

SUMMARY

Cloud Engineer with 3 years of experience designing, building, and operating secure, scalable, and reliable cloud platforms across AWS, Azure, and GCP. Strong expertise in Infrastructure as Code, CI/CD automation, containerized deployments, cloud networking, security, and production operations. Proven ability to improve deployment velocity, system availability, incident response, and operational efficiency through automation, monitoring, and disciplined incident management. Experienced working in Agile environments supporting production, staging, and development systems.

TECHNICAL SKILLS

- Cloud Platforms: AWS, Azure, GCP
- Compute & Storage: EC2, Auto Scaling, Load Balancers, S3, EBS, Azure VMs, Managed Disks
- Networking: VPC Architecture, Subnets, Route Tables, Internet & NAT Gateways, DNS, Application & Network Load Balancers
- Security & Identity: IAM Roles & Policies, Security Groups, NACLs, KMS, TLS/SSL
- Infrastructure as Code: Terraform, AWS CloudFormation, ARM Templates, Bicep, Ansible, Helm
- Containers & Orchestration: Docker, Kubernetes, EKS, AKS
- CI/CD & Automation: Git, GitHub Actions, GitLab CI, Jenkins, YAML Pipelines
- Monitoring & Observability: CloudWatch, Prometheus, Grafana, ELK Stack, Azure Monitor
- Scripting & Tooling: Python, Bash, REST APIs
- Testing & Reliability: Integration Testing, Deployment Validation, Rollback Strategies
- Collaboration & Methodologies: Agile (Scrum, Kanban), Jira, Confluence

PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                    |
