Profile

Motivated Software Engineer with 1 year of professional experience as a Full Stack Engineer. Experienced in developing scalable web applications, and integrating third-party APIs such as Stripe and WhatsApp. Skilled in database management with MySQL, PostgreSQL, MongoDB, and InfluxDB, and knowledgeable in MQTT protocols. Strong understanding of Agile methodologies, collaborative team workflows, and software engineering best practices. Adept at designing user-friendly interfaces and building robust backend systems. Committed to continuous learning, clean code, and delivering high-quality software solutions.

Professional Experience

JWare Automation (pvt) ltd, Nugegoda, Sri Lanka

Associate Software Engineer

Jul 2025 – Present

- **SR. Lobo** (ReactJS | NodeJS | ExpressJS | MySQL | Python | Home Assistant OS | MQTT | WebSockets | Socket.io)

Developed a court management platform with reservation scheduling, member engagement, and real-time light control using Home Assistant OS, MQTT, WebSockets, and Socket.IO. Integrated Playtomic and Syltek APIs, Stripe payments, WhatsApp signup, email notifications, and match boosting features, improving booking efficiency by 30%, increasing player participation by 25%, and reducing manual lighting operations by 90%.

Trainee Software Engineer

May 2025 – Jul 2025

- **Cuscen AI Integration** (ReactJS | Flask | MySQL | OpenAI)

Contributed to the development of an AI-powered chatbot integration, enhancing user interaction with intelligent conversational features. Implemented CRUD operations for function and parameter management and developed secure authentication and authorization using JWT tokens.

Intern Software Engineer

Dec 2024 – May 2025

- **Casi io** (ReactJS | NodeJS | ExpressJS | MySQL | InfluxDB | MQTT)

Contributed to developing a customizable dashboard solution for industrial workspaces with real-time data integration from MQTT brokers and InfluxDB. Implemented interactive drag-and-drop widgets, dynamic settings, and real-time alarm notifications, reducing monitoring response time by 40%. Integrated Stripe API for secure payment processing, enabling 100% automated billing workflows.

Sri Lanka Police IT Division, Colombo, Sri Lanka,

Dec 2023 – Jun 2024

Intern Software Engineer

- **Incident Management System** (ReactJS | SpringBoot | MySQL | Tailwind CSS)

Developed an incident management system for Sri Lanka Police, streamlining complaint handling and case tracking. Designed system architecture, created UIs in Figma, and implemented dashboards, evidence tracking, visit logging, reporting, court records management, and case timeline visualizations.

Technical Skills

Programming Languages — HTML | CSS | JavaScript | Java | PHP | Python | C | C++

Frameworks & Libraries — ReactJS | NodeJS | Spring Boot | Flask | Laravel

Databases — MySQL | PostgreSQL | MongoDB | InfluxDB

Version Control — Git

Familiar Operating Systems — Linux | Windows | Home Assistant OS

Other — MQTT | Telegraf | GitHub | Figma | Stripe API | AWS | Socket.io | Jira | Material-UI | Tailwind CSS

Projects

Postgraduate Program Review,

Jun 2023 – Nov 2023

3rd Year Group Project, (ReactJS | Laravel | MySQL | Material-UI)

Developed a web application to digitize and streamline the Postgraduate Program Review process for the Quality Assurance Council. Involved in full development lifecycle, including system architecture, detailed diagrams, UI design with Figma, and implementation of reviewer dashboards. Key features included appointment scheduling, evaluation workflows, chairperson assignments, criteria distribution, and detailed reporting.

Website and Online system for Chilaw Pradeshiya sabha,

May 2022 – Apr 2023

2nd Year Group Project, (PHP | MySQL | CSS | JavaScript)

Developed a digital platform for Chilaw Pradeshiya Sabha combining a public website and administrative system for complaint management and library operations. Participated in full development lifecycle including system architecture, detailed diagrams, and UI design. Key features included citizen engagement via contact page, library member interfaces with book catalog browsing, favorite lists, borrowing requests, new book acquisitions, and automated overdue fine calculations.

Education

BSc. in Computer Science,

Apr 2021 – Oct 2024

University of Colombo School of Computing, Colombo, Sri Lanka

Software Engineering | Data Structures & Algorithms | Object Oriented Programming | Databases | Rapid Application Development | Functional Programming | Human Computer Interaction | Middleware Architecture | Mobile Application Development | Software Quality Assurance

G.C.E Advanced Level | Physical Science Stream,

Aug 2019

Ananda College, Colombo, Sri Lanka

Results: ABB

G.C.E. Ordinary Level, Ananda College, Colombo, Sri Lanka

Dec 2015

Results: 9 A's

Certificates

- | | |
|--|--|
| - AWS Educate Introduction to Cloud 101 (AWS Educate) | - The Ultimate Python Guide for Beginners (Udemy) |
| - Mastering The Complete Agile Scrum Master Workshop (Udemy) | - Programming in Python (Department of Computer Science & Engineering, University of Moratuwa) |

Soft Skills

- | | |
|--|---|
| - Effective teamwork in agile development environments | - Systematic approach to debugging and optimization |
| - Quick learning of new technologies and methodologies | - Strong project management and deadline adherence |
| - Attention to detail and commitment to best practices | - Initiative-taking and mentoring junior team members |

Languages

English

Sinhala

Extra Activities

Worked as crew member at Gamma Pizzakraft Lanka (pvt) ltd

Sep 2019 – Jan 2021
