

Profile

Data Analyst and Data Scientist with expertise in data mining, validation, and reconciliation to support business decisions. Proficient in Tableau, Power BI, Python, SQL, and SAS, skilled in developing predictive systems, creating actionable dashboards, and collaborating with teams to enhance data integrity, operational efficiency, and decision-making and delivering actionable business insights.

Skills

Technical Skills: Python (Pandas, NumPy, Scikit-Learn, TensorFlow), SQL (joins, triggers, stored procedures), SAS, Tableau, Power BI, MS Excel, Git, SDLC.

Data Analytics: Data Transformation, Data Warehousing, ETL, Data Modeling, Data Visualization, User Acceptance Testing, Report Generation.

Statistical Modelling: K-means Clustering, Regression Analysis, A/B testing.

Business Intelligence Tools: Tableau, Power BI (DAX), SQL Server.

Cloud Environment: Azure, ADF.

Work Experience

Ohio Department of Health

Data Analyst

Columbus, Ohio

Sep 2023 - Present

- Conducted data validation, auditing, and reconciliation for 5,000 medical claims using SAS, uncovering discrepancies and increasing data accuracy to 98%, supporting financial decision-making.
- Designed and maintained Tableau dashboards to visualize patient viral load metrics, providing stakeholders with actionable insights for funding distribution and improving healthcare outcomes.
- Utilized SQL and SAS to optimize query performance, reducing data retrieval times by 20% and enhancing efficiency in processing complex data sets.
- Partnered with cross-functional teams to develop data models and dashboards, driving a 25% improvement in resource planning and allocation across healthcare programs.
- Collaborated with IT and clinical teams to implement advanced data strategies, achieving a 30% increase in operational efficiency and resource utilization.

Coincent

Data scientist intern

Bangalore, India

May 2023-Jun 2023

- Conducted statistical analysis and developed a predictive model, analysing customer feedback responses, resulting in a 20% increase in customer satisfaction.
- Employed Python for data analytics, processing data points, resulting in a 15% improvement in business growth analysis.
- Created data Pipelines/ETL in ADF using Linked Services to Extract, Transform using spark, and load data from different sources like Azure SQL, Blob storage, and Azure SQL Data warehouse.

Chemol Technologies

Data Analyst

Hyderabad, India

Jan 2021 - Jul 2022

- Engineered and optimized SQL queries to enhance data accuracy by 20%, reducing processing inefficiencies and improving reporting precision
- Deployed automated ETL pipelines, reducing data extraction times by 50% and ensuring scalable solutions for large datasets
- Utilized Python libraries, including Pandas, to automate data normalization processes, cutting preparation time by 70% and improving data quality
- Created 30+ data visualizations using Matplotlib to present trends, variances, and performance metrics, enabling actionable insights for quarterly reviews
- Designed Power BI dashboards to track KPIs and measure business performance, leveraging advanced calculations to improve decision-making efficiency by 30%.

Hindustan Aeronautics Ltd (HAL)

Operational/Reporting Intern

Koraput, India

May 2019 - Jun 2019

- Generated comprehensive reports summarizing test findings, including performance metrics, trends, and comparisons.
- Analyzed and structured over 10,000 rows of aircraft efficiency data into comprehensive pivot tables using advanced Excel functions; findings identified causes of operational inefficiencies, leading to targeted improvement measures.

Projects

Animal Protective

Feb 2023 - Apr 2023

- Designed interactive Power BI dashboards and reports for stakeholders using Business Intelligence Products Power BI, resulting in fundraising of a 10% increase in animal adoption fees by providing actionable analytical solutions.
- Analyzed historical pet adoption fee data and market trend to project potential funds generated, improving financial forecasting accuracy by 20% and enabling precise resource allocation for animal welfare initiatives.

Public Utility Data Liberation (Machine learning, Python, Descriptive analytics)

Oct 2022 - Dec 2022

- Pre-processed and analysed over 500,000 records using Python to enhance data quality and provide actionable insights for fuel pricing optimization.
- Applied a Random Forest Regressor to model fuel price trends, achieving an R^2 score of 0.87 and a Mean absolute Error (MAE) of 3.5, indicating high model accuracy and low prediction error.

Identification of Churners (Machine learning, R, Predictive Analytics)

Oct 2022 - Dec 2022

- Conducted predictive analytics using Logistic Regression and XGBoost Classifier to identify churners within a dataset of over 100,000 records.
- The XGBoost model achieved an AUC-ROC score of 0.94, F1-score of 0.91, and an Accuracy of 93%, outperforming baseline models by 18%.

Education

Kent State University

MS, Business Analytics

Dec 2023

Certifications

Tableau certification: Introduction & Advanced

Fundamentals of Python: Basic programming

Hacker Rank - SQL Intermediate: Designing, optimizing, and maintaining databases

Lean six sigma
