and insightful decision-making. Collaborated with teams to deliver customized BI solutions meeting business requirements.
- Utilized PLM team center to streamline processes, improve collaboration, ensure compliance with regulatory standards, and ultimately accelerate time-to-market for new biotechnological products while maintaining high quality and safety standards.

Hexaware Technologies, India

Jul 2019 - Dec 2022

Business Analyst

- Designed and implemented SQL and Python-based data models, optimizing structures for efficient analysis in a sales forecasting initiative, resulting in improved forecast accuracy.
- Facilitated seamless cross-functional communication and collaboration using Microsoft Teams, Slack, and Zoom, enhancing team productivity and project alignment.
- Applied Git and GitHub for version control, facilitating efficient collaboration and codebase management, which led to reduced errors and streamlined development processes.
- Managed diverse Database Management Systems including MySQL, PostgreSQL, and Oracle for comprehensive data analysis, enabling more informed decision-making and strategic planning.
- Employed statistical analysis tools like R, SAS, and Python to discern trends and optimize pricing strategies, resulting in increased revenue and competitive pricing.
- Contributed to Agile methodologies by utilizing Jira and Trello for effective project management and sprint tracking, leading to improved team collaboration and project delivery.
- Leveraged Microsoft Power BI for data visualization, creating interactive dashboards that enhanced data accessibility and informed decision-making.
- Utilized Confluence and Microsoft SharePoint for communication and documentation, promoting transparency and knowledge sharing, which streamlined team workflows.
- Engaged in project tracking using Jira, Trello, and Asana, ensuring smooth coordination across various organizational projects, which improved project timelines and resource allocation.

Skills

- **Programming Languages:** SQL, Python
- **Collaboration Tools:** Microsoft Teams, Slack, Zoom, Jira
- **Version Control:** Git, GitHub
- **Database Management Systems:** MySQL, PostgreSQL, Microsoft SQL Server, Oracle, PLM
- **Statistical Analysis Tools:** R, SAS, NumPy, SciPy
- **Project Management:** Agile Methodologies (Scrum, Kanban), Jira, Trello
- **Cloud Platforms:** AWS (Amazon Web Services), Microsoft Azure, Google Cloud Platform (GCP)
- **Visualization Tools:** Microsoft Excel, Tableau, Microsoft Power BI
- **Communication and Documentation:** Confluence, Microsoft SharePoint
- **Documentation:** Microsoft Word, LaTeX, Markdown
- **Project Tracking:** Jira, Trello, Asana
- **Soft Skills:** Analytical Skills, Problem-Solving, Communication Skills, Project Management, Critical Thinking, Business Acumen, Data Analysis, Time Management, Teamwork, Detail-Oriented, Work Collaboratively

Education

- **Masters in Management of Technology** Jan 2023 - Dec 2024
Arizona State University, Arizona
- **Bachelors in Information Science Engineering** Jun 2015 - Jun 2019
Visvesvaraya Technological University, Bangalore, India

Certifications

- Power BI Essential Training from LinkedIn
- Tableau Essential Training from LinkedIn

Projects

Sales Performance Analysis & Optimization

- Analyzed sales data using SQL, Tableau, and Python to identify trends and improve forecasting.
- Built interactive dashboards for real-time sales monitoring.
- Developed predictive models, optimizing inventory and pricing strategies.
- Increased forecasting accuracy by 20% and revenue by 15%.

Customer Churn Prediction & Retention

- Analyzed customer data to identify churn patterns using Python (XGBoost, Logistic Regression) and SQL.
- Created dashboards in Power BI to monitor customer retention.
- Implemented targeted retention strategies, reducing churn by 25%.
