

Sai Anoop Goud Bijja | Full Stack Developer

Jersey City, NJ | (551) 227-8500 | sai.b140899@gmail.com | [LinkedIn](#)

SUMMARY

- Full Stack Java Developer having 3+ years of experience with proficiency in Java, Python, JavaScript, and TypeScript, building dynamic and responsive applications.
- Expertise in backend frameworks including Spring Framework, Spring Boot, Hibernate, and Node.js, ensuring robust and scalable server-side applications.
- Skilled in working with databases like MySQL, PostgreSQL, MongoDB, and DynamoDB, providing efficient and secure data storage solutions.
- Strong knowledge of frontend technologies such as HTML, CSS, AngularJS, React.js, and Bootstrap, ensuring seamless user interface development.
- Proficient in testing and debugging using tools like JUnit, Mockito, Selenium, and Postman to ensure high-quality and well-tested applications.
- Deep understanding of J2EE Technologies like Servlets, JSP, JSTL, and JavaBeans, with experience in JWT for secure authentication processes.
- Experience with cloud technologies such as AWS (EC2, Lambda, S3, Hive/Presto) for deploying scalable applications.
- Proficient in development methodologies like Agile (Scrum, TDD) and Waterfall, with hands-on expertise in tools like Git, Jenkins, Docker, Kubernetes, and Azure DevOps for seamless project management and CI/CD processes.

TECHNICAL SKILLS

Languages:	Java, Python, JavaScript, TypeScript
Frameworks:	Spring Framework, Hibernate, Spring Boot, Spring MVC, JavaServer Pages (JSP), Jakarta EE, Node.js, Express.js,
Databases:	MySQL, PostgreSQL, MongoDB, DynamoDB
Frontend Tools:	HTML, CSS, AngularJS, React.js, jQuery, Bootstrap, Redux.js, JUnit, RESTful web services, XML
Testing & Debugging:	JUnit, Mockito, Selenium, SOAP UI, Postman
Methodologies:	SDLC, Agile (Scrum, TTD), Waterfall
J2EE Technologies:	Servlets, JSP, JSTL, JavaBeans, JDBC, JWT
Cloud Technologies:	Amazon Web Services (AWS) - EMR, Hive/Presto, EC2, Lambda, S3
Tools:	IntelliJ IDEA, Visual Studio Code, PyCharm, Git, GitHub, Bitbucket, Jenkins, Azure DevOps, GitLab, Docker, Kubernetes, Postman, Swagger, Jira, Maven, Gradle, Tomcat, Log4j

PROFESSIONAL EXPERIENCE

CitiGroup, NJ, USA Java Full Stack Developer	Feb 2024 – Current
• Led the development of a secure financial transaction management system, optimizing transaction processing workflows and enhancing compliance, resulting in a 35% reduction in processing times. • Developed an intuitive user interface using React.js and Bootstrap, which improved user experience and increased customer satisfaction by 20% through seamless navigation and faster transaction tracking. • Engineered scalable microservices with Spring Boot, significantly improving the modularity of the system and accelerating deployment cycles by 50%, leading to faster feature rollouts. • Employed PostgreSQL for database management, designing and fine-tuning complex queries that decreased data retrieval times by 30%, boosting system performance. • Implemented OAuth 2.0 for secure authentication and adhered to financial industry security standards, improving overall system security and regulatory compliance. • Deployed applications on AWS, utilizing Lambda and CloudWatch for real-time monitoring, ensuring 99.9% uptime and rapid resolution of system issues. • Established a robust testing framework using JUnit and Selenium, improving testing efficiency by 40% and reducing post-deployment defects. • Worked closely with cross-functional teams in an Agile environment, contributing to sprint planning and retrospective sessions to ensure the alignment of goals and timely delivery of key project milestones.	
Virtusa, Hyderabad, India Software Engineer	Oct 2020 - Jul 2022
• Utilized J2EE technologies, including JDBC and JSP, to develop scalable modules for the ERP system, enhancing data access and integration across various business functions, which improved system efficiency by 30%. • Developed, built, and tested Java EE applications using IDEs like Eclipse and IntelliJ, adhering to best practices in coding and design patterns, which accelerated the development process by 20% through better debugging and code organization. • Designed and managed data storage solutions using SQL and NoSQL databases (MySQL, PostgreSQL, and DynamoDB), optimizing query performance to achieve a 25% increase in data retrieval speed for critical application features. • Leveraged AWS services, including EMR, EC2, and S3, to build and optimize cloud-based Java applications, which reduced operational costs by 40% while ensuring high availability and scalability of the ERP solution. • Collaborated on frontend development using Angular and JavaScript to create responsive user interfaces that improved user engagement metrics by 20%, enabling seamless interaction with backend Java services.	

- Implemented and maintained robust server-side logic using Java and Spring Framework, ensuring high performance and scalability of the application, which supported a growing user base and improved response times by 15%.
- Automated the deployment pipeline using Jenkins and Docker, integrating Java applications into a CI/CD workflow that reduced deployment times by 50% and improved overall release quality.
- Developed workflow automation features in internal business applications using Microsoft Power Apps, which streamlined processes and enhanced team productivity by 30%, enabling faster decision-making.
- Utilized Adobe AEM CQ5 to manage and deliver Java-based digital content across web applications, ensuring a consistent user experience and improving content update times by 25%.

Bright Minds Technologies, India

Jun 2019 - Sep 2020

Full Stack Developer

- Led the full-stack development of a comprehensive e-commerce web application, enhancing user experience and boosting sales by 30% within the first quarter of launch.
- Developed a dynamic and responsive user interface using AngularJS, HTML5, and CSS3, which improved user engagement metrics by 25% through intuitive navigation and design enhancements.
- Designed and implemented robust RESTful APIs with Spring Boot to manage product listings, user authentication, and order processing, resulting in a 40% reduction in server response time due to optimized server-side logic.
- Employed MySQL for efficient data storage and retrieval, creating optimized queries that improved application performance and reduced data load times.
- Integrated a secure payment gateway to facilitate online transactions, ensuring compliance with security standards and protecting sensitive user data.
- Successfully deployed the application on AWS using EC2 and S3, ensuring high availability and reliability for users, leading to a significant decrease in downtime incidents.
- Conducted thorough unit and integration testing using JUnit, achieving over 90% code coverage and significantly reducing post-launch bugs, leading to a smoother user experience.
- Actively participated in Agile practices within a cross-functional team, contributing to sprint planning, daily stand-ups, and retrospectives, ensuring timely delivery of project milestones.

PROJECTS

E-Learning Website

- Developed a full-stack e-learning web app using Node.js and React.js, implementing 2FA via HMAC OTP for enhanced security.
- Optimized SQL DB performance using CTEs, indexes, and triggers, and deployed the app using AWS services like S3 and EC2. Integrated dynamic and interactive learning modules using React.js, allowing users to engage with video tutorials, quizzes, and assignments.

Real-Time Chat Application

- Developed a real-time chat application using Node.js for the backend, providing features such as chat rooms, direct messaging, notifications, and user authentication.
- The front end was built with React.js, HTML, CSS, and JavaScript, while DynamoDB was used for database storage. Implemented real-time communication using WebSocket, deployed the application on AWS EC2 with Docker, and managed CI/CD processes with Jenkins and Git.

Weather App

- Developed a Weather App using React.js to create a responsive frontend for users to input city, state, or country and retrieve real-time weather data. Integrated the Open Weather Map API to fetch accurate weather information, including temperature, weather conditions, humidity, and wind speed.
- Utilized React Hooks for state management and Git for version control, with the application deployed on Netlify for seamless hosting and accessibility.

Online Booking System

- Developed an Online Booking System using Java and Spring Boot for backend services, allowing users to book appointments and receive email confirmations.
- Created the front end with Angular, HTML, and CSS, while managing database interactions with MySQL. Deployed the application using Docker and AWS S3 for storing booking confirmations, with Git used for version control throughout the development process.

CERTIFICATIONS

- | | |
|---|-----------------|
| • Oracle Cloud Infrastructure 2024 Generative AI Certified Professional | Jul 2024 |
| • AWS Certified Solutions Architect | Oct 2023 |
| • Adobe Experience Manager Sites Developer | Sep 2020 |
| • Oracle Certified Java Associate Java SE 8 Programmer | Mar 2019 |

EDUCATION

- | | |
|--|-----------------|
| Master of Science in Computer Science
New Jersey Institute of Technology, Newark, New Jersey | Dec 2023 |
| Bachelor of Technology in Computer Science
Jawaharlal Nehru Technological University, Hyderabad, India | May 2020 |
