(Open to Relocate)

SUMMARY

Experienced **Data Engineer** with **3+** years of experience in data engineering, analytics, and AI-driven decision-making. Proficient in **Python**, and **SQL** with expertise in building **ETL pipelines**, optimizing databases, and extracting actionable insights from large datasets. Skilled in cloud technologies (**AWS**, **GCP**) and data visualization, improving operational efficiency and business strategy. Adept at collaborating with cross-functional teams to translate complex data into meaningful insights. **Actively seeking new opportunities** to drive data-driven decision-making and business impact.

AWARDS, RECOGNITION, CERTIFICATIONS

- [Salesforce Certified Administration](#)
- [AWS Certified Developer Associate](#)
- Global Agile Developer Certificate

WORK EXPERIENCE

DATAGURUS LLC

Remote, US

Data Engineer

May 2023 - Present

Developed an AI-powered data aggregator leveraging APIs to centralize information, streamlining data access and enabling faster analysis for generating actionable business insights.

- Designed a web scraping pipeline to extract and process **500K+** critical data points, providing high-quality inputs for AI-driven decision-making and improving model accuracy
- Implemented automated data **cleaning** and **reporting** processes using **Python** and **SQL**, reducing manual data preparation time by 30% and ensuring stakeholders receive accurate data insights faster
- Developed and maintained interactive **Tableau dashboards** to track key performance indicators in real time, allowing department heads to identify trends immediately and improving quarterly sales forecast accuracy by **15%**
- Employed **Python** for data validation and cleansing exercises, ensuring high data quality and integrity in preparation for analysis and reporting
- Engineered a **Retrieval-Augmented Generation (RAG)** model, refining search accuracy and optimizing response generation, reducing latency by 30%, and improving contextual relevance decision-making
- Built a dynamic **React-based chat** interface enabling real-time interaction with an **LLM model**, featuring persistent conversation history for easy context retrieval, boosting user engagement by **35%** and enhancing the overall experience
- Optimized dataset search and retrieval by integrating **Meilisearch** with **PostgreSQL** and **Redis** caching, reducing query response time by 40% and improving dataset discoverability
- Played a key role in architectural **brainstorming sessions**, contributing to critical **design** decisions for microservices, API communication, and search infrastructure
- Collaborated on **feature** planning and **roadmap** discussions, ensuring alignment between business goals, user needs, and technical feasibility
- Engaged with cross-functional teams to define key performance indicators (**KPIs**) and produced weekly executive performance reports, informing strategic decisions and contributing to a **15%** improvement in operational efficiency

INFOSYS LIMITED

Pune, India

Data Analyst / Data Engineer

Nov 2020 - April 2022

Client: British Telecom, UK

Migrated client infrastructure to a modern server farm by developing Python and Shell scripts for comprehensive data inventory, validity, and quality checks, followed by seamless traffic redirection to the new environment.

- **Migrated** enterprise data from Virtual Data Center (**VDC**) to Enterprise Cloud (**EC**), ensuring **99.9%** data integrity and zero downtime for clients like Fiat, PepsiCo, P&G, BBC, Nexus, and Rolls-Royce
- Automated **data validation** using Python (Pandas, NumPy) and SQL, reducing verification time by **60%** and improving migration accuracy

- Designed and implemented real-time **data synchronization** using Apache Kafka and AWS DMS, ensuring seamless database replication with zero data loss
- Optimized **cloud storage** costs by **30%**, leveraging AWS S3 lifecycle policies, Glacier for archival, and auto-scaling strategies
- Enhanced **security** and **compliance** by configuring IAM roles, encryption (AWS KMS), and audit logging (AWS CloudTrail), ensuring regulatory adherence
- Developed **monitoring dashboards** using Grafana and AWS CloudWatch, enabling proactive issue detection and reducing incident response time by 40%
- Decommissioned **100+** VDC servers, **automating** clean-up and archival processes using AWS Glacier, reducing infrastructure costs by 25%

PROJECTS

TV Show Success Predictor

- Built a real-time prediction platform analyzing **1M+** data points from Twitter, Reddit, and TMDB, using **Flask** and **MongoDB** to forecast TV show success based on genre, cast, sentiment, and social media buzz
- Achieved **85%+** prediction accuracy by implementing supervised **ML models** and **NLP** sentiment analysis on streaming Twitter and Reddit data, uncovering high-impact success factors
- Developed an interactive dashboard using **Dash** and **Plotly** with 10+ real-time visualizations, enabling users to filter and explore key insights with 1-second data refresh latency
- Reduced manual trend analysis time by **70%**, empowering TV stakeholders to make faster, data-backed decisions through actionable insights and dynamic visual storytelling

SmartSpend: Intelligent Expense Tracker

- Engineered a full-stack expense tracking system using **React**, **Spring Boot**, and **AWS**, managing **100K+** transactions efficiently
- Implemented secure **authentication** and **role-based** access control, protecting 100% of user data and ensuring personalized insights
- Built real-time **dashboards** with 5+ interactive charts, enabling users to track and optimize spending effortlessly
- Integrated AWS services (S3, RDS, Lambda) for **99.9%** uptime, ensuring scalability and secure data storage
- Optimized **API performance** and **database** queries, reducing response time by 40%, and enhancing user experience

E-Commerce Web Application

- Developed a full-stack e-commerce platform using **Angular**, **Spring Boot**, and **MySQL**, enabling seamless shopping with 10+ RESTful APIs
- Integrated secure authentication and role-based access control with **Okta**, ensuring protected transactions and personalized user experiences
- Optimized database queries and API performance, reducing response time by **30%** for a smoother shopping experience
- Implemented search, pagination, and cart persistence, enhancing UX for **1,000+** products and improving customer engagement

SKILLS

- **Programming Languages:** Python (Pandas, NumPy, Matplotlib), Java, Node.js, JavaScript
- **Data Analysis & Visualization:** Tableau, Power BI, Plotly, Dash, Excel (Pivot Tables, VLOOKUP)
- **Databases:** PostgreSQL, MySQL, Redis, MongoDB, Oracle Cloud
- **Data Engineering & ETL:** Apache Kafka, Apache Airflow, AWS Glue, Pandas ETL Pipelines
- **DevOps & Tools:** Kafka, Kubernetes, Docker, Git, Jenkins, Postman
- **Cloud Platform:** Amazon Web Services (AWS), Google Cloud Platform (GCP)
- **Development Frameworks & Libraries:** Spring Boot, Express, REST API, FAST API, GraphQL, Flask
- **Development Practices:** Full-stack Development, CI/CD Automation, Design Patterns, SDLC, Agile

EDUCATION

- **BINGHAMTON UNIVERSITY, SUNY** New York, US
MS in Computer Science Aug 2022 - May 2024
- **GURU GOBIND SINGH INDRAPRASTHA UNIVERSITY** Delhi, India
