SUMMARY

- Financial Analyst with 3+ years of experience across healthcare and investment banking, delivering high-impact financial insights, cost forecasting, and valuation support across portfolios worth \$2M–\$5M.
- Built 30+ advanced Excel models including DCF, LBO, PMPM, and 3-statement projections; automated reporting processes to save 200+ hours/quarter and boost decision speed for cross-functional teams.
- Led claims and variance analysis on Medicare Advantage and chronic care datasets, identifying \$2.3M+ in cost anomalies and enabling 17%+ corrective impact through predictive modeling and stakeholder alignment.
- Created 15+ executive dashboards and investor decks using Power BI and PowerPoint integrated with SQL/Excel outputs, driving strategic visibility across M&A, budgeting, and portfolio performance reviews.
- Demonstrated ability to translate financial data into clear business insights, supporting budgeting, forecasting, and cost optimization across multi-functional teams.
- Experienced in collaborating with finance, operations, and analytics teams to align on performance drivers, reporting accuracy, and data integrity under tight timelines.

EXPERIENCE

Humana | Financial Analyst

Aug 24 - Current

- Analyzed **multi-million dollar** monthly Medicare Advantage claims across inpatient, outpatient, and pharmacy categories, identifying \$2.3M in anomalies and supporting 17% cost correction through collaboration with medical economics.
- Forecasted medical cost trends across **multiple regional plans** using historical claims and utilization data, improving forecast accuracy by 22% year-over-year and aiding reserve planning for finance teams.
- Built **12+ automated Excel models and Python scripts** for PMPM (Per Member Per Month) cost forecasting and churn analysis, reducing manual reporting effort by 120+ hours monthly.
- Reduced claims lag and payment delay cycle time by 14% through root cause analysis of 30K+ authorization records, supporting **\$700K** in improved quarterly working capital flow.
- Developed 10+ Power BI dashboards integrated with SQL Server, tracking MLR, HEDIS, and chronic care utilization KPIs, improving cross-team visibility and shortening decision cycles by 2.5x.
- Partnered with actuarial and population health teams to analyze 5,000+ high-cost member cases, identifying 3 chronic conditions responsible for 41% of PMPM overruns and helping enable targeted care efforts.
- Supported Humana's annual planning cycle for a **large-scale business unit**, preparing 25+ monthly reports on cost trends and variance drivers, contributing to 12% improvement in budget alignment.

7FinCorp Group | Financial Planning & Analyst

May 2020 - Jul 2022

- Built and maintained 20+ complex Excel models including DCF, LBO, and 3-statement operating models for live and proposed M&A deals valued between \$2M–\$5M, enabling real-time valuation updates for senior bankers.
- Automated recurring benchmarking and valuation comps using advanced Excel formulas, named ranges, and lookup functions, reducing deck preparation time by 40% and improving consistency across 15+ pitchbooks.
- Performed detailed scenario and sensitivity analysis on revenue growth, margin shifts, and leverage assumptions, supporting deal structuring decisions and providing coverage for 8+ client sectors.
- Created structured Excel dashboards and summary tabs that linked dynamic data pulls with formatted outputs, saving 100+ analyst hours per quarter on financial snapshot prep and board-level output.
- Consolidated and analyzed financials for 30+ public companies to generate peer comps, EBITDA multiples, and valuation ranges, contributing to investment memorandums for 6 live mandates.
- Integrated Excel outputs into client-ready PowerPoint pitchbooks, aligning visuals with narrative points and ensuring all financial KPIs and charts updated automatically pre-delivery.
- Used pivot tables, array formulas, and dynamic charts to track earnings surprises, analyst revisions, and share price performance, supporting insights in 10+ investor presentations and buy-side screening notes.

SKILLS

Financial Modeling & Analysis: Financial Modeling, Budgeting, Forecasting, Variance Analysis, Scenario Analysis, Sensitivity Analysis, Cost-Benefit Analysis, DCF, IRR, Regression Analysis, Trend Analysis, Profitability Analysis

Data Analysis & Reporting: Data Visualization, Data Mining, ETL, Statistical Analysis, Data Warehousing, KPI Reporting, Dashboard Development, Power BI, SQL, Excel (VBA, Macros, Pivot Tables), Data Storytelling

Database Management & Automation: SQL, Data Pipelines, Database Design, Query Optimization, Stored Procedures, Data Integration, Process Automation, Excel Automation, Power Query, Data Governance, Data Security

Business & Financial Acumen: Financial Planning, Pricing Strategy, Underwriting, Cost Reduction, Process Improvement, Regulatory Reporting, Audit Compliance, Internal Controls, Stakeholder Management, Budget Management, Financial Risk Management

EDUCATION

Wilmington University

Master of Science: Information Systems and Technology

Wilmington, DE

Jan 2023 - Dec 2024
