

VAISHNAVI ETIKYALA

Data analyst

Brooklyn , NY | (551) 331- 3977| vaishnavietikyala6@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience in healthcare and financial analytics, skilled in SQL, Python, and data visualization tools such as Power BI, Tableau, and Excel. Experienced in building ETL pipelines using AWS Glue and Apache Airflow, and analyzing large datasets across cloud platforms including AWS, Azure, and GCP. Strong background in healthcare data analysis, including claims processing, readmission rates, and HIPAA compliance, as well as financial data projects involving credit risk, cost optimization, and regulatory reporting. Proven ability to deliver insights through dashboards, statistical models, and cross-functional collaboration in Agile environments.

TECHNICAL SKILLS

- Programming Languages:** Python (Pandas, NumPy, SciPy), Advanced SQL, R, Jupyter
- Packages & Libraries:** NumPy, Pandas, Matplotlib, SciPy, ggplot2, Seaborn, Plotly, scikit-learn, TensorFlow, PySpark
- Visualization Tools:** Tableau, Power BI, MS Excel
- Methodologies:** SDLC, Agile, Waterfall, Scrum
- Databases:** MySQL, SQL Server, PostgreSQL, Oracle, MongoDB, Amazon Redshift
- Data Privacy & Compliance:** HIPAA, HL7
- ETL & Data Integration Tools:** Hadoop, SSIS, Talend, Apache Ni Fi, Informatica, Alteryx
- CRM & Analytics Platforms:** Salesforce, SAP, SAS, Google Analytics, HubSpot
- Healthcare Analytics:** Claims & EHR Data Analysis, Readmission Rate Tracking, Care Gap Identification, Chronic Disease Insights, HIPAA Compliance, Population Health KPIs, Fraud Detection
- Financial Analytics:** Credit Risk Scoring, Investment Trend Analysis, Financial Forecasting, Regulatory Reporting, P&L Support

PROFESSIONAL EXPERIENCE

Data Analyst Cigna Healthcare Group, USA	Jan 2025 – Present
- Performed advanced analytics on clinical and claims data using SQL and Python Insights Platform, identifying treatment effectiveness trends and health metric patterns that led to data-informed care improvements and patient outcome enhancements. - Built and deployed predictive risk models using Python and R on historical healthcare datasets, enabling proactive identification of high-risk patients and supporting preventive care strategies across population health programs. - Designed interactive, executive-level dashboards in Tableau and Power BI to visualize key performance indicators (KPIs) such as readmission rates, care gaps, and provider performance—empowering clinical teams with real-time, actionable insights. - Increased claims audit accuracy by 30% by implementing machine learning algorithms in Scikit-learn to detect anomalies and flag fraudulent patterns, such as overbilling and duplicate claims, significantly reducing financial exposure. - Streamlined large-scale data pipelines using optimized SQL queries and AWS Redshift, enhancing query performance, reducing processing time by 40%, and enabling faster decision-making in high-volume claims environments. - Maintained strict compliance with HIPAA, HL7, and internal data governance protocols, ensuring the secure handling, storage, and processing of PHI across all analytics workflows and reports.	
Data Analyst Hexaware Technologies, India	Jun 2020 – Jul 2023
- Led end-to-end financial and healthcare analytics initiatives using SQL, Apache Spark, and Google Cloud Platform (GCP), optimizing delivery logistics and enhancing cost forecasting accuracy to improve operational efficiency and decision-making.. - Migrated and integrated financial datasets from legacy systems into SQL Server, creating schemas, views, and stored procedures to support reporting, budgeting, and reconciliation processes. - Executed complex SQL queries to extract and model data for monthly variance analysis, P&L reviews, and quarterly financial reporting, enhancing data accuracy and timeliness. - Created Excel-based financial dashboards using pivot tables, Power Pivot, and macros for internal audits, budget tracking, and revenue performance reviews. - Analyzed large volumes of healthcare and EHR data using Hadoop, Hive, and Apache Spark, improving population health insights and enabling faster clinical reporting. - Designed and executed a healthcare and financial supply chain analytics project leveraging SQL, Apache Spark, and Google Cloud Platform (GCP) to streamline claims-related logistics, optimize resource allocation, and strengthen cost forecasting accuracy. - Built and deployed interactive Power BI dashboards using advanced DAX and Power Query to visualize healthcare KPIs such as patient readmission rates and care gaps, increasing stakeholder engagement by 20%. - Maintained and updated data models and documentation in compliance with industry standards and internal data governance policies using Excel, Confluence, and Jira.	

EDUCATION

Masters in Information systems	Sep 2023 - May 2025
Stevens Institute of Technology Hoboken, New Jersey, USA	
Bachelors in Electrical and Electronics Engineering	July 2018-Aug 2022
Hyderabad Institute of Technology and Management Hyderabad, India	

CERTIFICATE

- Data Analyst Bootcamp – Code basics
- Career Essentials in Data Analysis – Microsoft & LinkedIn
- Data Analytics and Visualization Job Simulation – Accenture North America (via Forage)
