

Upal Kundu (Security Engineer | Cloud & DevSecOps)

Email: upalkundu287@gmail.com | Phone Number: (208) 874-9708 | GitHub: [Upal113](https://github.com/Upal113) | LinkedIn: [upalkundu](https://www.linkedin.com/in/upalkundu)
Certifications: Google IT Support | (ISC)2 Certified in Cybersecurity | AWS Cloud Practitioner | AWS Security

SKILLS

Programming Languages: Python, JavaScript, Java, Bash, Powershell, C#, C++

Frameworks and Tools: FastAPI / Flask, Express JS, Spring Boot, REST, Git, SQL, NoSQL, Firebase, Linux, Windows

Security: SIEM/SOAR, DLP, API Security, OWASP Top 10, Compliance (ISO/SOC2), CrowdStrike, Mulesoft, OKTA

Cloud & DevOps: AWS (EC2, S3, Lambda, IAM, VPC), GCP, Docker, EKS / Kubernetes

EXPERIENCE

Platform Security Intern

Fort Worth, Texas

Alcon

May 2025 - Present

- Automate FastAPI microservices deployments (CI/CD) with Azure DevOps pipelines on AWS EKS, GitHub, and Jfrog, assisting teams in addressing the OWASP top 10 in the API development lifecycle
- Redesign Kubernetes workloads alongside 4 DevOps engineers by implementing mutual TLS (mTLS) and certificate storage, hardening microservices communication within the ISTIO service mesh architecture
- Integrate SAST, DAST, container, and runtime scans in AWS EKS, MuleSoft API Gateway, and Veracode, enhancing SDLC security with a focus on optimizing infrastructure usage and cost efficiency

Platform Lead - Remote Desktop Control Project

Remote

Hewlett-Packard

September 2024 - May 2025

- Developed and containerized a Spring Boot API with 10+ REST endpoints, integrating AWS Secrets Manager and PostgreSQL for device verification using Device Security Profile configurations
- Provisioned and configured microservices in AWS EC2, VPC, and Docker for application teams, ensuring seamless and secure communication between Linux and Windows instances while reducing deployment time to under 90 seconds
- Led application migration to AWS, leveraging SQS, Lambda, API Gateway, enabling web and desktop connectivity

DevSecOps Intern

Marietta, Georgia

Intradiem

May 2024 - August 2024

- Implemented 7+ CSPM and Vulnerability alerts in CrowdStrike SIEM, SOAR reporting 10+ unique alerts weekly
- Automated AWS host management through a Python script using the CrowdStrike API, enhancing visibility, reducing infrastructure costs, and effectively reporting 5% of total hosts
- Shadowed security engineers on AWS host vulnerability assessments and remediation workflows using Jenkins, AWS Config, and Systems Manager (SSM)

Software Engineer, iDrone Program (Under Prof. Jay), University of Idaho

December 2023 - May 2024

- Engineered and deployed a multiplayer VR drone simulator on AWS using JavaScript (A-Frame, Express.js) and WebSocket communication, reducing latency by 90% and supporting 10+ real-time users

Application Security Intern

Tampa, FL

Resilience, Inc.

May 2023- August 2023

- Collaborated with Dev and QA teams to pen-test and patch DNS, AWS APIs, WordPress, and Expo File System on Android using Linux, Python, and Android Studio, resolving over 50% misconfigurations
- Utilized static code analysis with Snyk to resolve 30+ Node.js library, Flask runtime, and API credential issues
- Coordinated with the AppDev team to integrate GCP SQL Server, enhancing backend API security and facilitating the database migration from NoSQL to SQL databases

Software Engineer - Data, Cloud

Remote

Fiverr

March 2021 – July 2022

- Led end-to-end development of 5 full-stack web applications using Flask, JavaScript, Firebase, and SQL/NoSQL databases for proof-of-concepts and small businesses, helping launch digital products and online presence
- Architected 10+ cloud solutions in AWS, EC2, S3, GCP, Firebase, Heroku for task automation, application deployment
- Integrated third-party APIs (GCP, AWS, YFinance, Crypto APIs) to enable real-time data analytics and dynamic operations across multiple platforms

PROJECTS

[Security Toolbox](#) | [DNS and Network Security](#) | **Technology: Python, Linux, Linux Security**

- Implemented a Python-based end-to-end network scanning script on Linux, scanning 30 common ports and performing comprehensive DNS analysis (A, MX, SPF, SRV records) to identify and record potential vulnerabilities

AWS Cloud Quest | AWS Services | Technology: EC2, S3, IAM, AWS Config, SNS, VPC, IAC, Lambda

- Resolved 10+ AWS cloud architecture misconfigurations in EC2, S3, IAM, VPC utilizing Policy, Encryption, DLP, IAM
- Created playbooks to automate security detection and response through Config, IAC, Lambda, eliminating manual work

EDUCATION

University of Idaho | Bachelor of Science - Computer Science, Cybersecurity | GPA: 3.36

December 2025

Courses: Software Vulnerability Analysis, Software Engineering, Operating System, Adversarial ML, Secure Coding
