

Uma Surya Aryan Sridharala | Data Analyst

USA | +1 (424) 281-9007 | sridharalaumasuryaaryan@gmail.com | [LinkedIn](#)

SUMMARY

Data Analyst with 3+ years of experience in building data pipelines, developing statistical models, and automating reporting workflows. Skilled in Python, SQL, PySpark, and Power BI, with proven ability to handle datasets exceeding 5 million records daily. Delivered time-series analyses, segmentation models, and cohort-level reporting to support operational and strategic decisions. Experienced in designing ETL processes, reducing integration errors by up to 60%, and optimizing dashboards to improve decision-making speed. Familiar with model monitoring, claims processing, and anomaly detection, consistently improving data accuracy and reducing resolution time across multiple high-volume environments.

TECHNICAL SKILLS

Programming & Data Wrangling: Python (Pandas, NumPy), SQL, R, VBA Macros, Data Cleansing, Transformation, Quality Assessment
Machine Learning & Statistical Modeling: Scikit-Learn, TensorFlow, Keras, Logistic Regression, Decision Trees, K-Means, K-Medoids, Anomaly Detection, Predictive Modeling, A/B Testing, Regression Analysis, Clustering
Databases & Data Management: Relational Databases, SQL Server, Oracle, Google BigQuery, Hadoop, Hive, Snowflake, SQL Query Optimization, Data Warehousing, Data Cleaning
Visualization & BI Tools: Tableau, Power BI, SPSS, Interactive Dashboards, KPI Reporting, Data Storytelling
Databases & Data Warehousing: SQL Server, Oracle, Google BigQuery, Hadoop, Hive, SQL Query Optimization
ETL & Data Integration: Apache NiFi, SSIS, ETL Pipeline Design, Data Flow Automation, Data Extraction & Transformation
Cloud Platforms: AWS, Google Cloud Platform (GCP), Cloud Storage, Scalable Data Solutions
Healthcare Standards & Compliance: FHIR, HL7, HIPAA Compliance, Data Encryption, Data Privacy, Regulatory Standards (RBI, CMS)
Project Management & Collaboration: JIRA, Agile, Scrum, Task Management, Documentation, Git, GitHub

PROFESSIONAL EXPERIENCE

UnitedHealth Group, USA | Data Analyst Intern Dec 2024 – May 2025

- Processed and validated 4M+ medical claims using SQL scripts and logic checks, ensuring accurate reporting and reducing downstream data issues by approximately 35% in monthly audits.
- Built automated dashboards in Power BI for tracking provider compliance and patient wait times, supporting clinical operations with real-time visibility across 120+ regional centers.
- Analyzed utilization trends across service lines, identifying a 12% spike in specific procedures that informed cost containment measures and improved monthly forecasting accuracy.
- Mapped claims data from multiple EHR systems into a unified format, decreasing integration errors by 42% and supporting standardized analytics across insurance programs.
- Conducted time-series analysis on admission patterns, enabling early detection of seasonal demand shifts and assisting operations teams in managing hospital staffing requirements.
- Investigated 30+ provider and claims discrepancies, applying root cause techniques and reducing follow-up requests from regional offices by 40% over two reporting cycles.
- Supported 10+ ongoing initiatives by preparing performance summaries and cohort-level insights, enhancing coordination between analytics, care management, and policy compliance teams.

Hexaware Technologies, India | Data Analyst Jul 2022 – Aug 2023

- Designed and optimized ETL pipelines using Python, PySpark, and SQL to automate ingestion from APIs and AWS S3, cutting manual effort by 40% and improving refresh frequency.
- Built ML models (logistic regression, random forest, clustering) for churn prediction and segmentation, boosting targeted campaign retention by 18% within one quarter.
- Developed Tableau and Power BI dashboards that streamlined cross-functional performance tracking, increasing adoption of self-serve analytics by 15%.
- Automated recurring reporting with VBA Macros and Python, saving 8+ analyst hours weekly and freeing time for higher-value analysis tasks.
- Defined KPIs with stakeholders and integrated them into executive dashboards used for quarterly resource and budgeting decisions.
- Delivered trend and performance analyses that directly influenced marketing strategy revisions and feature rollout timing.
- Contributed to model monitoring workflows and improved SQL query efficiency through peer collaboration and documented best practices.

Cybage Software, India | Data Analyst Jan 2021 – Jun 2022

- Built and automated SQL and Python pipelines to ingest, clean, and validate 5M+ daily records across healthcare and retail datasets, improving SLA adherence by 99.7%.
- Delivered 12+ recurring and ad-hoc reports, reducing manual workload by 40% while enabling business users to monitor inventory, sales trends, and product usage performance.
- Investigated 15+ root cause data issues using SQL queries and source mapping, directly reducing data-related client escalations by 30% within a two-quarter period.
- Cleaned and integrated data from over 7 systems, minimizing schema mismatches and reducing ETL job failure rates by approximately 60% across client pipelines.
- Created standardized templates, dictionaries, and validation routines that reduced report creation errors and supported consistent insights across teams and reporting cycles.
- Used A/B testing and regression models to analyze feature impact, influencing 3+ go-to-market decisions and improving campaign targeting across retail and healthcare segments.
- Resolved 100+ client data tickets with a sub-6-hour average turnaround time, identifying issues in upstream systems that averted \$25K/month in potential billing discrepancies.

EDUCATION

Master of Science in Business Analytics | University of Houston, C. T. Bauer college of business, Houston, TX May 2025
Bachelor of Technology in Computer Science | Bennett University, Delhi, India May 2023

CERTIFICATIONS

AWS Solutions Architect Associate | **AWS Solutions Architect Professional**
