

CHRISTOPHER TERRA

RECENT GEOLOGY GRADUATE

(781) 724-3632; cterra413@yahoo.com

Objective: An entry-level environmental position seeking a technical, analytical, and interdisciplinary team-worker who thrives in both the field and the office and can present his data as effectively as he can gather it.

EXPERIENCE

STUDENT RESEARCH ASSISTANT (January 2013 – May 2015):

University of Massachusetts Amherst – Supervisors: Michael L. Williams, Haiying Gao, Stephen Mabee, Joseph Kopera

- Input data from field notes into digital archive
- Organize field maps
- Process seismological data from EarthScope stations using MatLab
- Process data obtained from electron microprobe to determine ideal locations for radiometric dating
- Prepare field samples for further observation by electron microscope and microprobe
- Upload field maps to GIS database
- Update field sample records in Excel

EDUCATION

BACHELOR OF SCIENCE (GEOLOGY): University of Massachusetts Amherst, Amherst, MA (2011-2015)
Cumulative GPA: 3.4, Major GPA: 3.7

INTEGRATED CONCENTRATIONS IN SCIENCE (iCons) (2011-2015): A selective, interdisciplinary academic program providing training in team-based problem solving, communication, and renewable energy research

SKILLS

GEOLOGICAL: Field mapping, structural analysis, sample and data acquisition and preparation, well monitoring, geophysical data analysis, risk analysis, hydrogeologic analysis, borehole investigation, technical writing, mineralogical/petrological analysis

TECHNOLOGICAL: GPR arrays, well setup, borehole setup, piezometer setup, Microsoft Office, Python, Matlab, terminal coding, Adobe Photoshop, microscope investigation, experienced using custom-made technology

PERSONAL: Comfortable presenting and writing to various audiences, experienced with working in interdisciplinary groups, excellent public speaker, well-organized, quick learner
