

TEJITHA YADAV TODETI

tejitha.t21@gmail.com | 203-526-5483 | USA | [Linkedin](#)

PROFESSIONAL SUMMARY

- ❖ 5+ years of combined experience as a Business Analyst and QA Analyst supporting global stakeholders across North America and Asia
- ❖ Skilled in requirements gathering, business process analysis, UAT coordination, and end-to-end testing across SaaS, automotive domains.
- ❖ Experienced in manual and automation testing using Python, SQL, and TestRail, ensuring full traceability between business requirements and Quality Analyst validation.
- ❖ Proficient in data analytics & reporting using Power BI, Tableau, and SQL, translating insights into actionable recommendations.
- ❖ Hands-on with Agile and SDLC methodologies, collaborating with developers, testers, and product owners to streamline delivery cycles.
- ❖ Strong working knowledge of Jira, ServiceNow, Salesforce, Excel, and PowerPoint for documentation and stakeholder reporting.
- ❖ Proven ability to improve process efficiency and quality metrics — reduced sprint carry-over by 62%, shortened testing cycles by 28%, and increased user adoption to 100%.
- ❖ Adept at creating test strategies, functional test cases, and data-driven automation scripts, ensuring software quality and compliance.
- ❖ Recognized for clear communication, cross-team coordination, and delivering data-driven solutions with measurable impact.

PROFESSIONAL EXPERIENCE

Business Analyst | General Motors

Mar 2024- Present | Warren, MI

- Executed comprehensive test cases across 10+ vehicle modules, including Instrument Cluster Display, Android, infotainment, HMI, ADAS, connectivity systems, ensuring 100% validation against functional and design requirements specifically in EV vehicles.
- Conducted various testing types, including monkey testing, smoke testing, binary testing, prebuild validation, sanity testing, functional, regression, acceptance, and end-to-end testing (E2EET), ensuring system stability and performance with <5% post-release defects. Knowledge on Ethernet Protocols (TCP/IP, UDP, DoIP)
- Analyzed system bugs/defects for General Motors’ in-vehicle [infotainment system](#), identified root cause for reported issues, validated business requirements, and coordinated Software Development Lifecycle (SDLC)
- Designed and delivered real-time Power BI dashboards, showcasing content popularity & platform performance, providing actionable insights that optimized media strategies and boosted customer engagement by 20%.
- Partnered with product owners to groom and prioritize product backlog for incidents & coordinated cross-functional dependencies/ stakeholder communication that reduced sprint carry-over work by 62%
- Automated and streamlined complex workflows via Apache Airflow, ensuring fault-tolerant ETL execution and increasing pipeline reliability to sustain 99.9% uptime across critical systems.
- Collected and analyzed historical system issues reports for 6.2 million vehicles using Power BI and SQL, and identified and presented findings to product, safety, compliance, and IT teams for product enhancement
- Collaborated with product owners to define business requirements, acceptance criteria, and test cases; reduced sprint carry-over work by 62%.
- Partnered with QA and validation teams to design & execute functional and regression test cases, achieving 95% defect closure before release. Supported automated data validation scripts in Python & SQL, reducing manual validation time by 35%.
- Performed in-vehicle testing to validate real-world operation and integration of automotive modules across 50+ test scenarios.
- Knowledge of safety-critical systems and adherence to automotive industry standards such as ISO 26262 and AUTOSAR architecture.
- Executed manual and Over-The-Air (OTA) ECU flashing to deploy software updates and verify system behavior post-flash in vehicle and hardware; applied knowledge on Android Automotive OS and Vehicle Hardware Abstraction Layer (VHAL)
- Leveraged automation frameworks, including pytest, Robot Framework, Behavior-Driven Development (BDD) methodologies, and Appium for automated UI testing, achieving ~40% reduction in manual testing effort. Hands-on experience with ARXML files.

Business Analyst (Search Engine Optimization) | Tutoria

Aug 2023-Feb 2024 | Bridgeport, CT

- Oversaw website enhancement from designing, development, testing, launch, and support for Tutoria’s [website](#) that resulted in increasing website traffic by 237% and new volunteer sign-ups by 18% in 2 months
- Recommended and implemented SEO (Search Engine Optimization) strategies that resulted in boosting website searchability and visibility, and trending #1 on Google search for an online volunteering platform
- Coordinated website defects/bugs by partnering with developers, which reduced website downtime by 90%
- Collaborated with diverse teams and C-level stakeholders to design and execute data solutions aligned with strategic goals, fostering a data-driven culture and driving \$50k+ in annual cost optimizations.

Student Research Assistant | UB Bookstore

Apr 2022 – Apr 2023 | Bridgeport, CT

- Implemented pricing and discount models, increasing retention by 12%.
- Developed and executed 60+ manual and automated test cases in Excel and TestRail for POS modules.
- Automated repetitive test scenarios using Python scripts and Excel macros, reducing test time by 40%.
- Created Power BI dashboards summarizing daily transactions and refund trends for decision support.

IT Project Coordinator | Magnaquest

Jan 2021-Nov 2021 | India

- Supported telecom and subscription-based clients by managing device and accessories master data, ensuring data accuracy, synchronization, and readiness across CRM, billing, and provisioning systems.
- Wrote and optimized SQL queries for large-scale data analysis, identifying inconsistencies in telecom product catalogs and improving data quality and reporting reliability by 30%.
- Collaborated with telecom and subscription-based client product managers and QA teams to support device readiness testing and migration validation, ensuring system stability post-launch.
- Recommended and implemented a ticking workflow and SOP (Standard Operating Procedures) for seamless production support and customer experience that resulted in increasing customer ratings from 3.2 to 4.8 stars.
- Analyzed historical production defect data for 17 B2B clients, identified trends, and presented findings to product leaders through the Tableau visualization board to drive data-driven decisions for product enhancements.
- Developed and automated robust ETL pipelines with Azure Data Factory, streamlining data ingestion from multiple sources, ensuring 100% data consistency, and enabling seamless integration with downstream analytics systems.
- Monitored and prioritized system defects in Jira, achieving 98% SLA compliance.
- Collaborated with the QA team to execute regression, smoke, and system testing for SaaS product enhancements.
- Recommended automation scripts reduce testing cycle time by 28%.

Business Analyst | Magnaquest

May2020-Jan2021 | India

- Analyzed business and technical requirements and coordinated the RFP (Request for Proposals) response between Magnaquest and B2B clients for the SaaS products, bringing over \$50K in recurring revenue.
- Facilitated Agile ceremonies, ensuring seamless sprint execution and continuous improvement.
- Acted as a Scrum liaison, coaching teams on Agile best practices and fostering a culture of collaboration.
- Monitored sprint metrics and team performance to identify inefficiencies and implement corrective strategies.
- Spearheaded market research by analyzing CRM industry trends and target audience personas, resulting in the design of sales funnels and digital marketing campaigns that increased the sales conversion rate by 19%.
- Performed market analysis of CRM and telecom industry trends, optimizing campaign strategies and increasing conversion by 19%.
- Automated recurring telecom reports using Python (pandas) and Excel, cutting manual reporting time by 30%.

TECHNICAL SKILLS

- **Programming Languages:** C++, Python, SQL, MATLAB
- **Business Analyst:** Requirements Gathering, Gap Analysis, Technical/Functional Requirements Documents, wireframes, Process Flow, Dashboard, Data Analytics, Training, User Demo, Agile, Waterfall, Hybrid, Power BI, Tableau, Excel
- **Testing & Quality Assurance:** Manual Testing, Automation Testing, Test Case Design, Regression Testing, System-Level Testing, TestRail, JIRA, Jenkins, QNX, VEX, JFrog, LabView, Robot Framework, Appium
- **Methodologies & Practices:** Agile/Scrum, BDD, TDD, SDLC, STLC, Data-Driven Testing, Smoke Testing
- **Embedded & Vehicle Testing:** Vector CANoe, vSpy, DPS Tool, CAPL scripting, CAN/LIN/MOST/Ethernet protocols, OTA updates, VHAL
- **Mobile & Cross-Platform Testing:** Android Auto, Apple CarPlay, iOS & Android, cross-browser testing
- **Databases:** MySQL, SQL Server, PostgreSQL
- **Cloud & Platforms:** AWS (EC2, S3, RDS, CloudFormation)
- **IDEs & Development Tools:** Visual Studio, Visual Studio Code,
- **CI/CD & Version Control:** Jenkins, Docker, Kubernetes, Git, Bitbucket.

EDUCATION AND CERTIFICATIONS

MS in Business Analytics| April 2023 | University of Bridgeport,
Certified ScrumMaster® (CSM) | [Scrum Alliance](#)
Certified Salesforce Sales Operations | Coursera
[SAFe Certification](#)
[AWS Certified Cloud Practitioner](#)

Bridgeport, CT
