EXPERIENCE

Software Developer

January 2024 – Present

Technoid LLC

New Jersey, US

- Architected an AI meeting-intelligence platform that cut documentation time by **50%**, leveraging applied machine learning workflows to automate transcription and summarization.
- Elevated user engagement by **35%** through **clustering algorithms and LLM-driven** style prediction logic, incorporating lightweight analytical techniques inspired by business analytics practices.
- Collaborated with senior engineers on model evaluation, using MATLAB during early experimentation to validate feature behavior before productionizing algorithms.

AI Software Engineer

August 2024 – January 2025

Tracker AI

New York, US

- Trained YOLOv8 on **5,000+ images** to detect smoke and fire damage, integrating machine learning research workflows for improved reliability across smoke and fire damage cases.
- Boosted **CRM engagement by 30%** by developing an interactive React.js interface with GraphQL, leveraging internal business analytics dashboards to refine search filters and user flow.
- Benchmarked model performance during internal AI hackathons, performing exploratory comparisons using **SAS** for statistical checks and validation.

Data Scientist

May 2024 – November 2024

Hoosier Community Network(HCN)

Bloomington, Indiana

- Unlocked **operational efficiency by 40%** through React.js dashboards and cloud-based **LLM pipelines** that automated analytics workflows for 10+ client businesses.
- Developed predictive models using **AI/ML and SQL based queries**, extracting insights from structured datasets and automating reports for enhanced decision-making.
- Automated cloud-based data pipelines to support insights across finance, logistics, and community-services datasets.

PROJECTS

YT-Shorts Generator | TypeScript, React.js, LangGraph, PostgreSQL, LLM [Project Link](#)

- Automated short-form video creation by reducing manual editing time by **60%**, leveraging Whisper for transcription and **OpenAI or Mistral models** for AI-based clip segmentation and suggestion.
- Synthesized a **React–LangGraph** pipeline fusing **LLMs with PostgreSQL** for intelligent clip workflows.

AI-Grader | Python, IBM Granite LLM [Project Link](#)

- Harnessed GenerativeAI techniques in natural language processing to generate automated responses to grading prompts using IBM Granite LLM to automate grading, enhancing consistency and efficiency in student assignment evaluations.

EDUCATION

Indiana University, Bloomington

August 2022 – May 2024

Master of Science in Data Science

GPA: 3.37/4

AWARDS

- Clinched **1st Place** in the CRNY Data Visualization Contest (out of 1000+ participants) by developing interactive dashboards with Power BI and SQL-based data transformation. Applied regression models to analyze **3,000+ survey responses**, deriving key insights for non-profit decision-making.
- Contributed to **5 GitHub repositories** during active participation in Hacktoberfest, showcasing a strong commitment.

TECHNICAL SKILLS

Frontend: React.js, Electron.js, Next.js, Redux, TailwindCSS

Backend: Node.js, Express.js, GraphQL, REST API

Programming: Python, Java, C/C++ , R, JavaScript, C#

Databases: MongoDB, MySQL, GraphQL, PostgreSQL, Snowflake, Neo4j

ETL/Cloud: Apache Airflow, Kafka, AWS Glue, Docker, AWS Lambda

AI & Data: GPT-4, LangChain, RAG, LLM, HuggingFace, TensorFlow, PyTorch

Data Visualization: Power BI, Tableau, QuickSight, Excel
