CAREER OBJECTIVE

To acquire an internship for summer 2012 that provides me an opportunity to bring my technical expertise, show leadership skills and problem solving skills and willingness to learn. To keep up with the cutting edge of technologies. Increase value as a person.

EDUCATION

Lousiana State University (LSU), Baton Rouge, LA, USA

Master of Science in Computer Science

December 2012

cumulative GPA 3.866

Related Coursework: Advanced Operating System, Algorithms, DBMS, Sensor Network Concepts, High Speed Networks

B.N.M Institute of Technology (affiliated to Visvesvaraya Technological University), Bangalore, India July 2008

Bachelor of Engineering in Computer Science

cumulative GPA 3.4

Related Coursework: Operating Systems, Algorithms and Data Structures, C, C++, Java, Dot NET using C#, Object Oriented Analysis and Design, Computer Networks, Data Communications, Mobile Communications.

CCNA (Cisco Certified Network Associate) with cent percent credentials.

Experience

Graduate Assistant, Continuing Education, Louisiana State University

January 2011 – present

- Work as a Web designer for the department of Continuing education.
- Work on DotNetNuke framework.
- Develop web applications using C# and HTML
- Successfully launched the first phase of the website on 27th September 2011

Research Assistant under Dr. Seung Jong Park, Computer Science, Louisiana State University

August 2011 - Present

- Research in the field of Cloud Computing, Different Network Architecture used in the field of Cloud Computing, various services used in Cloud Computing.
- Pattern matching algorithms for matching genome sequences stored in different clusters in cloud.

Research Assistant under Dr. Rajgopal Kannan, Computer Science, Louisiana State University

January 2011 – July 2011

- Carried out research in the field of Cognitive Radio, Pursuer-Evader games in Cognitive Radio
- Successfully demonstrated the various environments of pursuer-evader problems by simulating using NS-Simulator.
- Proposed five algorithms where pursuer-evader problem in Cognitive Radio becomes evident.

Systems Engineer, Siemens Information Systems Limited, Bangalore, India**July 2008 – May 2010**

- Developed a License Management Tool which keeps track of the number of licenses purchased for a software and also keeps track of number of licenses used by different category of employees like Managers, Developers, and Testers. The tool was developed using Dot Net framework with C# programming.
- Worked on a client side project called Syngo Imaging or COSMOS which helped Radiologists in evaluating patients CT, MR and other tests. It Provides a front end(viewer) to the PACS(Picture Archiving and Communication Systems) which will have different modality images which helps the Radiologists in there diagnosis.
- Worked on various features like movie and scroll for version VB-36A of COSMOS. Used C++ as the programming language.

Achievements

- BEST TEAM PLAYER award for leadership abilities and supporting the team during crunch situations.
- SPOT AWARD for technical capabilities.

Software Engineer, KEE**July 2010 – December 2010**

- Worked on a Software which specifies the number of bundle of fins needed for different heat exchanger.

ACADEMIC PROJECTS**Software Engineer Intern, CISCO Systems****January 2008 – March 2008**

- Worked on a project called Manageability accelartion using SNMP where the current GetBulk request was enhanced to provide a way to store secondary MIB objects on secondary storage as a binary file.
- Used Java and C++ as the programming language.

COMPUTER SKILLS**Languages** : C, C++, C#, XHTML, Dot Net, SQL.**Operating Systems** : Linux, Windows**Extracurricular activities**

Sports Cordinator – Indian Student Association, Louisiana State University.

Part of a Bangalore based Drama team called Ranga Tantra.

Have performed in various stage play's across Bangalore.
