

MD SHOAIB ULLASH

San Marcos, Texas- 78666 ▪ 443-978-9700 ▪ shoaibullash96@gmail.com ▪ www.linkedin.com/in/shoaib-ullash

Data-driven Supply Chain and Analytics professional with 4 years of experience in demand planning, forecasting, and operations optimization across manufacturing and e-commerce. Adept at building cross-functional production plans, performing constraint analysis, and driving cost-efficient decisions through quantitative modeling. Experienced with Excel, SQL, and Python to automate S&OP workflows, align supply with demand, and enhance delivery performance.

CORE COMPETENCIES

Production & Demand Planning • Sales & Operations Planning • Optimization & Forecasting • Inventory Strategy • Statistical Modeling • Data Visualization (Tableau, Power BI) • Cross-Functional Collaboration • Process Improvement & Automation

EDUCATION

M.S. in Data Analytics and Information Systems

Texas State University, San Marcos, Texas

Graduation- December 2025(expected)

Overall GPA: 3.89

McCoy Fellowship of Excellence Scholar | Graduate Instructional Assistant | Graduate College Scholarship

Key Courses: Optimization for Business Analytics, Operations Management, Forecasting & Simulation, Machine Learning, Data Warehousing

B.Sc. in Industrial and Production Engineering

Ahsanullah University of Science & Technology, Dhaka, Bangladesh

Graduation- November 2019

Overall GPA: 3.06

Relevant Coursework: Supply Chain Management, Operations Management, Technology Management

PROFESSIONAL EXPERIENCE

Graduate Research Assistant – Supply Chain Optimization

January 2024- Present

Texas State University

- Designed a simulation-based inventory model incorporating theft uncertainty to determine optimal order quantities and maximize profit under constraints
- Presented findings at the 2025 Production & Operations Management Society Conference (POMS Atlanta).

Associate- Demand Planning

November 2021- December 2023

Foodpanda Bangladesh Ltd.- (Online food and grocery delivery platform owned by Berlin-based Delivery Hero)

- Supported the development of end-to-end demand forecasting and replenishment strategy by analyzing historical data, implementing statistical forecasting models, and collaborating with cross-functional teams to improve product availability and reduce stockouts
- Reduced logistics costs by 42% (~\$98K) through data-driven route optimization and forecasting model improvements; recognized as Star Performer Q4 2022.
- Increased product availability by 19% YoY via improved S&OP alignment with finance, supply chain, and operations teams.
- Automated forecast reporting and KPI dashboards in Excel and SQL, improving forecast accuracy and decision speed.

Junior Officer- Supply Chain

January 2021- November 2021

Group QA, Dhaka, Bangladesh

- Consolidated vendor quotes and procurement data using pivot-based Excel models to optimize sourcing decisions.
- Managed \$400K+ monthly procurement portfolio; collaborated with 30+ vendors to ensure on-time deliveries and cost control.

Junior Officer- Inventory Management

January 2020- December 2020

Bit Body Bangladesh Ltd.- (Production house of US-based clothing brand Mtaylor)

- Analyzed SKU movement data to optimize reorder points and reduce discrepancies by 12%.
- Supported production planning by developing Excel dashboards tracking inventory turnover and cycle times.

CERTIFICATIONS & ACHIEVEMENTS

- Supply Chain Analytics by MITx on EdX
- Star Performer Q4 2022 – Foodpanda Bangladesh Ltd
- Professional Microsoft Excel Training from New Horizon CLC, Bangladesh in 2019
- SAP ERP Essential Training on LinkedIn Learning

TECHNICAL SKILLS

Supply Chain Strategy & Planning: End-to-end supply chain management, inventory management, demand forecasting

Data Analytics & Modeling: Python (Pandas, NumPy, Scikit-learn), MS Excel (Advanced), Google Spreadsheet, Regression Analysis, Forecasting, Statistical Analysis, Machine Learning

Data Visualization: PowerBI, Tableau, Google Data Studio

Database Management: SQL, Microsoft Access, Big Query, SAP BW/4HANA

PROJECT

- Investment Portfolio Analysis & Stock Trend Prediction
 - ✓ Developed a time series forecasting model using Autoregressive (AR) modeling and Linear Regression to analyze stock trends, incorporating cross-validation and error metrics (MAPE, RMSE).
- Early Prediction of Sepsis in ICU Patients Using Machine Learning

- ✓ Built a predictive framework in Python to forecast sepsis onset 6 hours in advance using the PhysioNet 2019 ICU dataset (40,336 patients, 1.55M hourly records).
- ✓ Preprocessed time-series data with imputation and feature selection, then compared 13 classifiers under original, SMOTE, and undersampled settings

EXTRA-CURRICULAR ACTIVITIES

- Conducted online excel training workshop for AUST IEOM Society
- Organized HULT Prize at AUST on-campus program 2019
- Worked in the school campaign program of the Stockholm Junior Water Prize Competition in 2017
- Worked as a logistics volunteer in Bangladesh National Mathematical Olympiad
- Worked as Finance Secretary at House of Volunteers (HoV)- AUST Chapter
