Summary

Experienced Java Full Stack Developer proficient in Java, Spring Boot, Hibernate, React, Angular, and SQL, with a strong foundation in RESTful API design and Microservices architecture. Skilled in developing scalable, high-performance web applications and optimizing system efficiency across full-stack layers. Hands-on experience with cloud platforms and Agile methodologies, with a focus on continuous integration, innovation, and problem-solving.

Education

University Of Central Missouri

May 2025

Masters in Engineering Sciences(Computer Science); GPA:3.54

Warrensburg, MO

Course Work: Advanced Database Systems, Advanced Operating Systems, Compiler Design and Construction , Advanced Algorithms, Neural Network and Deep Learning, Big Data Analytics (Spark, Hadoop).

NRI Institute Of Technology , Agiripalli

May 2022

Bachelors in Computer Science Engineering; GPA:3.51

Agiripalli(M), Vijayawada(R), India

Experience

Project Engineer

May 2022 – July 2023

Wipro

Hyderabad, India

- Designed and sustained high-performance, scalable web applications in the healthcare domain using Java Full Stack technologies (Java, Spring Boot, Angular/React, RESTful APIs), leading to a 25% improvement in system throughput and significantly enhancing operational efficiency across core modules.
- Developed RESTful APIs using Spring Boot within a Microservices architecture, reducing data access latency by 40% . Implemented dynamic, component-driven front-end interfaces with Angular, which improved user experience and contributed to a 30% boost in customer engagement and interaction rates.
- Partnered with cross-functional teams including QA, DevOps, and Product Management to deliver robust, production-ready solutions, achieving 100% on-time delivery across all project milestones.

Java Developer Intern

Jan 2022 – May 2022

Wipro

Hyderabad, India

- Developed and maintained 5+ full-stack web applications using Java, Spring Boot, Hibernate, and RESTful APIs, implementing scalable and high-performance backend services that improved system efficiency by 20%.
- Wrote clean and efficient Java code, applying OOP principles and adhering to industry best practices, improving code readability and maintainability. Collaborated with senior developers in an Agile environment, participating in daily stand-ups, sprint planning, and code reviews to enhance software quality.
- Developed and executed unit and integration tests using JUnit and Mockito, ensuring 80%+ test coverage and minimizing application defects. Worked with SQL databases to design and optimize queries, reducing data retrieval time by 25% through indexing and query optimization.

Projects

ECO BLOOM

August 2024

- Developed ECO BLOOM, a web-based platform simplifying the process of buying plants and managing plant-related services, fostering eco-friendly living for 500+ users.
- Addressed challenges of finding plant categories in local stores and improved order and inventory management efficiency by 40% through a centralized, user-friendly solution.
- Integrated real-time order tracking, category filters, and a future roadmap for wishlist functionality, enhancing user engagement by 30%.

Crop Yield Predictor

April 2022

- Developed the Crop Yield Predictor, an advanced system assisting 1000+ farmers in determining the most profitable and productive crops based on environmental factors.
- Analyzed key factors, including soil type, pH levels, weather, temperature, rainfall, and nutrient values, achieving a prediction accuracy of 85%, ultimately increasing agricultural productivity by 20%.
- Delivered actionable insights into crop suitability, enabling better agricultural decisions and increasing farmer profitability by 25%.

Skills

Programming Languages: Java, Python, SQL, C++

Web Development: HTML, CSS, JavaScript, Angular, React

Tools & Frameworks: Spring Boot, Node.js, Microservices

Databases: MySQL, MongoDB

Others: Git, Docker, AWS
