Professional Summary

Results-driven **Data Analyst** with over 3 years of combined academic and professional experience in extracting business insights, optimizing performance, and enhancing decision-making through data. Proficient in SQL, Python, Excel, Power BI, and Tableau with expertise in KPI dashboards, ETL processes, and root cause analysis. Known for delivering actionable business intelligence, collaborating with cross-functional stakeholders, and presenting high-impact visualizations that influence strategic planning.

Education

Clarkson University — Potsdam, NY

Master of Science in Data Science | 2023 – 2024

GPA: 3.3 / 4.0

- Relevant Coursework: Machine Learning, Data Warehousing, Business Intelligence, Data Science Statistics, AWS, Power BI
- Designed and implemented scalable data pipelines and predictive models for real-world decision-making scenarios.
- Built executive-ready dashboards and reports supporting academic and operational outcomes.

Lovely Professional University — Punjab, India

Bachelor of Technology (B.Tech) in Computer Science Honors | 2019 – 2023

GPA: 3.0 / 4.0 (Equivalent of 7.01 / 10)

- Specialized in databases, software engineering, and algorithms.
 - Completed application development and data analysis projects aligned with business process improvement.
-

Professional Experience

Graduate Research Analyst (Assistant)

Clarkson University | Oct 2023 – May 2025

- Designed a Python-based bot game to collect and analyze user response times segmented by age groups.
- Conducted EDA, regression modeling, and benchmarking to identify performance variances by demographics.
- Developed stakeholder-ready Tableau dashboards and visual reports for academic presentations.
- Contributed to published research on cognitive patterns in gamified environments.

Data Analyst Intern

HighRadius, Hyderabad, India | May 2022 – July 2023

- Analyzed over 100K+ loan application records to uncover customer behavior patterns and repayment risks.
 - Developed Power BI dashboards tracking approval rates, default trends, and customer cohorts, reducing reporting time by 30%.
 - Optimized SQL scripts to handle large-scale data extraction across multi-source databases.
 - Integrated AWS S3 for cloud-based data workflows, enhancing scalability and performance.
 - Collaborated with product and finance teams to define KPIs and align insights with business growth targets.
-

Projects

Retail Banking Data Warehouse – ETL Implementation

Tools: SQL Server, SSIS, Excel

- Built a scalable SSIS-based ETL pipeline consolidating customer and transaction data from five systems.
- Structured data warehouse layers for reporting, compliance, and business intelligence.
- Enabled automated KPI reports, reducing manual effort by 40% and improving audit readiness.

Loan Default Risk Prediction

Tools: Python, Scikit-learn, XGBoost

- Developed an ensemble machine learning model to predict loan default probabilities with 87% AUC-ROC score.
- Applied feature engineering and cross-validation techniques to improve model reliability.
- Co-authored a peer-reviewed research publication focused on predictive credit risk modeling.

IPL Mega Auction Player Analysis

Tools: Python, Power BI, Excel

- Scraped and analyzed T20 performance data to recommend best-value players for RCB under budget constraints.
 - Built dashboards comparing strike rate, boundary % and economy across player roles.
 - Delivered actionable squad recommendations based on data-driven match-up strategies.
-

Skills

Data Analysis & Visualization: SQL, Python, Excel, Power BI, Tableau, Looker, SAS, Google Data Studio

Databases: MySQL, PostgreSQL, Snowflake, BigQuery, Oracle, MongoDB, NoSQL

Technologies: AWS (S3), Jupyter Notebook, Git, Hadoop, Spark, SSIS

Analytics & Techniques: KPI Analysis, Forecasting, Root Cause Analysis, Time Series, A/B Testing, Regression

Business Tools: Microsoft Access, PowerPoint, Jira, Confluence, Salesforce, Notion, Slack

Soft Skills: Communication, Attention to Detail, Strategic Thinking, Stakeholder Management, Team Collaboration

Methodologies: Agile, Scrum, Process Mapping, ROI Analysis, Use Case Development, Gap Analysis
