

Trupal Patel *Software Engineer*

✉ trupal.work@gmail.com ☎ +1 943 265 1855 📍 Camarillo, CA

SUMMARY

Full-Stack Developer with hands-on experience in **React.js**, **Next.js**, **Node.js**, **MongoDB**, and real-time systems. Built scalable web apps, dashboards, and 3D visualizations. Developed **Windows Forms Applications** and **Windows Services** to support product needs. Strong in frontend design, backend APIs, and database modeling. Recently delivered a Warehouse Management System and real-time CV streaming platform.

PROFESSIONAL EXPERIENCE

AIVID.AI

Software Engineer

08/2024 – 04/2025 | Ahmedabad, India

- Improved Elasticsearch bucket aggregation queries, boosting response times by 25% and enhancing data visualization.
- Maintained and enhanced the Aivid Insights plugin for real-time dashboards and analytics; visualized millions of data points from 350+ Computer Vision Bots across 200+ sites, and enabled live streaming of processed frames via RTSP.
- Developed an automated system using Node.js and cron jobs to send daily/weekly PDF-Excel reports and real-time notifications via Email, WhatsApp, Slack, and Twilio using MQTT, achieving a 99% delivery success rate.

Software Engineer Intern

01/2023 – 07/2024 | Ahmedabad, India

- Contributed to the Aivid Insights plugin using Elasticsearch and Kibana's plugin architecture.
- Built 30+ dashboards for visualizing complex data structures with optimized performance.
- Developed responsive UI using React.js, TypeScript, and Elastic UI.
- Integrated ApexCharts to enhance data visualization and increase user engagement by 40%.
- Prototyped and tested dashboard mockups to align designs with user expectations.

InfoLabz IT Services Pvt LTD, *React.js Intern*

06/2022 – 07/2022 | Remote

- Built a responsive news blog web app using React.js, Redux, and dynamic data APIs.
- Developed a real-time COVID-19 info page with React hooks, props, and state management.
- Strengthened understanding of JavaScript (ES6), component-based architecture, and state handling.

SKILLS

Frontend Development — React.js, Next.js, Material-UI, Tailwind CSS, Chakra UI, Redux, Bootstrap, Elastic UI, HTML5, CSS3, Figma, Responsive Design, Jest, WebPack, Babel, Windows Forms Application

Backend Development — Node.js, Express.js, Hapi.js, RESTful APIs, GraphQL, SOAP, FTP, MQTT, WebSockets, OAuth, JWT, HLS, Windows Services

Programming Languages — JavaScript, TypeScript, Python, C#, C++, C, PHP

Databases — MongoDB, MySQL, SQLite, Elasticsearch

DevOps & Tools — Git & GitHub, Docker, Nginx, AWS S3, Linux & Windows, Cron Jobs, NSSM, Bash/Batch Scripting, PowerShell

Other Technologies — OpenCV, TensorFlow, EMGU CV, Wireshark, RTSP, ELK Stack, ApexCharts, EQL, PDF/Excel Reports

PROJECTS

Web-Warehouse, *Next.js, MongoDB, Mongoose, Tailwind CSS, ApexCharts, Three.js*

Built a full-stack warehouse tracking system with role-based access, 3D visualization, and optimized MongoDB schema for inventory and order management.

Little Lemon Restaurant App, *React.js, Figma, Tailwind CSS*

Designed a fully responsive multi-page restaurant app as part of Meta's Capstone project, ensuring a seamless user experience across devices.

Motion Detection Application, *C#, Emgu CV, Windows Forms*

Created a real-time motion detection app using frame differencing, bounding boxes, and automated screenshot capture for security use cases.

CERTIFICATES

- Meta Frontend Professional Certificate

EDUCATION

California State University, Channel Islands, *Ms in Computer Science*

01/2025 – Current | Camarillo, USA

Gujarat Technological University, *B.E in Computer Engineering*

08/2019 – 07/2023 | Ahmedabad, India
