

SUMMARY

Experienced Data Analyst with over 4 years of experience in data modeling, ETL processes, and BI tool development. Proven ability to translate complex technical concepts into clear, actionable insights for diverse audiences. Proficient in SQL, Python, Tableau, and cloud computing platforms such as Azure and Snowflake. Seeking to leverage expertise in Power BI, SQL and Excel to contribute to the success of your organization by driving informed decision-making and providing high-quality business intelligence solutions.

SKILLS

Programming: Python (Pandas, NumPy, Scikit-learn), R

AWS Technologies: Redshift, S3, Glue, EMR, Kinesis, Lambda, IAM

Database: SQL Server, Oracle PL/SQL, Mongo DB, PostgreSQL, PL/SQL, Snowflake DB, MYSQL, T-SQL, NoSQL.

Tools: SSIS, Tableau, Power BI, Git, Data Warehousing, Looker, ELT, ETL Design, Data Visualization, Data Analysis, MS Excel

Analytical Techniques: XGBoost, Predictive analysis, Random Tree Regressor, Regression, Sentiment Analysis, Data Normalization, Demand Forecasting and Risk Assessment.

EDUCATION

Master's degree in Computer Science - University of Central Missouri (UCMO)

Aug 2021 - May 2023

Bachelors in Electronics and Communication Engineering - Sri Indu College of Engineering & Technology

Jan 2014 - July 2018

WORK EXPERIENCE

Data Analyst - Texara Solutions LLC, Chicago, IL

Aug 2023 – Sep 2024

- Leveraged SQL and Python to extract, clean, and transform data from diverse sources, ensuring data integrity for analytical purposes.
- Used SQL and other tools to extract, transform, and load (ETL) data from multiple platforms, ensuring data integrity and accuracy in reporting.
- Built interactive dashboards in Tableau/Power BI to visualize KPIs like revenue, product performance, and regional sales trends.
- Applied predictive models such as time-series forecasting using Python to estimate future demand.
- Collaborated with cross-functional teams to streamline data processes and enhance data quality and accessibility.
- Analyzed ServiceNow ticket data to identify trends, patterns, and root causes, improving incident response times and reducing ticket resolution time.

Software Engineer – Accenture, Hyderabad, India

Aug 2018 - Jul 2021

- Led development of ETL packages using SQL Server Integration Services (SSIS) to facilitate data ingestion and transformation, aligning with enterprise-level data warehousing needs and supporting customer data analysis projects, which involved extensive use of Python for scripting and automation.
- Collaborated with cross-functional teams to optimize ETL pipelines using AWS Glue, S3 and CloudWatch, enhancing data accessibility and reliability.
- Created and optimized complex database queries from multiple sources, improving data retrieval efficiency.
- Played a key role in the development and maintenance of data pipelines using Python, ensuring seamless ELT processes and the integrity of data analysis projects.
- Provided on-call support and resolved issues in production and non-prod environments.
- Enhanced data visualization techniques in Excel to better communicate business insights to stakeholders.
- Performed tasks like data cleansing, enrichment, aggregation and normalization within SQL queries using Snowflake.

- Pioneered the implementation of custom data integrations which involved creating complex stored procedures and utilizing Common Table Expressions (CTEs) for optimized data loading processes, significantly improving the customer onboarding experience by streamlining technical issues resolution.
- Performed tasks like data cleansing, enrichment, aggregation and normalization within SQL queries using Snowflake.

PROJECTS

Black Friday Sales Prediction - Machine Learning

Aug 2022 - Oct 2022

- Leveraged expertise in Python for comprehensive data preprocessing and analysis, employing pandas and NumPy libraries to clean, transform, and ready the dataset for intricate model training and validation, aligning with the job's requirement for proficiency in Python and experience with data pipelines.
- Skillfully utilized SQL within machine learning model development for data manipulation and querying, enhancing the predictive model's performance and contributing to end-to-end features development, which resonates with the job's emphasis on SQL expertise and modern data warehouses.
- Executed model training and optimization using advanced machine learning algorithms such as Random Forest, Ridge Regression, and XGBoost, paralleling the job description's call for technical advisement in data observability and governance through the application of sophisticated analytic techniques.
- Developed detailed technical documentation throughout the model development process, encapsulating data exploration, model selection, hyper parameter tuning, and performance evaluation, thereby endorsing best practices in documentation and knowledge sharing as sought in the job opportunity.

CERTIFICATIONS

- AZ 900 - Microsoft Azure Fundamentals
- Tableau Essential Training
- Fundamentals of Snowflake DB.
