SUMMARY

Supply Chain Analyst with experience driving \$216K+ in documented savings through inventory optimization, freight reduction, and process automation across energy and manufacturing sectors. Combines technical expertise in SQL, Python, and Power BI with hands-on ERP experience in SAP MM and NetSuite to transform complex supply chain data into executive-level insights. Lean Six Sigma Green Belt recognized for cross-functional leadership with Finance, IT, Operations, and Procurement teams.

EXPERIENCE

Supply Chain Analyst | Motiva Enterprises LLC | Beaumont TX | July 2023 - Present

- Increased inventory accuracy from 71% to 93% by implementing systematic cycle counts, ABC classification, and variance analysis across \$4.2M in inventory using SAP and NetSuite.
- Reduced freight costs by \$127K annually through transportation data analysis, route optimization, and strategic renegotiation of carrier contracts with 3PL partners.
- Built 5 automated Power BI dashboards tracking fill rate, inventory turnover, OTIF, and carrying costs—reducing manual reporting by 12 hours weekly.
- Developed Python scripts automating PO tracking, exception reporting, and demand forecasting models—improving forecast accuracy by 23%.
- Identified \$89K in excess and obsolete inventory through aging analysis, reducing carrying costs by 18% and freeing 15% warehouse space.
- Coordinated 150+ weekly shipments across 8 distribution points, resolving logistics bottlenecks and maintaining 97% on-time delivery rate.
- Led ERP workflow improvements for WMS barcode scanning and traceability systems, reducing material issuance errors by 28%.
- Executed SQL queries analyzing 50,000+ SKU transactions monthly to identify shrinkage patterns and inventory optimization opportunities.
- Designed vendor scorecards tracking lead time, quality, and fill rate metrics—presenting findings to senior leadership and reducing late deliveries by 19%.

Supply Chain Analyst | Stovekraft Limited | Bangalore, India | June 2020 - October 2022

- Improved inventory accuracy by 18% through cycle count program implementation and root-cause analysis across 2,500+ SKUs valued at \$3.1M.
- Reduced stockouts by 24% by implementing safety stock calculations, MRP integration, and ABC/XYZ classification system.
- Created Tableau dashboards providing real-time visibility into inventory health, aging analysis, and reorder points—enabling 40% faster decision-making.
- Analyzed \$1.8M in freight spend using SQL and Excel, identifying consolidation opportunities that reduced transportation costs by 11%.
- Implemented WMS barcode scanning system improving picking accuracy from 89% to 97% and reducing inventory adjustment errors by 34%.
- Managed cycle count program for 12 regional warehouses, achieving 99.2% count completion rate and 96% accuracy target.
- Supported S&OP process by managing material issuance, kitting, and BOM accuracy for 3 manufacturing lines producing 15,000 units monthly.
- Collaborated with Procurement, Finance, and Production teams to optimize inventory levels—reducing excess stock by \$54K through EOQ optimization.
- Trained 12 warehouse staff on ERP workflows, cycle count procedures, and inventory management best practices.

EDUCATION

Master of Science - Management information system | Lamar University | Beaumont, TX | 2024

Bachelor of Business Administration | M.S. Ramaiah College of Arts, Science and Commerce | Bangalore, India | 2021

CERTIFICATIONS

Six Sigma: Green Belt Certified

SAP MM (Materials Management)

SQL Essential Training

Demand Planning Professional Certificate

SKILLS

- SQL
 - Python (Pandas, NumPy)
 - Power BI
 - Tableau
 - SAP MM
 - Oracle NetSuite
 - Advanced Excel (Pivot Tables, VLOOKUP, VBA)
 - WMS (Warehouse Management Systems)
 - TMS (Transportation Management Systems)
 - S&OP (Sales & Operations Planning)
 - MRP (Material Requirements Planning)
 - Demand Forecasting & Inventory Optimization
-
