Tampa, FL 33613 | 813-297-1275 | montarious134@gmail.com [Linkedin](#) [Portfolio](#)

Education:

University of South Florida – Tampa, FL

GPA: 3.04/4.00

Bachelor of Science – **Business Analytics & Information Systems** 2020

December 11

Boot Camps: Python Bootcamp

Certifications: Citizen Data Science Certificate-Tableau,
Developer-Dell Boomi.

Professional Integration

Relevant Project(s):

Database Design/Administration

Summer 2020

- Independently designed a database system for a Soccer League and Hospital
- Developed different deliverables that reflected the different aspects of the progressive stages of the database. Created Relational Schemas, Entity Relational Diagrams, SPROCs, and Parameters.

Systems Analysis and Design

- Created a study plug-in application to be accessed through canvas to enable students within the same school/program to be able to create specific study schedules to be able to coordinate with one another. We developed the plug-in utilizing **Agile methodology** communicating through Teams, Slack, and Excel.
- Created data process models using **Microsoft Visio** to demonstrate the proposed system's data outflows and inflows

Business Application and Development

- Created **C#** applications using **Microsoft Visual Studio** by utilizing components and data access layers to achieve course objectives.

Business Intelligence

- Analyzed and Cleaned 999 rows of dealership data within **Python**;
- Completed a group project analyzing (incident_event_log.csv) of 141,173 rows **Designing a Data Mart**.
- Individually analyzed the Data Mart Data in **Power BI** creating visualizations of trends discovering the percentage of active incidents called in, and the rise and fall in urgency of care outlined by each symptom.

Work Experience

Syniverse

Jr. Systems Analyst – April 2022 to April 2023

- Assisted Tech Lead with Change Request Qualifications for code updates of scripts. Maintained four subcomponents spanning three applications to ensure welcome sms messages are received by clients customers.
- Investigate Unix Applications; Completing Change Request and Service Request Tickets
- Assisted in API creation and testing of MDN's from various country codes for proper 200 ok response.
- Oversaw and implemented decommission process of servers spanning multiple countries and data centers. Managed team roles and responsibilities. Documented within Excel Sheet files and decommission status and expected outcome of sever in Word Documents.
- Analyzed KPI's of Application volume within subcomponents to assist in the troubleshooting. Provided overview to Team Lead. Ensured redundancy while maintaining ETL load of select statements for halted files or disk space usage.

AimData

Business Systems Analyst- Internship; March 2021 to Sep 2021

- Assisted Project Manager in **System Development Lifecycle** by gathering requirements from **Stakeholders**, producing **use case**, utilizing **Visio** to display future configuration of relationships between systems described by Stakeholders outlined in use case. Additionally, communicated with management ensuring full **statement of work** was addressed.
 - Assisted Business System Analyst 2 by creating end-to-end processes following **Object-Oriented Program Structure** through Dell Boomi for four projects. Moreover, Imported xml, json, and flat file data into Boomi for proper transfer of profile information thorough **SOAP** and **Rest API** calls.
-
