

SONTE TULAJA

Business Data Analyst

USA | +1 (203) 887-1273 | Email: tulaja@careerattainment.com | LinkedIn

SUMMARY

Results-driven Business Data Analyst with around 3 years of experience in analyzing complex datasets, building dashboards, and translating business requirements into actionable insights for financial, healthcare, and enterprise domains. Skilled in SQL, Python, R, Tableau, Power BI, and data modeling, with expertise in Agile methodology, stakeholder collaboration, and process optimization. Adept at improving decision-making through data-driven strategies, predictive analytics, and KPI reporting, ensuring measurable business impact and operational efficiency.

PROFESSIONAL EXPERIENCE

Business Data Analyst HCL (Internship) USA	Jan 2025 – Current
- Collaborated with business stakeholders to gather, document, and analyze requirements (BRD/FRD) for financial reporting systems, ensuring KPI definitions, data flows, and metrics were aligned with organizational goals and compliance standards. - Extracted, cleaned, and transformed data from ERP, CRM, and third-party APIs using SQL, Python, and Alteryx, streamlining pipelines and improving data accuracy by 28% across enterprise financial dashboards. - Developed interactive Tableau and Power BI dashboards to track revenue, expenses, and customer acquisition trends, delivering real-time insights to leadership that improved decision-making and contributed to a 15% increase in ROI. - Conducted advanced statistical analysis and developed forecasting models in Python and R, identifying patterns of revenue leakage and enabling proactive strategies that reduced financial risk exposure by \$1.5M annually. - Performed ETL testing and backend data validation across Oracle and SQL Server databases, reducing reporting discrepancies by 22%. - Partnered with QA and DevOps teams to integrate automated data validation scripts into CI/CD pipelines, enabling nightly data quality checks, improving reliability, and reducing manual interventions across financial and reporting systems. - Facilitated Agile ceremonies including daily stand-ups, sprint reviews, and backlog refinement, ensuring prioritization of business-critical analytics deliverables, streamlining collaboration, and improving sprint velocity by 18%. - Conducted ad-hoc analysis and variance reports, supporting executive-level decision-making during quarterly financial reviews. - Created data governance workflows, ensuring compliance with GDPR and SOX standards, strengthening regulatory readiness. - Collaborated with cross-functional teams to design comprehensive data dictionaries and metadata documentation, standardizing definitions and enabling transparency, consistency, and reusability across multiple business units.	

Business Data Analyst TCS India	July 2021 – July 2023
- Partnered with clients in the healthcare domain to gather, document, and translate business requirements into data-driven solutions, improving patient record management, streamlining claims reporting, and enhancing overall operational efficiency. - Designed and automated SQL-based reporting solutions, streamlining recurring workflows and reducing manual reporting time by 40%, while delivering more accurate and timely insights into patient care operations. - Built interactive Tableau dashboards to track claims processing, provider performance, and billing efficiency, enabling executives to identify process bottlenecks, monitor KPIs in real time, and improve turnaround time by 20%. - Conducted ETL validation and data migration testing using Talend and SQL, verifying data mappings, transformations, and integrity to ensure accuracy and consistency during system upgrades and platform transitions. - Collaborated with data scientists to design predictive analytics models in Python for patient churn prediction, increasing retention by 12%. - Created UML diagrams, process workflows, and requirement traceability matrices, providing clear visual documentation that improved communication, alignment, and understanding between business stakeholders and technical teams. - Performed data quality checks, profiling, and cleansing on large-scale healthcare datasets, ensuring HIPAA compliance, enhancing data reliability, and reducing OOS/OOT errors by 18% across reporting and analytics systems. - Delivered monthly executive-level reporting packs by consolidating data from multiple sources, streamlining analysis, and providing actionable insights that supported strategic leadership decision-making. - Actively participated in Agile sprints, breaking down epics into detailed user stories with clear acceptance criteria, ensuring data and reporting deliverables aligned with sprint goals and stakeholder expectations. - Supported UAT execution by preparing detailed test scenarios, validating outputs, and conducting end-user training sessions, ensuring smooth adoption of new reporting tools and minimizing post-release issues.	

TECHNICAL SKILLS

- Data Analysis & Reporting:** SQL, Python (Pandas, NumPy), R, Excel (Pivot Tables, VBA), enabling advanced analytics and trend forecasting.
- Data Visualization:** Tableau, Power BI, QlikView, Looker for interactive dashboards and KPI monitoring across business units.
- Database Management:** Oracle, MySQL, SQL Server, PostgreSQL for querying, ETL processes, and backend validation.
- Statistical & Predictive Modeling:** Regression, clustering, classification, forecasting, and hypothesis testing using R, Python (Scikit-learn).
- ETL & Data Pipelines:** Talend, Informatica, Alteryx, SSIS for extracting, transforming, and loading data across heterogeneous systems.
- Business Intelligence (BI):** Data modeling, KPI scorecards, OLAP cubes, and self-service BI implementation for business units.
- Big Data & Cloud Analytics:** Hadoop, Spark, AWS Redshift, GCP BigQuery, and Snowflake for scalable data warehousing and analytics.
- Data Governance & Quality:** Profiling, cleansing, normalization, deduplication, GDPR/HIPAA compliance, and MDM solutions.
- Agile & SDLC Practices:** Jira, Confluence, Scrum, Kanban for sprint planning, backlog refinement, and requirement traceability.
- Requirements Gathering & Documentation:** BRD, FRD, SRS, process workflows (Visio, Lucidchart) ensuring clarity between business and IT teams.
- Machine Learning Applications:** Predictive analytics, churn modeling, customer segmentation, and recommendation systems in Python/R.
- Collaboration Tools & Version Control:** Git, Bitbucket, MS Teams, SharePoint, and Slack for distributed team collaboration.

Education

Masters St Francis College, USA	Jan 2024 – Aug 2025
Bachelors K.V range reddy college for women, India	July 2019 – June 2022
