SUMMARY

Financial Data Analyst with 4+ years of experience delivering automated financial reporting, predictive forecasting, and business intelligence solutions across global tech and finance environments. Expert in leveraging Python, SQL, Power BI, and cloud platforms (Azure, AWS, Snowflake) to optimize data workflows, enhance reporting accuracy, and support strategic financial planning. Proven record of improving data delivery efficiency by 35%, reducing manual effort by 40%, and increasing forecast precision by 18%. Strong collaborator skilled in transforming complex financial data into actionable insights that drive growth, compliance, and operational excellence.

EXPERIENCE

Financial Data Analyst | Doublene, USA

Jan 2024 – Present

- Built and optimized automated ETL pipelines with SQL and Power BI, improving financial data delivery speed by 35%, ensuring accurate and real-time reporting across departments.
- Led financial process automation using Python (Pandas, NumPy) and API integrations, reducing manual processing by 40% while enhancing overall reporting reliability and system efficiency.
- Developed data-driven forecasting models using machine learning algorithms to predict revenue and cost trends, improving forecast precision by 18% and supporting strategic financial planning.
- Implemented finance automation tools such as Alteryx, Power Automate, and Python scripts to streamline month-end closing, reconciliations, and reporting workflows, saving 20+ hours per cycle.
- Designed interactive Power BI dashboards to visualize KPIs, operational performance, and financial trends, empowering leadership with actionable insights for faster decision-making.
- Enhanced data accuracy and compliance through automated validation frameworks and audit controls, ensuring 100% adherence to GAAP and SOX financial reporting standards.

Business Data Analyst | Techcity, India

Feb 2021 – Apr 2023

- Delivered advanced Power BI dashboards and financial data models that enhanced visualization accuracy and stakeholder accessibility by 30%, driving faster, data-driven decisions across multiple business functions.
- Defined comprehensive data and reporting requirements for cross-functional teams, aligning BI strategies with organizational objectives and improving project delivery timelines and efficiency by 25%.
- Implemented scalable data integration pipelines using Azure Data Factory and Python-based automation, streamlining enterprise-wide data flow and improving overall process efficiency by 30%.
- Developed optimized SQL queries and stored procedures to automate ETL workflows, reducing manual reporting efforts by 25% while boosting query and system performance by 20%.
- Managed complete Power BI workspace administration, ensuring secure access control, high report availability, optimized dashboard performance, and maintaining consistent 100% system uptime for end users.
- Generated actionable, data-driven insights and KPI reports supporting strategic growth initiatives, resulting in improved operational metrics, better visibility, and a 15% increase in business performance.
- Performed ad-hoc analyses using Python (Pandas, PySpark) to identify trends and improve financial forecasting accuracy by 18%.

SKILLS

- Financial Data & Reporting:** Financial Forecasting, Variance & Trend Analysis, Budgeting & Planning, Month-End Closing Automation, Revenue & Profitability Analysis, GAAP & SOX Compliance
- Automation & Integration:** Finance Process Automation, Data Validation Scripts, API-Based Data Sync, Workflow Optimization, Automated Reconciliation Systems
- Business Intelligence & Data Analytics:** Dashboard Development, KPI Tracking, Data Modeling, Data Warehousing, Business Insights, Predictive Analytics, Data Mining, Anomaly Detection, Report Automation
- Machine Learning & Advanced Analytics:** Time-Series Forecasting, Regression Modeling, Feature Engineering, Model Evaluation, AI-Driven Financial Automation, Python ML Libraries (Scikit-learn, Statsmodels)
- Programming & Tools:** SQL (T-SQL, PL/SQL), Python (Pandas, NumPy, PySpark), RPA Tools (UiPath, Power Automate), VBA, ETL/ELT Pipelines, API Integration, Data Automation Frameworks
- Cloud & Data Platforms:** Azure Data Factory, AWS Redshift, Snowflake, Power BI Service Administration, Workspace & Access Management, Data Governance Frameworks
- Risk & Compliance:** Data Accuracy Controls, Audit Reporting Automation, Financial Risk Monitoring, Compliance Frameworks (SOX, GAAP), Error Detection Algorithms
- Communication & Collaboration:** Data Storytelling, Stakeholder Engagement, BI Training & Enablement, Cross-Functional Collaboration (Finance, Product, Engineering), Technical Documentation, Agile Methodologies
- Software:** Excel (Advanced), Power BI, Tableau, SAP, Oracle NetSuite, QuickBooks, Excel Power Query, Excel PivotTables, Excel Macros, Google BigQuery, AWS Cloud Services, Azure

EDUCATION

Master in Business Analytics

May 2023 – Nov 2024

University of Saint Peters University, NJ, USA

Bachelor of commerce

Jun 2019 – Jul 2022

Avinash Degree College, Telangana, India

CERTIFICATION

- Data Analyst Training Program – Agile IT Tech
- Business Analyst Training Program – Agile IT Tech
