Professional Summary

Healthcare data professional with MS in Health Informatics and 8+ years of clinical operations experience, specializing in data analysis and healthcare analytics. Currently serving as Data Analyst Intern at New York Presbyterian while completing Data Management in SQL certification from eCornell (Cornell University). Proven expertise in analyzing healthcare datasets, building dashboards in Tableau and Power BI, and translating complex clinical data into actionable insights for stakeholders that improve operational efficiency, compliance reporting, and patient outcomes.

Skills & Technical Competencies

- **Technical Skills:** SQL (advanced queries, joins, subqueries), Tableau, Power BI, Excel (Pivot Tables, advanced functions), Google Analytics, Deep learning, Machine learning
- **Data Analysis:** Statistical modeling, data visualization, data cleaning, data mining, exploratory data analysis, trend identification, predictive modeling
- **Healthcare Informatics:** EMR systems (EPIC, Athena), health data management, healthcare operations analysis, clinical workflow optimization, HIPAA compliance, Medicare/Medicaid experience, Enrollment experience, QNXT
- **Data Management:** Data extraction, data cleaning, ETL processes, database management, data governance, large-scale dataset handling
- **Communication & Collaboration:** Stakeholder management, presenting findings to non-technical audiences, cross-functional collaboration, training and mentoring, customer service, diversity awareness

Professional Experience

JANUARY 2025 – DECEMBER 2025

Data Analyst Intern | New York Presbyterian, New York, NY

New York Presbyterian is a leading academic medical center and one of the nation's most comprehensive healthcare delivery networks.

- Analyzed massive amounts of healthcare data across 5000 patient records using SQL, identifying key trends in patient outcomes and operational efficiency
- Built Tableau dashboards to assess demand, staffing, and overtime trends, enabling scheduling policy changes that cut overtime costs by 15–18%, improved peak-hour coverage by 25%, and raised employee satisfaction by 20%.
- Cleaned and standardized 5,000+ customer data entries to improve records compliance, reducing duplicate entries from 30% to under 5% and increasing email campaign delivery rates by 22%.
- Applied statistical analysis and data mining techniques to 10 datasets, uncovering insights that led to 10% improvement in patient wait times
- Developed 25 Tableau and Power BI dashboards tracking KPI's, such as patient satisfaction and appointment utilization for stakeholders, reducing report generation time by 10%
- Collaborated with healthcare and IT teams to establish data management framework for structured and unstructured datasets, enabling 25% faster ad-hoc report generation and improving data accessibility

JANUARY 2021 – PRESENT

Practice Coordinator | New York Presbyterian Medical Group Queens, Queens, NY

- Analyzed 5000+ patient feedback records and operational metrics using SQL and EPIC/Athena EMR systems, identifying service gaps that reduced wait times by 5%
- Managed patient scheduling system serving 50 patients per day, reducing appointment errors by 25% through data-driven process improvements
- Generated monthly reports using Power BI tracking operational metrics for program leaders, supporting executive decision-making and process improvements

- Collaborated with program leadership across varying data expertise levels to implement data quality controls, reducing data errors by 30% and improving accuracy of healthcare operational reports

SEPTEMBER 2021 – NOVEMBER 2021

Health Informatics Intern | Northwell Health / Plainview Hospital, Plainview, NY

- Supported quality management programs by analyzing patient safety and care quality metrics from EMR data covering 8,000+ patient encounters
- Assisted with data reporting, compliance documentation, and operational analytics for hospital operations, reducing reporting time by 10%
- Trained alongside clinical and IT staff, gaining proficiency in healthcare systems, database operations, and clinical workflows

JANUARY 2017 – JANUARY 2021

Registrar/Receptionist | New York Presbyterian Queens, Queens, NY

- Maintained electronic medical records accuracy for 150 patient records daily, achieving 97% data accuracy through systematic verification processes
- Coordinated patient data entry for multiple clinical departments, ensuring HIPAA compliance across all transactions with zero compliance violations

Projects & Portfolio

Employee Satisfaction Analysis: Flexible Work Scheduling vs. Traditional 9-5

- Collected, cleaned, and analyzed survey data from 200+ employees using SQL and Excel, identifying key satisfaction drivers through statistical analysis, resulting in 10% increase in employee satisfaction scores within 2 months.
- Created interactive Tableau dashboards visualizing trends and presented actionable recommendations in a case study format, demonstrating potential for 15% productivity gains and 30% reduction in scheduling conflicts

Customer Satisfaction Analysis Dashboard

- Designed and built interactive Tableau dashboards to support operational decision-making for healthcare services
- Analyzed survey data for trends and presented findings to stakeholders, improving data accessibility for non-technical users

Education

2019 – 2021

Master of Science in Health Informatics | Adelphi University, Garden City, NY

2009 – 2013

Bachelor of Science in Computer Application | Kristu Jayanti College, Bangalore, India

Certifications

2026

Data Management in SQL | eCornell (Cornell University)

2025

Microsoft Power BI Certification

2024

Data Analyst Certification | eCornell

2025

Data Visualization in Tableau | eCornell

2024

EPIC Certification

2024

Athena Certification
