

KSHATRI TRIPURA SUPRAJA

Data Analyst

Alabama, USA | +1 659-206-1646 | tripurasupraja3@gmail.com | [LinkedIn](#)

Summary

Data Analyst with around 3 years of experience in SQL, Python, R, and advanced visualization platforms Tableau and Power BI. Expertise in building scalable ETL pipelines, data warehousing using Snowflake and Redshift, and applying machine learning techniques such as Logistic Regression, Random Forest, and XGBoost. Skilled in statistical analysis, data modeling (Kimball, Star Schema), and cloud solutions such as AWS Glue and Lambda. Proven ability to improve pipeline execution times by 35%, enhance churn prediction accuracy by 15%, and deliver actionable insights through dashboards and predictive models that drive business decisions. Experienced in customer segmentation, predictive marketing, and automation of data workflows to optimize efficiency.

Education

Master in Computer and Information Science: Information Systems University of Alabama at Birmingham, Alabama, USA	Dec 2024
Bachelor of Engineering: Electronics and Communication Institute of aeronautical engineering, Dundigal, Telangana, INDIA	July 2022

CERTIFICATIONS

- Accomplished Python Fundamental certification by Udemy
- Mastered data manipulation, analysis, and visualization using Panda's library in Python through hands-on projects
- Acquired skills in SQL querying, data extraction, and manipulation specifically for data science applications
- Gained comprehensive skills in Excel, including data analysis, pivot tables, and advanced function
- Learned to create data visualizations and dashboards using Tableau, from basics to advanced features

Skills

- Programming Languages:** SQL, Python, R, VBA
- Visualization Tools:** Tableau, Power BI, Looker, Plotly, Excel
- ETL Tools:** AWS Glue, Informatica, PySpark, Apache Airflow, SSIS
- Data Warehousing:** Snowflake, Redshift, Big Query, Azure SQL Data Warehouse
- Data Modelling:** Kimball, Star Schema, Data Vault
- Machine Learning:** Scikit-learn, TensorFlow, PyTorch, LightGBM, XGBoost, K-Means Clustering
- Cloud & Automation:** AWS (Glue, Lambda, S3, CloudWatch), Automation Workflows
- Optimization & Testing:** Time-Series Forecasting, A/B Testing, Workflow Automation, Data Validation, Feature Engineering

Experience

DXC Technology, USA Data Analyst	Nov 2024 - Current
- Effectively collaborated with cross-functional teams, including business analysts, developers, and project managers, to implement SDLC processes and Agile methodologies, ensuring seamless integration of deliverables and on-time project completion. - Conducted advanced statistical analyses such as linear and logistic regression, ANOVA, and hypothesis testing to identify key performance drivers, resulting in a 20% reduction in production defects and enhanced decision-making accuracy. - Designed and automated intricate Excel models and VBA macros to streamline data transformation, analysis, and reporting processes, achieving a 40% reduction in report generation time and improving data accessibility. - Led a multidisciplinary team through a high-impact data analytics project, employing Agile sprints and stakeholder feedback to achieve a 15% improvement in project delivery timelines while exceeding quality benchmarks. - Generated insightful and dynamic data visualizations using Matplotlib, Seaborn, and ggplot2 (R), facilitating effective communication of complex insights to both technical and non-technical stakeholders.	
Mphasis, India Data Analyst	Jun 2020 – Dec 2022
- Collaborated with cross-functional teams and stakeholders to implement SDLC best practices and Agile methodologies, ensuring streamlined project execution and enhanced adaptability to changing requirements. - Conducted advanced statistical analyses, including multivariate regression, ANOVA, and hypothesis testing, reducing production defects by 20% and improving decision-making accuracy. Developed complex Excel models and automated macros for data transformation and reporting, reducing report generation time by 40% and improving operational efficiency. - Led a cross-functional team in a high-impact data analytics project, leveraging Agile sprints to achieve a 15% improvement in project completion timelines. - Created compelling data visualizations using Matplotlib, Plotly, and ggplot2 for effective communication of actionable insights to key stakeholders. - Designed and optimized ETL workflows using AWS Glue and Apache Airflow, reducing data pipeline execution time by 35% and ensuring data consistency. - Conducted customer segmentation analysis using clustering techniques (K-Means) to optimize marketing strategies and improve customer retention rates. - Implemented predictive models using XGBoost and LightGBM to enhance churn prediction accuracy by 15%. - Automated reporting workflows, reducing manual data processing time by 40% and increasing efficiency. - Developed and deployed interactive Tableau and Power BI dashboards to provide real-time insights for business stakeholders, improving decision-making speed by 30%. - Improved data quality by implementing robust validation mechanisms, achieving 99% data accuracy across datasets. - Spearheaded stakeholder training initiatives to enhance understanding and adoption of analytical tools, improving collaboration and analytics integration across teams.
