

TENDULKAR MAHADEVAN

(949) 738-2090 | tendulkarmahadevan@gmail.com | <https://www.linkedin.com/in/tendulkarmahadevan/>

SUMMARY

Software Engineer with 2 years of experience building scalable, secure, and user-focused web applications. Proficient in JavaScript (ES6+), TypeScript, React.js, Node.js, and AWS. Skilled in CI/CD pipelines, cloud deployments, and full-stack development. Experienced in collaborating with cross-functional teams to deliver high-quality features that drive user engagement. Exposure to Python, A/B testing, and analytics tools with a strong interest in growth engineering. Eligible for U.S. employment on OPT/H-1B sponsorship.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, React.js, Node.js, Express, HTML, CSS, Svelte, Vue.js, Python
- **Databases:** MongoDB, DynamoDB, MySQL
- **Cloud & DevOps:** AWS (EC2, S3, IAM, CodeCommit, CodeDeploy, CloudFront), Microsoft Azure, GitLab CI/CD, Docker, PM2, Azure DevOps (Boards, Pipelines, Repos, Artifacts)
- **Analytics & Monitoring:** Google Analytics, Datadog, New Relic
- **Design & Tools:** Figma, Adobe Illustrator, Unity
- **Testing & Methodologies:** Unit testing, integration testing, Agile, exposure to TDD, A/B testing

PROFESSIONAL EXPERIENCE

Software Development Engineer, CStream Solutions (OPC) Private Ltd., Chennai, India. **Aug 2022 - July 2023**

- Designed and optimized CI/CD pipelines with GitLab and AWS, reducing deployment failures by 30%.
- Deployed and managed Node.js + React.js applications on AWS EC2 and S3, ensuring 99%+ uptime.
- Built secure, cloud-based integrations and implemented server-side optimizations for performance.
- Partnered with cross-functional teams (design, product, QA) to deliver scalable web applications.

Associate Software Engineer, CStream Solutions (OPC) Private Ltd., Chennai, India **Dec2021 - July 2022**

- Developed responsive, component-based interfaces in React.js improving usability and accessibility.
- Implemented Node.js + MongoDB/DynamoDB backends supporting scalable data persistence.
- Enhanced system performance by optimizing client-server architecture and asynchronous workflows.
- Contributed to solution design for SaaS applications, balancing technical feasibility with business needs

LEADERSHIP & UNIVERSITY INVOLVEMENT

Board of Directors - Graduate Student Representative, Associated Students Inc. (ASI), CSUSB **Jun 2024 – Jun 2025**

- Acted as a liaison for the graduate student body, providing structured feedback and strategic input during institutional governance proceedings.
- Collaborated Engaged in multi-stakeholder collaborations with academic leadership to influence policy decisions, formulation and enhance systemic frameworks affecting graduate-level engagement and success.

Research Ambassador, California State University, San Bernardino **Aug 2024 – Dec 2024**

- Supported the advancement of undergraduate and graduate research by facilitating outreach and engagement initiatives.
- Conducted Delivered workshops and presentations on foundational research methodologies, proposal development, and academic writing practices.

ACADEMIC PROJECTS

AI-Based Diabetic Retinopathy Detection Tool **May 2025**

- Consolidated 15 research papers to design an AI-based screening tool.
- Implemented data preprocessing, model evaluation, and visualization pipelines.
- Gained exposure to machine learning workflows and data-driven solutions.

Game Application for Children (Team Project) **Aug 2023**

- Developed an educational game in Unity to support early cognitive development in children.
- Orchestrated end-to-end project lifecycle via Azure DevOps ecosystem—leveraging Boards for sprint planning, Pipelines for CI/CD workflows, and Repos for modular codebase integration.

- Engineered front-end logic and UX heuristics in Figma to enable adaptive user behavior and responsive interface layers.

Bachelor of Engineering Project, Programmer

March 2021

- Performed metallurgical evaluation of EN19-grade substrates enhanced through surface metallurgical overlay with austenitic stainless steel under controlled thermal cycles.
- Implemented automated data acquisition systems using LabVIEW with integrated sensor feedback loops for real-time monitoring.
- Employed multi-environment computational tools (Python/MATLAB) for predictive analytics, signal processing, and microstructural trend analysis.

INTERNSHIPS | INDUSTRIAL TRAININGS

Engineering Trainee, Southern Railway - Arakkonam, India

Dec 2019

Underwent practical exposure across multidisciplinary units within the Engineering Workshops, involving operational systems and infrastructure-level evaluations.

Engineering Trainee, Chennai Port Trust, India

April 2019

Participated in immersive industrial orientation within the Electronic Data Processing Unit and the Electro-technical Division, observing integrated workflows across legacy and embedded systems.

EDUCATION

Master of Science, Computer Science

Aug 2023 - May 2025

California State University, San Bernardino, San Bernardino, CA

CGPA: 3.6/ 4

Bachelor of Engineering, Mechanical Engineering,

Aug 2017 - May 2021

Vel Tech Multi Tech Dr. Rangarajan Dr. Shakunthala Engineering College, TN, India

CGPA: 7.83 / 10

AWARDS AND ACHIEVEMENTS

CStream Solutions (OPC) Private Ltd.,

2022

Received the Quality Award for exhibiting exceptional workmanship in the Cstream project.

Cadd Cam Solutions, Secured the 3rd position in the Best Designer category during Design Hunt.

2019

I3 Tech Fest, Earned the 2nd spot in Cad Modelling during the technical event.

2019
