PROFESSIONAL SUMMARY

Results-driven Business Analyst with expertise in leveraging data analytics tools (Python, SQL, R) and big data technologies (PySpark, Hadoop, Hive) to drive strategic decision-making and business optimization. Skilled in advanced statistical modeling, machine learning, and visualization platforms like Tableau and Power BI. Adept at translating complex data into actionable insights and clear narratives to support executive decisions in dynamic environments.

EDUCATION

Clark University Graduate School of Business

Worcester, MA

Master of Science in Business Analytics

January 2023 - December 2024

Relevant Coursework: Information Systems Analytics, Intermediate Statistics Modelling(R), Analytics Programming (Python), Database Management, Marketing Research Analysis, Machine Learning, Visual Analytics and Business Intelligence, Big Data Computing.

Acharya Institute of Technology

Bangalore, India

Bachelor of Business Administration

March 2018 – December 2021

TECHNICAL SKILLS

- Programming: SQL, Python, R
- Big Data Technologies: PySpark, Hadoop, Hive
- Visualization Tools: Tableau, Power BI
- Other Tools: MS Excel, KNIME, PowerPoint
- Core Competencies: Machine Learning, Business Process Analysis, Process Improvements, Data Engineering, Data Visualization

EXPERIENCE

Casual Threads

Gujarat, India

Market Research Analyst

February 2022 - September 2022

- Conducted comprehensive analysis of consumer behavior and market trends, driving a 5% increase in business growth.
- Developed and implemented strategic marketing programs, aligning with business goals to enhance market positioning.
- Delivered data-driven insights through reports, refining marketing campaigns and product development strategies.

Ngampooz

Jakarta, Indonesia

Global Exchange Internship

July 2019 – August 2019

- Conducted a detailed SWOT analysis within a short timeframe, providing perceptions that influenced strategic conversations and emphasized important areas in need of development.
- Collaborated with a diverse team to create a promotional marketing plan that boosted brand visibility.
- Presented recommendations to senior management, influencing decision-making and strategy development.

ACADEMIC PROJECTS

Marketing Research Initiative for Big Brothers Big Sisters of Central Mass & MetroWest (BBBSCM)

- Leveraged advanced statistical tools (SPSS, R) to analyze engagement factors affecting donations, volunteering, and mentoring.
- Formulated targeted strategies informed by data-driven insights, markedly improving organizational outreach and boosting community support for youth development initiatives.
- presented complex findings to non-technical stakeholders, facilitating informed strategic decision-making.

Electric Vehicle Market Analysis

- Performed extensive SQL analysis on a dataset of 15,033 records, concentrating on Electric and Plug-In Electric Vehicles (PEVs) in Washington State.
- Identified significant market trends and consumer preferences through thorough data exploration, delivering actionable insights for targeted marketing and infrastructure development.
- Facilitated data-driven decisions for policy development and legislative support, advancing sustainable transportation initiatives in the region.

ERP Implementation for IKEA

- Led the implementation of an ERP system to optimize operations and boost organizational performance.
- Integrated modules for inventory, procurement, sales, finance, and customer relationship management, resulting in greater efficiency and enhanced supply chain management.
- Addressed challenges related to data migration and employee resistance, positioning IKEA for sustained success in the retail sector.

Statistical Analysis of Cellphone Prices

- Created an extensive statistical model to analyze key factors affecting cellphone prices using a dataset of 2,000 records and 21 features.
- Conducted data cleaning, descriptive statistics, and inferential analyses, including T-tests and correlation analysis, achieving an R-squared value of 0.883 with a Multiple Linear Regression model.
- Identified battery power, RAM, and camera resolution as significant price determinants, utilizing Python (Pandas, NumPy, Matplotlib, Seaborn) for data processing and visualization to deliver actionable pricing strategies.

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900)
- IRB Human Subject Research Certification
- Cambridge English Workshop for Business Communication
- The Fundamentals of the Capital Market

FORAGE VIRTUAL EXPERIENCES

New York Jobs CEO Council Financial Analyst Job Simulation on Forage November 2024

- Conducted feasibility analysis for partnerships, demonstrating strong financial and communication skills.

Commonwealth Bank Introduction to Data Science Job Simulation on Forage November 2024

- Developed data pipelines, anonymized datasets, and proposed efficient data management solutions.

JPMorgan Chase & Co. Quantitative Research Virtual Experience Program on Forage November 2024

- Analyzed loan books to estimate default probabilities and utilized FICO scores for dynamic programming models.

British Airways Data Science Job Simulation on Forage November 2024

- Built predictive models to uncover customer buying behaviors and factors influencing them.

Tata Data Visualisation: Empowering Business with Effective Insights Job Simulation on Forage November 2024

- Created impactful visualizations to assist executives in strategic decision-making.
