SUMMARY

Analytical and detail-oriented Data Analyst skilled in converting raw data into strategic insights that enhance business performance. Proficient in Python, R, SQL, and Power BI, with strong experience in machine learning, predictive analytics, statistical modeling, and data visualization. Recognized for improving data workflows, automating reporting processes, and presenting insights that drive informed decision-making across teams. Actively seeking an Data Analyst role where I can apply my technical expertise, problem-solving mindset, and passion for data-driven innovation to support organizational growth.

EDUCATION

Master of Science in Business Analytics

Aug 2025

University of Louisville, Louisville, Kentucky | GPA: 3.97/4.0

Bachelor of Business Administration

May 2023

King's College, Kathmandu, Nepal | GPA: 3.98/4.0

RELEVANT COURSES

Machine learning | Data visualization with Power BI | R for Analytics | Healthcare Analytics | Predictive Analytics |

TECHNICAL SKILLS

- **Data Visualization:** Power BI(DAX), Microsoft Excel, ggplot2, matplotlib, seaborn, looker
- **Programming & Analytics:** Python R, SQL, Splunk, SharePoint, Power Query, Alteryx, SQL (Microsoft SQL Server - SSRS, PostgreSQL, MySQL)
- **Data Wrangling & Cleaning:** Data preprocessing, handling missing values, outliers' detection, data normalization
- **Statistical Modeling & Machine Learning:** Descriptive & Inferential Statistics, Regression Analysis, A/B Testing, Hypothesis Testing, XGBoost, Random Forest, Decision Trees, K-Nearest Neighbors, Clustering (K-Means), Model Evaluation (Confusion Matrix, ROC, AUC)
- **Business Intelligence:** Dashboard development, KPI tracking, performance reporting, Data Modeling, Power Automate
- **Databases & ETL tools:** ETL Pipelines, SQL Server Integration, CSV/ERP Integration, Microsoft Dynamics CRM, Data Cleaning,
- **Cloud Databases:** PostgreSQL Database/Datalake, Snowflake
- **Finance & Accounting:** Financial Reporting, General Ledger, Budgeting, Forecasting, Payroll Processing
- **Logistics & Warehouse Tools:** WMS, Provia, Evavi, Report Server, KPI tracking • **Soft Skills:** Problem Solving, Critical Thinking, Communication, Team Collaboration, Adaptability

PROFESSIONAL EXPERIENCE

Business Analyst (June 2025 – Present)

Tellworks Logistics, Jeffersonville, Indiana, USA

- Developed and executed SQL queries to extract, analyze, and validate inventory, replenishment, and slotting data for daily operational and performance reporting.
- Automated workflows with Alteryx to generate reports and ASN files, improving shipment visibility, data accuracy, and warehouse receiving efficiency.
- Managed and updated Smartsheet reports to track inbound and outbound orders, slotting performance, and inventory movement across multiple warehouse locations.
- Supported the IT and operations teams in identifying and resolving data-related issues by troubleshooting order discrepancies, investigating system errors, and running validation queries.
- Responded to and resolved operations-facing support tickets, ensuring timely updates on order status, data synchronization, and shipment progress between ERP and WMS systems.
- Executed SQL-based tracking queries to monitor order shipment status and proactively flagged exceptions for operations management, reducing issue resolution time by 25%.
- Collaborated with cross-functional teams to enhance slotting accuracy, replenishment timing, and system data integrity for continuous process improvement.

Data Analyst Intern (Jan 2025- June 2025)

Papa John's, Commerce Platform team, USA

- Cleaned, validated, and structured raw data from Splunk logs and ERP systems using python, enabling accurate reporting and supporting the analytics team in reducing order-related issues. Used Python for statistical analysis of prep-to-delivery times across various locations; identified underperforming stores exceeding SLA by 20%,

implemented targeted insights that reduced average delivery time by 12%, and communicated findings to cross functional stakeholders to drive process improvements.

- Communicated performance trends and insights through clear data storytelling, enabling data-driven decisions and strategic improvements across technical teams and senior leadership.
- Contributed to building a machine learning model using XGBoost to classify delayed orders, performing feature engineering on order timestamps, fulfillment metrics, and store performance data to improve prediction accuracy and operational response.

Business Analyst Intern

Speed Art Meseum, Louisville, Kentucky, USA (Nov 2024- Jan 2025)

- Designed and deployed end-to-end ETL pipelines to extract, transform, and load visitor, survey, and ticketing data into centralized reporting systems.
- Automated survey processing using Python and implemented sentiment scoring, reducing manual effort by 40% and enhancing analysis accuracy.
- Developed interactive Power BI dashboards to track attendance, satisfaction, and demographic engagement, informing programming decisions and increasing community participation by 15%.
- Queried ERP and attendance databases using SQL to monitor program reach and operational trends, supporting targeted outreach strategies.
- Collaborated with cross-functional teams to enhance reporting workflows, implement centralized feedback tools, and standardize documentation boosting data visibility and response planning.

Financial Analyst (May 2022- June 2023)

Safal Import and Export, Kathmandu, Nepal

- Created interactive dashboards in Excel using Power Pivot and Power Query to compare Year-to-Date (YTD) performance across departments, enabling leadership to monitor financial trends and identify areas for intervention.
- Utilized advanced Excel formulas (INDEX-MATCH, SUMIFS, IFERROR) to automate financial reconciliations, streamline variance analysis, and ensure accurate monthly reporting across key accounts.
- Assisted in preparing and presenting financial statements to senior management, translating complex data into clear insights to support strategic planning and executive decision-making.

CERTIFICATION

- Google Analytics Certification
- The Trade Desk Marketing Foundations Certification
- Advanced Machine Learning Projects – Practical implementation using Python, Scikit-learn, and XGBoost
- Alteryx Designer Core Certificate

ACADEMIC PROJECTS

- **Course Title –Healthcare Analytics:** ONC Infusion Center Monte Carlo Simulation: Built a Monte Carlo simulation model to forecast patient infusion visits and evaluate capacity constraints. Conducted market share analysis across Kentucky counties.
- **Course Title – SQL Database Analysis Project:** Gourmet Haven Analytics: Worked in a group to analyze Gourmet Haven's customer and transaction database using MySQL. Wrote advanced SQL queries including JOINS, CTEs, subqueries, window functions, and aggregate functions to evaluate customer interactions and purchase behavior. Created summary tables and views for KPI reporting such as customer frequency, average order value, and product performance
