EDUCATION

University of North Texas, Denton

August 2022 - May 2024

Master of Science in Information Systems and Technology, Grade: 3.1 / 4

Sathyabama institute of Science and Technology, Chennai

June 2018 - May 2022

Bachelor of Technology in Electronic and Communication

SKILLS/CERTIFICATIONS

Languages: Java, C, C++, Python(Pandas, NumPy).

Databases: MySQL, SQLite, MongoDB, ETL Pipelines.

Tools/Frameworks: Git, REST, Express, ASP.NET, Postman.

Web Technologies: HTML, CSS, JavaScript, ReactJS, Bootstrap, Angular JS, XML, Node JS.

Data Analytics & BI: Tableau, Power BI, Excel, A/B Testing.

PROFESSIONAL EXPERIENCE

Data Analyst | iGRAND IT

June 2021 – July 2022

- Worked closely with the engineering team to design and manage **MySQL** databases, making it easier to store and retrieve customer review data.
- Used **SQL** to build **ETL pipelines**, filtering, aggregating, and joining tables to extract the right data for analysis.
- Cleaned and prepped data to ensure accuracy and consistency before running reports and creating insights.
- Built interactive dashboards and visual reports using **Tableau**, **Power BI**, and **Excel** to help teams make data-driven decisions.
- Wrote and optimized **SQL** queries to pull and analyze large datasets efficiently.
- Used **Python (Pandas, NumPy)** for data analysis, automation, and identifying trends in customer behavior.
- Assisted in **A/B testing** and **statistical analysis** to measure the impact of new features and business strategies.
- Collaborated with different teams to understand their data needs and deliver meaningful insights.
- Helped document data processes and worked on improving data quality and governance to keep everything running smoothly.

PROJECTS

Vidzy – Full Stack

- Designed a Website **like Netflix** including features such as filter, sort and user can **upload videos** to the website and play.
- Used **GridFS** to store and retrieve the video in the form of chunks reducing the ram usage of the browser by more **than 50%** and allowing user to have a **smooth experience** in playing the video.
- Used **Node JS, GridFS, Express, MongoDB, HTML, CSS and Bootstrap** to build the project.

Stock Market Prediction – Machine Learning

- Predicting stock price using the **LSTM model**, Utilized the past **6 days data** divided into **3 groups of 2 days each** and these are utilized to predict the **seventh day** data which we make use for accuracy testing.
- Predicted the SBI stocks with a **Mean square error** as low as **0.0009 and 0.0008** for training and testing.

Pizza Delivery Web Application – Full Stack

- Web app with features including **Login Authentication, Search and Filtering, Pagination, Image change, CRUD** operations items, Cart, History of Purchases.
- Used embedded data models that reduced queries and better performance for read operations
- Used **Node JS, Express, MongoDB, HTML, CSS and Bootstrap**.

Movie Theater Seating – Java

- Designed, Developed and Tested an Algorithm to handle customer movie requests during Covid-19 to allocate seats while prioritizing customers comfort, safety and gives priority to fill as many seats as possible to maximize profit for the Theater Management.
- Used **Java** to Develop and test the algorithm.
