

TIMOTHY B. MOSER

Shippensburg, Pennsylvania 17257 | (717) 818-1392
timbmoser@gmail.com | www.linkedin.com/in/timothybmoser/

SUMMARY

A versatile and results-driven software engineer with experience in quality assurance, cloud services, workforce development, machine operations, and business administration. Proven ability to develop customer-focused services that build platform security and reduce faults. Employs keen attention-to-detail to identify patterns and fallbacks within the system before implementing improved processes. Established track record in researching new technologies and industry trends for potential integration. Comprehensive expertise developing innovative strategy and architecture that streamlines app performance, improves efficiency, and supports business objectives.

TECHNICAL SKILLS

- **Languages and Frameworks:** C++, C#, Java, Python, OCaml, .NET Core, RESTful APIs, Entity Framework Core
- **Web Technologies:** HTML, JavaScript, jQuery
- **Testing and Quality:** xUnit, Moq, TDD, Exception Handling, Unit Testing
- **Cloud and DevOps:** AWS (S3, Athena), Docker, Terraform, New Relic, Splunk
- **Messaging and Data:** Kafka, SQL, LINQ, R
- **Tools and Platforms:** Microsoft Office Suite, Visual Studio, Visual Studio Code, Rider, IntelliSense, MongoDB, GitHub, Bitbucket, Jira, Azure DevOps, Confluence

EXPERIENCE

LISTRAK Lititz, Pennsylvania
Associate Software Engineer 2024-2025

- Developed scalable .NET integrations for client-facing marketing services, ensuring high availability and fault tolerance.
- Collaborated in mob, pair, and solo programming settings to accelerate development and promote shared codebase ownership.
- Practiced test-driven development, resulting in robust, maintainable unit test coverage.
- Deployed cloud-native services, using AWS, Terraform, and New Relic, emphasizing performance, observability, and infrastructure.
- Built containerized services with Docker and leveraged Kafka to implement event-driven architectures for scalability.
- Researched technologies for potential integration, contributing to platform innovation strategy.
- Implemented resilience patterns, including retries, circuit breakers, and fallbacks to handle faults in distributed systems gracefully.
- Applied Agile methodologies to manage sprints and improve team velocity.
- Maintained integrations between company and clients and managed data to and from each party.
- Implemented changes to ensure security, performance, and reliability.
- Researched usefulness of different techs for potential use for company within processes worked on by team.

WESTFALIA TECHNOLOGIES York, Pennsylvania
Developer Intern 2024

- Developed full-stack SPA for employee timekeeping, using .NET Core, Entity Framework Core, and RESTful APIs.
- Designed MVC architecture to abstract data and streamline app performance.
- Built SQL- and LINQ-based CRUD operations for data entry and retrieval.
- Refactored legacy code to enhance readability, maintainability, and system performance.
- Managed data / security and built an in-house timekeeping system from ground up for end users.

THE MAPLE PRESS COMPANY York, Pennsylvania
Lead Digital Operator 2013-2022

- Supervised daily operations in high-volume print production environment, ensuring timely delivery and quality standards.
- Trained team members in new processes, improving cross-training and efficiency.
- Streamlined workflows between departments to increase operational effectiveness.
- Printed book covers, maintained machines and inventory, and ensured efficient delivery and manufacturing of product orders.
- Implemented system to greatly reduce color errors for book covers from machine malfunctions.

EDUCATION

MILLERSVILLE UNIVERSITY, Millersville, Pennsylvania
B.S., Computer Science, 2024
B.S., Business Administration, 2012
