

VAISHNAVI REDDY

Location: Tampa, FL | **Phone:** +1 (904) 431-7083 | **Email:** vundyala.vaishnavi@gmail.com | [LinkedIn](#)

SUMMARY

- Software Engineer with 4 years of professional experience specializing in full-stack development, backend optimization, and cloud-native application deployment.
- Proficient in building scalable web applications using React, Node.js, Django, and Flask, and developing secure RESTful and GraphQL APIs.
- Skilled in leveraging AWS, Azure, and GCP platforms, along with containerization and orchestration technologies like Docker, Kubernetes, and Helm.
- Experienced in implementing CI/CD pipelines through GitHub Actions, GitLab CI, and Jenkins, streamlining continuous delivery across environments.
- Knowledgeable in integrating Machine Learning and Large Language Models (LLMs) such as OpenAI GPT, LangChain, and Hugging Face Transformers into real-world applications.
- Strong background in Agile methodologies (Scrum, Kanban) with a consistent focus on delivering secure, high-performance, and user-centric solutions.

SKILLS

- **Programming Languages:** Java, Python, TypeScript, SQL, JavaScript
- **Frontend Development:** HTML5, CSS3, React, Angular, Tailwind
- **Backend Development:** Spring Boot, Spring Cloud, Node.js, Express.js, Django, Flask
- **Database Management:** MySQL, PostgreSQL, MongoDB, Redis, Hibernate, JPA
- **Messaging & Event Streaming:** Kafka, RabbitMQ
- **Version Control & CI/CD:** Git, GitLab CI, Jenkins, GitHub Actions, Bitbucket
- **Containerization & Orchestration:** Docker, Kubernetes, Docker Compose, Helm
- **Authentication & Security:** JWT, OAuth2, Role-Based Access Control (RBAC)
- **Cloud Platforms:** AWS (EC2, Lambda, S3, RDS, DynamoDB), Microsoft Azure, Google Cloud Platform (GCP)
- **API Management:** RESTful APIs, GraphQL, SOAP APIs, AWS API Gateway
- **Machine Learning & Large Language Models (LLM):** Scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, Matplotlib, Seaborn, OpenCV, NLP, Computer Vision, OpenAI GPT, LangChain, Hugging Face Transformers, Prompt Engineering, Fine-tuning, RAG
- **Testing & Automation:** JUnit, Jest, Selenium
- **DevOps Tools:** Ansible, Terraform, Maven, Gradle, Prometheus, Grafana
- **Agile Methodologies:** Scrum, Kanban, Jira,
- **Miscellaneous Tools:** SonarQube, Postman, Swagger, Visual Studio Code, IntelliJ IDEA, Draw.io, Slack

WORK EXPERIENCE

CVS Health

Aug 2024 – Present

Software engineer

- Spearheaded the development of a modern digital payment solution using React, Tailwind, and Node.js, boosting transaction processing speed by 30%.
- Architected secure, scalable APIs with Spring Boot and AWS API Gateway, implementing OAuth2 and JWT authentication mechanisms.
- Orchestrated the deployment of microservices on AWS Lambda and EC2 using Docker, Kubernetes, and Helm, cutting infrastructure costs by 18%.
- Optimized database management with MongoDB to ensure seamless handling of over 10 million payment transactions.
- Automated CI/CD workflows via GitHub Actions, GitLab CI, and Terraform, reducing deployment times by 40% across multiple environments.
- Monitored system health and performance with Prometheus and Grafana, proactively addressing latency issues to maintain platform reliability.

DXC Technology

Nov 2023 – May 2024

Software engineer Intern

- Developed and enhanced backend microservices using Spring Cloud and Express.js, reducing claim processing time by 25%.
- Built intuitive user interfaces with Angular, HTML5, and CSS3, improving user satisfaction scores by 15% during internal pilot testing.
- Designed and managed MySQL and Redis databases for real-time claims tracking, ensuring 99.9% system uptime.
- Automated API integration workflows utilizing SOAP and RESTful APIs, streamlining third-party insurance verifications.
- Deployed containerized services through Docker Compose on Microsoft Azure, achieving consistent scalability across environments.

Dell

Jan 2021 – July 2022

Software engineer

- Engineered a scalable device management portal using React and Django to support enterprise-wide device monitoring and management.
- Developed backend services with Django REST Framework, improving API response times by 28% and enhancing real-time device data retrieval.
- Designed and integrated RESTful APIs to streamline communication between the management portal and edge devices.
- Implemented secure authentication workflows using JWT, ensuring compliance with corporate data security standards.
- Deployed microservices on AWS EC2 using Docker containers, optimizing scalability and reducing infrastructure costs.

- Built resilient data models and managed relational databases with MySQL, achieving 99.95% system uptime and high transaction reliability.
- Automated end-to-end testing workflows with Pytest and Selenium, reducing production bugs by 20%.
- Collaborated within Agile Scrum teams, utilizing Git, Bitbucket, and Gradle to drive continuous integration and delivery processes.

TatvaSoft

Oct 2019 – Dec 2020

Software engineer

- Developed a Java-based Loan Management System (LMS) using Spring Boot, Hibernate, and JPA, ensuring efficient loan tracking and automated disbursement.
- Designed and optimized MySQL/PostgreSQL database schemas, reducing query response time by 30% for loan processing.
- Implemented RESTful APIs for seamless integration with third-party financial services, enhancing transaction security and compliance.
- Developed an Angular-based frontend for user-friendly loan application and repayment tracking, improving user engagement.
- Automated loan eligibility and risk assessment logic using Spring Boot microservices, enhancing approval efficiency.
- Integrated Jenkins-based CI/CD pipelines for automated deployment, ensuring rapid feature releases and bug fixes.
- Utilized Docker containers to streamline development and deployment processes, improving system scalability.
- Collaborated with cross-functional teams in an Agile environment, effectively managing sprints and feature deliveries using Jira.

PROJECTS

AI-Powered Document Summarization Tool

- Built a web application using Flask and Hugging Face Transformers to automatically generate concise summaries from uploaded documents.
- Deployed the backend infrastructure on AWS with integrated RESTful APIs for smooth document processing and retrieval.
- Fine-tuned transformer models to enhance the relevance and readability of summaries across multiple document types.

Real-Time Chat Application for Enterprise Teams

- Designed a React and Node.js-powered chat interface, enabling real-time messaging with WebSocket.
- Implemented emoji reactions, file sharing, and user presence indicators using Socket.io.
- Styled the UI with Tailwind CSS, improving responsiveness across different screen sizes.

EDUCATION

- **Master of Science in Computer Science**
California State University Northridge | CGPA - 3.71
- **Bachelor of Technology in Computer Engineering**
Jawaharlal Nehru Technological University, Hyderabad, India | CGPA - 4.0

August 2022 - May 2024

August 2017 - June 2021

CERTIFICATIONS

- AWS Certified Cloud Practitioner – Amazon Web Services (AWS)
